ExamCost is not only a website but as a professional study tool for candidates. Last but not least, we have advanced operation system of NCP-CI-Azure training materials which not only can ensure our customers the fastest delivery speed but also can protect the personal information of our customers automatically. In addition, our professional after sale stuffs will provide considerate online after sale service on the NCP-CI-Azure Exam Questions 24/7 for all of our customers. And our pass rate of NCP-CI-Azure studying guide is as high as 99% to 100%. You will get your certification with our NCP-CI-Azure practice prep.

Nutanix NCP-CI-Azure Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Configuring an NC2 on Azure Environment: This section evaluates the skills of IT Administrators and emphasizes modifying cloud networking security to protect resources. Candidates will configure Nutanix networking settings and troubleshoot connectivity issues to ensure seamless communication within the cloud environment.
Topic 2	<ul style="list-style-type: none">Managing an NC2 on Azure Environment: This section relates to skills in identifying management tasks for nodes and clusters. Candidates will monitor cluster health and cloud resource performance, ensuring that all components function efficiently. Understanding these management tasks is vital for maintaining operational integrity in a hybrid cloud environment.

Topic 3	<ul style="list-style-type: none"> • Planning an NC2 on Azure Deployment: This section of the exam measures the skills of IT Administrators and covers the preparation of the Azure cloud environment, including determining the appropriate Azure account and node types. It also involves subscribing to the NC2 service, which requires knowledge of authentication methods and organization naming conventions. Additionally, candidates must determine implementation requirements by evaluating deployment use cases and redundancy needs. Identifying networking requirements is crucial, focusing on connectivity options like VPN and CIDR ranges.
Topic 4	<ul style="list-style-type: none"> • Deploying an NC2 on Azure Environment: This section assesses the skills of Nutanix Cloud Operators and focuses on deploying the cloud cluster within the Azure environment. Candidates will learn to configure cloud provider networking effectively, ensuring that all necessary resources are correctly set up for deployment.

Reliable NCP-CI-Azure Dumps Questions & NCP-CI-Azure Test Dumps Demo

We don't just want to make profitable deals, but also to help our users pass the NCP-CI-Azure exams with the least amount of time to get a certificate. Choosing our NCP-CI-Azure exam practice, you only need to spend 20-30 hours to prepare for the exam. Maybe you will ask whether such a short time can finish all the content, we want to tell you that you can rest assured, because our NCP-CI-Azure Learning Materials are closely related to the exam outline.

Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q25-Q30):

NEW QUESTION # 25

NC2 Azure API calls are failing and MCM no longer shows telemetry or health of the cluster. Where should the administrator look first?

- **A. Check whitelisting of Outbound Communication**
- B. Log into Prism and check alerts and notifications
- C. SSH into the NC2 Azure CVMs
- D. Check VPN/ExpressRoute

Answer: A

Explanation:

* **Outbound Communication Whitelisting:** For NC2 Azure API calls and telemetry data to function correctly, certain outbound communications must be allowed. If these communications are not whitelisted, API calls can fail, and telemetry or health data might not be reported correctly.

* **First Check:** Given the symptoms (failing API calls and missing telemetry), the first step should be to ensure that all necessary outbound communications are correctly whitelisted. This includes ensuring that endpoints and services required for NC2 operation are accessible.

NEW QUESTION # 26

An administrator manager a virtual desktop environment running on an NC2 cluster in Azure.

The desktop running on the cluster need to contact resources on-premises through the ExpressRoute that has been setup. The save on bandwidth from the on-premises environment to Azure, the administrator wants the desktops to access the internet through an Azure NAT Gateway.

Which configuration will best accomplish this task?

- **A. Assign all desktops Floating IPs and use an external-NAT network in the transit VPC. Set the default route of 0.0.0.0/0 for the Nutanix User VPC pointing to the external-NAT network.**

- B. Set the default route of 0.0.0.0/0 for the Nutanix User VPC pointing to the external-NAT network. Set a route to the on-premises subnet for the Nutanix User VPC pointing to the external-No-NAT network.
- C. Set the default route of 0.0.0.0/0 for the Nutanix User VPC pointing to the external-NAT network. Set a route to the on-premises subnet for the Nutanix User VPC pointing to the external-NAT network.
- D. Set the default route of 0.0.0.0/0 for the Nutanix User VPC pointing to the external-No-NAT network.

Answer: B

Explanation:

* Default Route for Internet Traffic:By setting the default route of 0.0.0.0/0 for the Nutanix User VPC pointing to the external-NAT network, all internet-bound traffic from the desktops will be routed through the Azure NAT Gateway, conserving bandwidth on the ExpressRoute connection.

* On-Premises Route:Setting a specific route to the on-premises subnet for the Nutanix User VPC pointing to the external-No-NAT network ensures that traffic destined for on-premises resources bypasses the NAT Gateway and utilizes the ExpressRoute connection, optimizing the use of network paths.

NEW QUESTION # 27

Exhibit.

An administrator is trying to figure out why the NC2 cluster deployment in Azure failed. Which issue might be the cause?

- A. The company does not have sufficient NCI/AOS licenses.
- B. DNS servers are not reachable from cluster management VNet.
- C. The selected bare metal node type is not supported in the deployment region.
- D. The administrator has not specified a DNS server during deployment.

Answer: C

Explanation:

* Error Message Analysis:The error message indicates that the node cannot boot successfully and will be replaced with a new node. This points towards an issue related to the specific node type or configuration.

* Bare Metal Node Support:One common cause for such deployment failures is selecting a bare metal node type that is not supported in the chosen deployment region. Azure has specific regions where certain node types are available, and attempting to use an unsupported node type in a region can result in provisioning failures.

NEW QUESTION # 28

A company needs to establish connectivity between the on-premises datacenter and Azure. The company does not have the infrastructure for a dedicated connection.

Which method will best satisfy this requirement?

- A. VPN
- B. ExpressRoute
- C. VNet Peering
- D. Azure Virtual WAN

Answer: A

Explanation:

* VPN for Connectivity:A VPN (Virtual Private Network) allows secure connectivity between the on-premises datacenter and Azure over the public internet without requiring dedicated infrastructure.

* Ease of Setup:VPNs are typically easier and quicker to set up compared to dedicated connections like ExpressRoute, making them suitable for organizations without existing dedicated connection infrastructure.

NEW QUESTION # 29

An administrator is tasked with adding an Azure account to the NC2 console. A requirement is to configure an Azure user that can open, close or extend a support tunnel for the Nutanix Support team.

Which permission must be assigned to the user?

- A. Cluster Auditor
- **B. Account Administrator**
- C. Cluster Administrator
- D. Customer Auditor

Answer: B

Explanation:

Account Administrator Role: This role grants the necessary permissions for managing the Azure account, including the ability to open, close, or extend a support tunnel. These capabilities are crucial for the Nutanix Support team to perform diagnostics and troubleshooting efficiently.

Permissions Included: The Account Administrator role encompasses broader account management rights, ensuring that the user can interact with various support and operational aspects of the NC2 environment within Azure.
