The passing rate of our CTFL-AT study materials is the issue the client mostly care about and we can promise to the client that the passing rate of our product is 99% and the hit rate is also high. Our CTFL-AT study materials are selected strictly based on the real CTFL-AT exam and refer to the exam papers in the past years. Our expert team devotes a lot of efforts on them and guarantees that each answer and question is useful and valuable. We also update frequently to guarantee that the client can get more CTFL-AT learning resources and follow the trend of the times. So if you use our study materials you will pass the test with high success probability.

The CTFL-AT certification is highly regarded by employers in the software industry. It demonstrates that a candidate has a solid understanding of Agile testing principles and is able to apply this knowledge to their work. Employers often look for candidates with the CTFL-AT certification when hiring software testers for Agile projects.

The CTFL-AT certification exam is ideal for individuals who have completed the ISTQB Certified Tester - Foundation Level certification and those who have experience in Agile software development projects. ISTQB Certified Tester - Foundation Level Extension - Agile Tester certification is recognized worldwide and is highly valued by employers in the software testing industry. CTFL-AT Exam is designed to assess the individual's aptitude for Agile testing methodologies and their ability to apply these principles in software development projects.

The CTFL-AT certification exam covers various topics related to agile testing, including agile software development, agile testing methods and techniques, and the role of the tester in agile projects. It also covers the principles of agile development, such as iterative and incremental development, continuous integration, and continuous delivery. CTFL-AT exam further evaluates an individual's understanding of agile testing processes, including test-driven development, acceptance test-driven development, and exploratory testing.

Our material is comprehensive, and the price is reasonable.

ISQI ISTQB Certified Tester - Foundation Level Extension - Agile Tester

Sample Questions (Q79-Q84):

NEW QUESTION # 79
Which of the following statements about the Planning poker test estimate technique are CORRECT?
1) Planning poker is a consensus based technique using a deck of cards.
2) A low test estimate usually means the story should be broken down into multiple smaller stories.
3) A high test estimate usually means the story should be broken down into multiple smaller stories.
4) One poker round is played and then consensus has to be reached.
5) The risk level of each backlog item should be decided before the poker session.

- A. 1, 3, 5
- B. 1, 2, 3
- C. 2, 3, 4
- D. 1, 2, 4

Answer: A

NEW QUESTION # 80
Which ONE of the following is an example of a typical "Business-oriented work product"?

- A. A user manual.
- B. Usability testing test results.
- C. Acceptance testing entry criteria.
- D. The released product.

Answer: C

NEW QUESTION # 81
Which of the following statements is FALSE regarding early and frequent feedback?

- A. Early feedback decreases the amount of time needed for system testing.
- B. Early feedback provides the Agile team with information on its productivity.
- C. Early feedback promotes early discovery and resolution of quality problems.
- D. Early feedback helps to deliver a product that better reflects what the customer wants.

Answer: A

Explanation:
Explanation
Early and frequent feedback is one of the core values of Agile development. It helps the Agile team to deliver features with the highest business value first, to discover and resolve quality problems as soon as possible, to provide information on the team's productivity and progress, and to ensure that the product meets the customer's expectations and needs. However, early feedback does not necessarily decrease the amount of time needed for system testing, as system testing is still an important activity in Agile projects to verify the integration and functionality of the whole system. Early feedback may reduce the number of defects found in system testing, but it does not eliminate the need for system testing. NEW QUESTION # 82
You have been asked to execute an exploratory testing session on Park & Ride system. The test charter has been titled as "Buy a bus ticket". As a result, a number of defects were reported, the titles of which are listed below.
Which defect is out of scope for the given test charter?

- A. Price for a bus ticket was calculated incorrectly.
- B. Failed to buy a bus ticket when the network connection to the Central System is down.
- C. Failed to buy a bus ticket after 18:00.
- D. Payment for parking ticket is restricted to cash only (no credit card supported).

Answer: D

Explanation:
The test charter for the exploratory testing session is focused on buying a bus ticket, not a parking ticket.
Therefore, any defect related to the payment for parking ticket is out of scope for the given test charter. The other defects are related to the functionality, usability, or reliability of buying a bus ticket, which are in scope for the test charter.
