

New AZ-700 Exam | Valid Microsoft AZ-700: Designing and Implementing Microsoft Azure Networking Solutions 100% Pass

2025 Latest UpdateDumps AZ-700 PDF Dumps and AZ-700 Exam Engine Free Share: https://drive.google.com/open?id=15mJ_jnJwpO1Y48NTOh2SDkn641U_qZFM

With the popularization of wireless network, those who are about to take part in the AZ-700 exam guide to use APP on the mobile devices as their learning tool, because as long as entering into an online environment, they can instantly open the learning material from their appliances. Our AZ-700 study materials provide such version for you. The online test engine is a kind of online learning, you can enjoy the advantages of APP version of our AZ-700 Exam Guide freely. Moreover, you actually only need to download the APP online for the first time and then you can have free access to our AZ-700 exam questions in the offline condition if you don't clear cache.

UpdateDumps has come up with real Microsoft AZ-700 Dumps for students so they can pass Designing and Implementing Microsoft Azure Networking Solutions (AZ-700) exam in a single try and get to their destination. UpdateDumps has made this study material after consulting with the professionals and getting their positive feedback. A lot of students have used our product and prepared successfully for the test.

2026 Microsoft AZ-700: Designing and Implementing Microsoft Azure Networking Solutions Updated Exam

About the dynamic change of our AZ-700 guide quiz, they will send the updates to your mailbox according to the trend of the exam. Besides, we understand you may encounter many problems such as payment or downloading AZ-700 practice materials and so on, contact with us, we will be there. Our employees are diligent to deal with your need and willing to do their part 24/7. They always treat customers with courtesy and respect to satisfy your need on our AZ-700 Exam Dumps.

Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q78-Q83):

NEW QUESTION # 78

Hotspot Question

You have two Azure virtual networks named Vnet1 and Vnet2 in an Azure region that has three availability zones. You deploy 12 virtual machines to each virtual network, deploying four virtual machines per zone.

The virtual machines in Vnet1 host an app named App1. The virtual machines in Vnet2 host an app named App2.

You plan to use Azure Virtual Network NAT to implement outbound connectivity for App1 and App2.

You need to identify the minimum number of subnets and Virtual Network NAT instances required to meet the following requirements:

- A failure of two zones must NOT affect the availability of either App1 or App2.
- A failure of two zones must NOT affect the outbound connectivity of either App1 or App2.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Minimum number of subnets:

1
2
6
12

Minimum number of Virtual Network NAT instances:

1
2
6
12

Answer:

Explanation:

Answer Area

Minimum number of subnets:

1
2
6
12

Minimum number of Virtual Network NAT instances:

1
2
6
12

Explanation:

Availability zone isolation cannot be provided, unless each subnet only has resources within a specific zone. Instead, deploy a subnet for each of the availability zones where VMs are deployed, align the zonal VMs with matching zonal NAT gateways, and build separate zonal stacks. For example, a virtual machine in availability zone 1 is on a subnet with other resources that are also only in availability zone 1. A NAT gateway is configured in availability zone 1 to serve that subnet.

<https://docs.microsoft.com/en-us/azure/architecture/networking/guide/well-architected-network-address-translation-gateway>

NEW QUESTION # 79

You have an Azure virtual network named Vnet1 that contains two subnets named Subnet1 and Subnet2. You have the NAT gateway shown in the NATgateway1 exhibit, (Click the NATgateway1 tab)

You have the virtual machine shown in the VM1 exhibit, (Click the VM1 tab)

Subnet1 is configured as shown in the Subnet1 exhibit, (Click the Subnet1 tab)

Subnet1 ✕

Subnet1

Subnet address range * ⓘ

10.100.1.0/24

10.100.1.0 - 10.100.1.255 (251 + 5 Azure reserved addresses)

Add IPv6 address space ⓘ

NAT gateway ⓘ

NATgateway1

network security group

None

route table

None

SERVICE ENDPOINTS

Create service endpoint policies to allow traffic to specific Azure resources from your virtual network over service endpoints. [Learn more](#)

services ⓘ

0 selected

SUBNET DELEGATION

delegate subnet to a service ⓘ

None

For each of the following statements, select Yes if the statement is true. Otherwise, select No

Statements	Yes	No
VM1 can communicate outbound by using NATgateway1.	<input type="radio"/>	<input type="radio"/>
The virtual machines in Subnet2 communicate outbound by using NATgateway1.	<input type="radio"/>	<input type="radio"/>
All the virtual machines that use NATgateway1 to connect to the internet use the same public IP address.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Statements	Yes	No
VM1 can communicate outbound by using NATgateway1.	<input checked="" type="radio"/>	<input type="radio"/>
The virtual machines in Subnet2 communicate outbound by using NATgateway1.	<input checked="" type="radio"/>	<input type="radio"/>
All the virtual machines that use NATgateway1 to connect to the internet use the same public IP address.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation
Yes, Yes, No

NEW QUESTION # 80

You have an Azure subscription that contains the resources shown in the following table.

Name	Type	Description
VNet1	Virtual network	Contains a subnet named Subnet1
Subnet1	Virtual subnet	Part of VNet1
NSG1	Network security group (NSG)	Linked to Subnet1
ASG1	Application security group	Not linked

Subnet1 contains three virtual machines that host an app named App1. App1 is accessed by using the SFTP protocol. From NSG1, you configure an inbound security rule named Rule2 that allows inbound SFTP connections to ASG1. You need to ensure that the inbound SFTP connections are managed by using ASG1. The solution must minimize administrative effort.

What should you do?

- A. From each virtual machine, associate the network interface to ASG1.
- B. From NSG1, modify the priority of Rule2.
- C. From ASG1, modify the role assignments.
- D. From Subnet1, create a subnet delegation.

Answer: A

NEW QUESTION # 81

Your company has a single on-premises datacenter in New York. The East US Azure region has a peering location in New York. The company only has Azure resources in the East US region. You need to implement ExpressRoute to support up to 1 Gbps. You must use only ExpressRoute Unlimited data plans. The solution must minimize costs.

Which type of ExpressRoute circuits should you create?

- A. ExpressRoute Direct
- B. ExpressRoute Standard
- C. ExpressRoute Premium
- D. ExpressRoute Local

Answer: D

Explanation:

ExpressRoute local, standard, global offer unlimited data plans.

ExpressRoute local: access azure region locally

ExpressRoute Standard: access azure multiple regions within a geopolitical location.

ExpressRoute Global: access azure regions globally/all over the world

<https://docs.microsoft.com/pl-pl/azure/expressroute/expressroute-faqs#what-is-expressroute-local>

NEW QUESTION # 82

You have an Azure subscription that contains the public IPv4 addresses shown in the following table.

Name	SKU	IP address assignment	Location
IP1	Basic	Static	West US
IP2	Basic	Dynamic	West US
IP3	Standard	Static	West US
IP4	Basic	Static	West US 2
IP5	Standard	Static	West US 2

You plan to create a load balancer named LB1 that will have the following settings:

* Name: LB1

* Location: West US

* Type: Public

* SKU: Standard

Which public IPv4 addresses can be used by LB1?

- A. IP3 only
- B. IP1, IP3, IP4, and IP5 only
- C. IP2 only

- D. IP1, IP2, IP3, IP4, and IP5
- E. IP3 and IP5 only
- F. IP1 and IP3 only

Answer: E

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-network/virtual-network-public-ip-address> This is because "Load balancer and the public IP address SKU must match when you use them with public IP addresses" <https://docs.microsoft.com/en-us/azure/load-balancer/skus> Standard SKU Load Balancer routes traffic within and across regions, and to Availability Zones for high resiliency.

NEW QUESTION # 83

.....

Compared with those practice materials which are to no avail and full of hot air, our AZ-700 guide tests outshine them in every aspect. If you make your decision of them, you are ready to be thrilled with the desirable results from now on. All exam candidates are awfully sure of our AZ-700 practice materials and when they meet other needs of the exam, they would rather be our regular buyers. We are sure of anyone who wants to pass the exam as well as our AZ-700 question materials. We will continue making our sublime materials more useful by keeping adding useful knowledge of this exam into them.
