As everybody knows, the most crucial matter is the quality of VMware Cloud Foundation 5.2 Administrator study question for learners. We have been doing this professional thing for many years. Let the professionals handle professional issues. So as for us, we have enough confidence to provide you with the best 2V0-11.25 Exam Questions for your study to pass it. Only with strict study, we write the latest and the specialized study materials. We can say that our 2V0-11.25 exam questions are the most suitable for examinee to pass the exam.

VMware 2V0-11.25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.
Topic 2	• IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.
Topic 3	• Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.

Topic 4	• VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.
Topic 5	• Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network • storage design.

New 2V0-11.25 Exam Fee - Pass Guaranteed Quiz VMware First-grade Reliable 2V0-11.25 Dumps Files

ActualVCE serves as a most important source of IT certification information. You can find learning materials and study guides. If you are interesting in our ActualVCE VMware 2V0-11.25 exam dumps, you can depend on our ActualVCE to make a sound choice. ActualVCE VMware 2V0-11.25 test packed so much with the latest information about the certification training. By using our ActualVCE VMware 2V0-11.25 practice test, you have made preparations for the exam.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q148-Q153):

NEW QUESTION # 148
Which three tasks are performed by Cloud Builder during the bring-up process of a VMware Cloud Foundation solution? (Choose three.)

- A. vCenter and NSX Manager cluster deployment
- B. Aria Suite Lifecycle Manager deployment
- C. SDDC manager deployment
- D. vVols storage configuration for all management hosts
- E. vSphere HA/DRS cluster creation and configuration
- F. NSX Edge cluster deployment

Answer: A,C,F

Explanation:
Cloud Builder deploys the SDDC Manager, which is responsible for managing and automating the VMware Cloud Foundation environment.
Cloud Builder deploys the NSX Edge cluster as part of the network configuration during the bring-up process.
Cloud Builder also deploys the vCenter and NSX Manager clusters to ensure proper management and network virtualization for the VMware Cloud Foundation environment.

NEW QUESTION # 149
Which is the appropriate first action to take to resolve dropped network packets on an ESXi host?

- A. Check physical network switch configuration
- B. Migrate VMs to another data store
- C. Enable Storage I/O Control
- D. Increase the CPU and memory allocation for VMs

Answer: A

Explanation:

Dropped network packets are often caused by misconfigurations or issues at the physical network layer. Checking the physical network switch configuration is the first step to ensure that the network settings, such as VLANs, uplinks, and port configurations, are correctly set up. This ensures proper connectivity and traffic flow for the ESXi host and the VMs.

NEW QUESTION # 150
An administrator is tasked with enabling Workload Management (vSphere IaaS control plane) on a VMware Cloud Foundation workload domain.
Which three of the following are prerequisites for enabling Workload Management? (Choose three.)

- A. Verify that all ESXi hosts are running vSphere 7.0 or later.
- B. Install the vSphere Client on all ESXi hosts.
- C. Configure NTP and DNS settings for all management components.
- D. Ensure that the cluster has at least three ESXi hosts.

Answer: A,C,D

Explanation:
For Workload Management in VMware Cloud Foundation, a minimum of three ESXi hosts is required to create a robust, highly available vSphere cluster.
Proper NTP and DNS configuration is essential to ensure time synchronization and proper resolution of network names, which are critical for Workload Management.
The hosts must be running vSphere 7.0 or later to be compatible with the latest features and requirements for Workload Management.

NEW QUESTION # 151
Which VMware vSphere feature provides the ability to define and apply datastore capabilities to ensure virtual machines meet specific performance and availability requirements?

- A. Host Profiles
- B. Storage Policy Components
- C. Performance Service
- D. Storage Policies

Answer: D

Explanation:
Storage Policies in VMware vSphere allow administrators to define and apply specific storage requirements for virtual machines, ensuring they meet desired performance and availability standards. These policies enable the alignment of VM storage needs with the capabilities of the underlying datastores.

NEW QUESTION # 152
An administrator needs to create a custom role in vCenter Server that is part of VMware Cloud Foundation environment to grant specific privileges to a group of users.
Which two actions should be taken to create this custom role? (Choose two.)

- A. Assign permissions to the custom role before adding privileges.
- B. Clone an existing role in SDDC Manager to create the custom role.
- C. Choose the privileges required for the custom role.
- D. Apply the custom role to the root of the vCenter Server inventor/.
- E. Navigate to the Roles section in the vSphere Client.

Answer: C,E

Explanation:
When creating a custom role, it is essential to choose the appropriate privileges that the role will require. These privileges define what actions the users in the role can perform.
To create and manage roles, you need to navigate to the "Roles" section in the vSphere Client. This is where roles are defined and assigned within the vCenter Server.

NEW QUESTION # 153
