CFA Institute CFA Level I Chartered Financial Analyst Sample Questions (Q2020-Q2025):

NEW QUESTION # 2020

Randy Smith called his broker, Pam Durbin, and asked her to borrow 100 shares of Zylex Corp. stock.

Randy then sold the stock at the current market price of \$45 while anticipating that Durbin would be able to buy the stock back for him at a lower price in the future. What type of order did Smith place?

- A. Special order.
- B. Margin order.

- C. Short sale.

Answer: C

Explanation:

The objective of a short sale is to borrow securities, sell them at the current market price and then replace them with the same securities purchased at a lower price.

NEW QUESTION # 2021

_____ is an unsecured obligation of the issuing company.

- A. A debenture
- B. A indenture
- C. The deed of trust

Answer: A

NEW QUESTION # 2022

Taylor Corporation has determined that a printing press that it purchased in 2008 for \$400,000 has become partially obsolete due to newer equipment purchased in 2010. The press had a book value of \$ 160,000 at December 31, 2010. At the end of the press' life, the estimated value is \$40,000, and the net future cash flows from using the machine are estimated to be \$90,000. These cash flows have a present value of \$73,800 and \$32,200, from the future cash flows and residual value, respectively. What amount should Taylor record as "loss due to asset impairment" (Under U.S. GAAP)?

- A. \$32,000
- B. \$30,000
- C. \$54,000

Answer: C

Explanation:

When a fair market is not available, the discounted future cash flows can be used as the cost basis. The present value of the future cash flows is \$106,000 (\$73,800 + \$32,200). The loss is \$54,000 (\$160,000 book value less \$106,000).

NEW QUESTION # 2023

Under rather restrictive assumptions, the equilibrium static efficiency conditions of the purely competitive model are

- A. efficient in the short run, but they will lead to inefficiency in the long run.
- B. inefficient, but they will lead to an equitable distribution of income.
- C. ideal from society's viewpoint.

Answer: C

Explanation:

The purely competitive model implies allocative efficiency which is an ideal condition from society's viewpoint.

NEW QUESTION # 2024

Taxable temporary differences result in a deferred tax _____ when the tax base of an asset is _____ than its carrying amount.

- A. liability, more.
- B. liability, less.
- C. asset, less.

Answer: B

Or when the tax base of the liability exceeds its carrying amount.
