Free PDF Quiz HCL Software Academy - High-quality HCL-DOM-AADM-12 Test Passing Score

Our HCL Software Academy HCL-DOM-AADM-12 practice exam simulator mirrors the HCL-DOM-AADM-12 exam experience, so you know what to anticipate on HCL-DOM-AADM-12 certification exam day. Our HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 (HCL-DOM-AADM-12) practice test software features various question styles and levels, so you can customize your HCL Software Academy HCL-DOM-AADM-12 exam questions preparation to meet your needs.

HCL Software Academy HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 Sample Questions (Q17-Q22):

NEW QUESTION # 17

How can administrators be proactively alerted about issues in the Domino environment?

- A. By running the Domino Setup Utility daily
- **B. By configuring event generators in DDM**
- C. By updating the server notes.ini file
- D. By disabling SMTP routing

Answer: B

Explanation:

Domino Domain Monitoring (DDM) is the primary tool for proactive alerting within a Domino environment. By configuring event generators in DDM, administrators can set specific thresholds for server health, mail routing delays, and security events. When these thresholds are met, DDM generates an alert in the ddm.nsf database, which can then be configured to send notifications (such as emails) to administrators, allowing them to resolve issues before they impact end users.

NEW QUESTION # 18

What is the role of Domino Domain Monitoring (DDM)?

- A. Archiving mail messages from all servers
- B. Viewing cluster analysis
- C. Enforcing directory ACL policies
- **D. Centralized collection and display of server events**

Answer: D

Explanation:

Domino Domain Monitoring (DDM) provides a centralized collection and display of server events across an entire domain. It uses "probes" to check various subsystems (like Mail, Security, or Replication). When a probe finds an issue, it generates a report in the ddm.nsf database, allowing administrators to monitor the health of multiple servers from a single interface.

NEW QUESTION # 19

What is the purpose of the Server > Status tab in the Domino Administrator Client?

- **A. To display real-time server activity and task status**
- B. To reset user passwords
- C. To configure server security settings
- D. To register new Domino servers

Answer: A

Explanation:

The Server > Status tab is the primary interface for active server monitoring. It allows administrators to display real-time server activity, view the current list of running tasks (such as AdminP or Router), and observe the server console to verify that the environment is running correctly and efficiently.

NEW QUESTION # 20

What is the function of the AdminP task?

- A. Archive inactive mail files
- B. Perform full-text indexing
- **C. Automate administrative requests**
- D. Monitor server CPU utilization

Answer: C

Explanation:

The Administration Process (AdminP) is designed to automate administrative requests throughout a Domino domain. When an administrator performs actions like renaming a user or deleting a group, the request is posted to the admin4.nsf database. AdminP then carries out these changes across all servers, updating ACLs, person documents, and other references automatically to ensure domain-wide consistency.

NEW QUESTION # 21

What is the main benefit of enabling DAOS on a Domino server?

- A. Enhancing full-text search capabilities
- **B. Reducing disk usage by storing shared attachments only once**
- C. Enabling offline access for users

Answer: B

Explanation:

The Domino Attachment and Object Service (DAOS) provides significant storage efficiency. Its main benefit is reducing disk usage by storing shared attachments only once. Instead of every user's mail file containing a separate copy of a large attachment, DAOS extracts the file to a central repository and places a small header (ticket) in each user's document, dramatically decreasing the overall storage footprint on the server.

NEW QUESTION # 22

.....

Our SurePassExams provides HCL-DOM-AADM-12 braindumps and training materials in PDF and software, which contains HCL-DOM-AADM-12 exam dumps and answers. Moreover, the content of HCL-DOM-AADM-12 braindumps and training materials covers largely and more reliably, and it will help you most to prepare HCL-DOM-AADM-12 test. If you fail the HCL-DOM-AADM-12 certification exam with our HCL-DOM-AADM-12 dumps, please don't worry. We will refund fully.
