NEW QUESTION # 72

Your Security Officer ran the Security Health Check and found the alert that "Installation of mobile applications from unknown sources" was occurring. They have asked you to find a way to prevent that from happening. Using Mobile Device Management (MDM), you need to configure a policy that will not allow mobile applications to be installed from unknown sources.

What MDM configuration is needed to meet this requirement?

- A. In the Application Management menu, configure the whitelist of apps that Android and iOS devices are allowed to install.
- B. In Device Management > Setup > Device Approvals menu, configure the "Requires Admin approval" option.
- C. In the Application Management menu, configure the whitelist of apps that Android, iOS devices, and Active Sync devices are allowed to install.
- **D. In Android Settings, ensure that "Allow non-Play Store apps from unknown sources installation" is unchecked.**

Answer: D

Explanation:

NEW QUESTION # 73

As a Google Workspace administrator for your organization, you are tasked with identifying how users are reporting their messages- whether spam, not spam, or phishing- for a specific time period. How do you find this information?

- A. Open Admin Console > Security > Dashboard > Spam Filter- Phishing.
- B. Open Admin Console > Reporting > Email Log Search.
- **C. Open Admin Console > Security > Dashboard > User Reports.**
- D. Use Reports API to query user Gmail activity.

Answer: C

NEW QUESTION # 74

Your organization is migrating to Google Workspace and wants to improve how newly created files are classified. You must find a scalable solution to improve security and transparency on how to handle sensitive files. What should you do?

- A. Create classification labels, enable automatic classification, and educate users.
- B. Set data loss prevention (DLP) policies to label data automatically, disable label locking, and educate users.
- C. Integrate with the Cloud DLP API, map identifiers and classifications, install the Google Drive label client, and run the application.
- D. Migrate data to Google Workspace, map classifications, and migrate with the Drive Labels API.

Answer: A

Explanation:

You might want to use default classification for general, low-risk labels, such as which department created the file, and DLP rules to apply labels used for data protection and retention.

NEW QUESTION # 75

Your company works regularly with a partner. Your employees regularly send emails to your partner's employees. You want to ensure that the Partner contact information available to your employees will allow them to easily select Partner names and reduce sending errors.

What should you do?

- A. Add a secondary domain for the Partner Company and create user entries for each Partner user.
- B. Create shared contacts in the Directory using the Directory API.
- C. Educate users on creating personal contacts for the Partner Employees.
- D. Create shared contacts in the Directory using the Domain Shared Contacts API.

Answer: D

Explanation:

* Enable API Access:

* In the Google Workspace Admin console, go to "Security" > "API controls".

* Enable API access and ensure the Domain Shared Contacts API is enabled.

* Use Domain Shared Contacts API:

* Develop a script or application to use the Domain Shared Contacts API to create shared contacts.

* Include the partner employees' contact information in the shared contacts list.

* Upload Shared Contacts:

* Use the script or application to upload the shared contacts to the Google Workspace Directory.

* Ensure all partner contacts are correctly added and available to your employees.

* Verify and Educate Users:

* Verify that the shared contacts are visible to your employees in their Google Contacts.

* Educate users on how to access and use the shared contacts to reduce sending errors.
