

最新的Oracle 1Z1-182認證考試題庫

P.S. Testpdf在Google Drive上分享了免費的2025 Oracle 1Z1-182考試題庫：<https://drive.google.com/open?id=138vTfeHKYTzBmCbAhGYO0rCguQjFOCBq>

也許在其他的網站或書籍上，你也可以沒瞭解到相關的培訓資料。但是只要你把Testpdf的產品和哪些資料做比較，你就會發現我們的產品覆蓋面更廣。你也可以在Testpdf的網站上免費下載關於Oracle 1Z1-182 認證考試的部分考試練習題和答案來為試用，來檢測我們產品的品質。Testpdf之所以能夠獨一無二地提供全面和高品質的資料的原因是我們擁有專業的專家團隊。他們不斷利用自己的IT知識和豐富的經驗來研究Oracle 1Z1-182 認證考試的往年的考題而推出了Oracle 1Z1-182 認證考試的考試練習題和答案。所以Testpdf的Oracle 1Z1-182 認證考試的最新考試練習題和答案深受參加Oracle 1Z1-182 認證考試的考生的歡迎。

Oracle 1Z1-182 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none">• Moving Data: This section evaluates the expertise of Data Migration Specialists in moving data within Oracle databases. It includes using external tables, executing Oracle Data Pump operations, and distinguishing SQL*Loader commands for importing data efficiently.

主題 2	<ul style="list-style-type: none"> Describe Oracle Database Architecture: This section of the exam measures the skills of Database Administrators and System Architects in understanding the Oracle database architecture. It covers the configurations of Oracle database instances, memory structures like SGA and PGA, and process structures such as background processes. It also explains the logical and physical database structures, including datafiles, control files, and redo log files.
主題 3	<ul style="list-style-type: none"> Managing Users, Roles, and Privileges: This domain evaluates the expertise of Security Administrators in implementing user security measures. It focuses on creating and managing users, roles, and privileges to ensure secure access to Oracle databases.
主題 4	<ul style="list-style-type: none"> Automated Maintenance: This section measures the skills of Database Administrators in describing automated maintenance tasks within Oracle databases. It focuses on applying automated features to streamline routine maintenance activities.
主題 5	<ul style="list-style-type: none"> Managing Storage: This section tests the knowledge of Storage Engineers in managing storage features such as resumable space allocation, segment space-saving, and block space management. It also includes defining segment characteristics to optimize storage utilization.
主題 6	<ul style="list-style-type: none"> Configuring Oracle Net Services: This section measures the skills of Network Administrators and Database Administrators in configuring Oracle Net Services. It includes identifying administration components, describing connection methods, and ensuring seamless communication between clients and databases.
主題 7	<ul style="list-style-type: none"> Managing Undo: This domain measures the skills of Database Administrators in using undo data effectively. It compares undo data with redo data and explains temporary undo usage for efficient transaction management.
主題 8	<ul style="list-style-type: none"> Introduction to Performance: This section evaluates the expertise of Performance Analysts in summarizing Oracle database performance management techniques. It includes measuring database performance using SQL execution plans, directives, and advisors to ensure optimal system efficiency.

高通過率的1Z1-182權威認證 & Oracle 1Z1-182學習筆記： Oracle Database 23ai Administration Associate最新發布

Testpdf是一個能給很多人提供便利，滿足很多人的需求，成就很多人夢想的網站。如果你正在為通過一些Oracle認證考試而憂心重重，選擇Testpdf的說明吧。Testpdf可以使你安心，因為我們擁有好多關於1Z1-182認證考試相關的培訓資料，品質很高，內容範圍覆蓋範圍很廣並且還很有針對性，會給你帶來很大的有幫助。選擇Testpdf你是不會後悔的，它能幫你成就你的職業夢想。

最新的 Oracle Database 23ai 1Z1-182 免費考試真題 (Q42-Q47):

問題 #42

Which four statements are true about the Oracle Server architecture?

- A. The buffer cache and the redo log buffer are held in the large pool.
- B. Each server process or background process has their own Program Global Area (PGA).
- C. A person or program can have more than one session with an instance by logging in with different users.
- D. A connection represents the state of a user's login to an instance.
- E. A person or program can have more than one session with an instance by logging in with the same user.
- F. A session represents the state of a user's login to an instance.

答案： B,C,E,F

解題說明：

A .True. Multiple sessions with different users are possible.

- B .False. Buffer cache and redo log buffer are in SGA, not large pool.
- C .True. Session tracks login state.
- D .True. Each process has its own PGA.
- E .False. Connection is the network link; session is the state.
- F .True. Same user can have multiple sessions (e.g., via different terminals).

問題 #43

At which two container database levels can COMMON Unified Audit Policies be used?

- A. At any level by using the COMMON option in the policy.
- **B. At the CDB level.**
- C. COMMON Unified Audit Policies can only be created at CDB level to monitor DBA operation at any level.
- D. At the Application Root level of an Application Container.
- **E. At the PDB level if the policy is created by a COMMON user.**

答案： **B,E**

解題說明：

- A .False. Not limited to CDB; PDBs can use common policies.
- B .True. Common policies apply at CDB level.
- C .False. Application Root uses app-specific policies.
- D .False. "COMMON option" isn't a feature; policies are common by creation context.
- E .True. A common user can create policies for PDBs.

問題 #44

Which two statements are true about the DUAL table?

- A. It can display multiple rows but only a single column.
- B. It can be used to display only constants or pseudo columns.
- C. It can be accessed only by the SYS user.
- D. It can display multiple rows and columns.
- **E. It can be accessed by any user who has the SELECT privilege in any schema.**
- **F. It consists of a single row and single column of VARCHAR2 data type.**

答案： **E,F**

解題說明：

- A .True. DUAL is public; any user with SELECT can query it.
- B .True. One row, one VARCHAR2 column (DUMMY).
- C .False. Fixed at one row.
- D .False. Not restricted to SYS.
- E .False. One row, one column only.
- F .False. Can return expressions, not just constants.

問題 #45

Which two statements are true concerning logical and physical database structures?

- A. Segments can span multiple tablespaces.
- B. A segment's blocks can be of different sizes.
- C. All tablespaces may have one or more data files.
- **D. A segment can span multiple data files in some tablespaces.**
- **E. A segment might have only one extent.**
- F. A segment's blocks can be of different sizes.

答案： **D,E**

解題說明：

False. All blocks in a segment use the tablespace's block size (e.g., 8KB). While a database can have tablespaces with different

block sizes (e.g., 8KB, 32KB), a single segment's blocks are uniform, as it resides in one tablespace.

Explanation:

Logical structures (e.g., segments, extents) map to physical structures (e.g., data files, blocks). Let's dissect each option:

A : A segment can span multiple data files in some tablespaces.

True. A segment (e.g., a table or index) is a logical entity stored in a tablespace. In a smallfile tablespace (default in Oracle), a segment's extents can span multiple data files if the tablespace has multiple files and space allocation requires it. This is common in large tables or when autoextend adds new files.

Mechanics:Oracle allocates extents across available data files in a round-robin fashion (with ASSM) or as needed, ensuring the segment's data is distributed. This doesn't apply to bigfile tablespaces, which use a single data file.

Example:A 10GB table in a tablespace with two 5GB data files will span both.

B : Segments can span multiple tablespaces.

False. A segment is confined to a single tablespace. Oracle enforces this to maintain logical separation (e.g., a table's data stays in its assigned tablespace). Partitioned tables can have partitions in different tablespaces, but each partition is a separate segment.

Why Not:The segment header and extent map reside in one tablespace, preventing cross-tablespace spanning for a single segment.

C : A segment might have only one extent.

True. A segment starts with one extent upon creation (e.g., a small table or index). If no further growth occurs, it remains a single-extent segment. This is common with small objects or when INITIAL extent size suffices.

Mechanics:In locally managed tablespaces (default), the initial extent is allocated based on INITIAL or tablespace defaults (e.g., 64KB), and additional extents are added only as needed.

D : All tablespaces may have one or more data files.

False. Bigfile tablespaces are restricted to one data file (up to 128TB). Smallfile tablespaces (traditional) can have multiple data files (up to 1022), but the "all" phrasing makes this false due to bigfile exceptions.

Clarification:The question's intent may assume smallfile tablespaces, but Oracle 23ai supports both types.

問題 #46

What memory structure caches the data dictionary providing access to all database user processes?

- A. The Large Pool
- B. The Java Pool
- **C. The Shared Pool**
- D. The Streams Pool

答案： C

解題說明：

D . True. The Shared Pool caches data dictionary metadata (e.g., table definitions) in the Library Cache and Dictionary Cache, accessible to all processes. Others serve different purposes (e.g., Large Pool for backups).

問題 #47

.....

不同的方式是可以達到相同的目的的，就看你選擇什麼樣的方式，走什麼樣的路。很多人都想通過Oracle 1Z1-182 認證考試來使自己的工作和生活有所提升，但是參加過Oracle 1Z1-182 認證考試的人都知道通過Oracle 1Z1-182 認證考試不是很簡單。有的人為了能通過Oracle 1Z1-182 認證考試花費了很多寶貴的時間和精力卻沒有成功。
