

Exam-oriented HPE7-A11 Exam Questions Compose of the Most Accurate Practice Braindumps - RealVCE

In order to meet different needs of every customer, we will provide three different versions of HPE7-A11 exam questions including PC version, App version and PDF version for each customer to choose from. Most importantly, the passing rate of our HPE7-A11 Study Materials is as high as 98 % - 99 %. It can almost be said that you can pass the exam only if you choose our HPE7-A11 learning guide. And our HPE7-A11 practice engine won't let you down.

All those versions are paramount versions. PDF version of HPE7-A11 practice materials - it is legible to read and remember, and support customers' printing request, so you can have a print and practice in papers. Software version of HPE7-A11 practice materials - It support simulation test system, and times of setup has no restriction. Remember this version support Windows system users only. App online version of HPE7-A11 practice materials - Be suitable to all kinds of equipment or digital devices. Be supportive to offline exercise on the condition that you practice it without mobile data.

HPE7-A11 Valid Study Guide, HPE7-A11 Practice Exam Pdf

The HPE7-A11 exam real questions are the ideal and recommended study material for quick and complete HP HPE7-A11 exam preparation. As a HPE7-A11 Exam candidate you should not ignore the HPE7-A11 exam questions and must add the HP HPE7-A11 exam questions in preparation.

HPE Network Campus Access Professional Architect Exam Sample Questions (Q25-Q30):

NEW QUESTION # 25

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge. The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use. The customer is also planning on renovating the corporate office space in order to take advantage of "smart office" technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services. The client would like to ensure full wireless coverage in its 40 m x 40 m i

130 ft x 130 ft) auditorium during company functions while maintaining the fewest APs for aesthetic purposes. WI-FI6 APs are a minimum requirement. Which AP series would you use in the auditorium's 1,000 seats with a maximum take rate of 80%?

- A. AP555
- B. AP515
- C. AP577

- **D. AP635**

Answer: D

Explanation:

The Aruba AP-635 is a Wi-Fi 6 (802.11ax) access point, designed for high-density environments such as auditoriums. It is capable of providing high throughput and efficient airtime fairness to a large number of clients, which makes it suitable for an auditorium setting with 1,000 seats and a high take rate. The AP-635's advanced capabilities, including OFDMA and MU-MIMO, allow it to handle multiple simultaneous connections efficiently, ensuring robust wireless coverage and performance during company functions, all while keeping the number of APs to a minimum to satisfy aesthetic concerns.

NEW QUESTION # 26

A global cruise line company needs to refresh its current fleet. They will refresh the interiors of the ship to be cost-effective and increase their sustainability. They will replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh its current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware. They start with the smallest ship with a maximum of 800 guests. Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access switches (400 cabins, 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDF's of the ship. Each cabin and technical room gets one single access switch.

The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF, of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (930 ft) and the type used is OS1. Each cabin is connected by a single OM2 pair to the IDF, the maximum length is 60 meters (200 ft). Each technical room is connected by a single OM2 pair to the IDF, with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbE to handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN Infrastructure is based on the 200/300 series Indoor and outdoor APs running InstantOS (less than 300 APs), the customer has no change in WLAN requirements.

The cruise line company will replace its current Internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because Internet connection is guaranteed. Based on the best practices and customer requirements, what is the correct WLAN approach?

- A. Aruba 0510 AP and gateway deployment
- B. Aruba OS10 AP only deployment
- C. Aruba OSS campus deployment
- **D. Instant OS 6 deployment**

Answer: D

Explanation:

Given the customer's specific requirements to refresh their WLAN infrastructure without changing the cabling or AP locations and their existing infrastructure based on the 200/300 series Indoor and outdoor APs running InstantOS, the most appropriate WLAN approach is an Instant OS 6 deployment. This choice aligns with the need to upgrade without significant changes to the existing WLAN setup. InstantOS is specifically designed for Aruba Instant APs, offering a streamlined, controller-less architecture that is ideal for the customer's scenario, ensuring ease of deployment, management, and scalability. This approach supports the customer's objectives for a cost-effective and sustainable refresh, providing robust and reliable wireless connectivity for guests while adhering to the current security requirements and infrastructure constraints.

NEW QUESTION # 27

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sq m). Data centers are all offsite and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there

will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use. The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services. The client decides that they would like for all of their exposed printer, conference room, and VoIP phone connections to be controlled by a stateful firewall. What could be planned to ensure that these ports will meet the customer's requirements?

- A. Multi-Zone
- B. Web Portal
- C. Airgroup
- D. Tunneled Node

Answer: A

Explanation:

Multi-Zone Architecture: This approach allows for the segmentation of different types of traffic and devices on the network. By using multi-zone configurations, you can isolate the traffic from printers, VoIP phones, and other devices, enabling you to apply specific security policies, including those from a stateful firewall.

Enhanced Security Control: Implementing multi-zone ensures that each zone can be governed by its own security policies, providing better control over how traffic is managed and how devices communicate within the network. This is crucial for maintaining security in environments where various types of devices interact.

NEW QUESTION # 28

Drag and Drop Question

What documents should be included in the solution proposal? (Place the correct items into the list at the right. Order is not important. Not all options will be used)

Answer:

Explanation:

NEW QUESTION # 29

Drag and Drop Question

You are going with a 3-tier design and need to calculate the oversubscription ratio on the Access, Distribution, Core, and ToR Layer. What is a suitable oversubscription ratio for each layer?

Answer:

Explanation:

NEW QUESTION # 30

.....

Since inception, our company has been working on the preparation of HPE7-A11 learning guide, and now has successfully helped tens of thousands of candidates around the world to pass the exam. As a member of the group who are about to take the HPE7-A11 Exam, are you worried about the difficulties in preparing for the exam? Maybe this problem can be solved today, if you are willing to spend a few minutes to try our HPE7-A11 actual exam.

HPE7-A11 Valid Study Guide: https://www.realvce.com/HPE7-A11_free-dumps.html

One of the biggest advantages of our HPE7-A11 learning guide is that if you won't lose anything if you have a try with our HPE7-A11 study materials. This special offer also testifies the quality and effectiveness of RealVCE HPE7-A11 Valid Study Guide Q&As to award you success in exam. Watch out for questions that are in the earlier versions of HP HPE7-A11 Valid Study Guide® or before the pattern changed, HP HPE7-A11 Study Reference. So we always hold the beliefs that customer first, which is also the regulation every staff must obey.
