1z0-1093-25 Exam Guide Materials & 1z0-1093-25 Valid Exam Vce

BTW, DOWNLOAD part of TestPassed 1z0-1093-25 dumps from Cloud Storage: https://drive.google.com/open?id=1XWhkLbWiMWKiWQgn_hBoBg53Pl4FraJe

If you want to be a more successful person and become the best, the first step you need to take is to have our 1z0-1093-25 exam questions. Get an internationally certified 1z0-1093-25 certificate to prove your strength. This is the best way. Your strength and efficiency will really bring you more job opportunities. And our 1z0-1093-25 study braindumps will help you pass the exam easily and get the certification for sure.

Oracle 1z0-1093-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Oracle Cloud Infrastructure Database Management Service: This section of the exam measures the skills of a Cloud Operations Analyst and provides insight into Oracle's Database Management Service on OCI. It focuses on enabling the service for databases, monitoring their performance, and performing diagnostic and tuning activities. It also covers tasks related to the administration of databases running on Oracle Cloud Infrastructure.

Topic 2	• Exadata Database Service (ExaDB): This section of the exam measures the skills of a Database Infrastructure Engineer and focuses on the advanced Exadata Database Service. It includes the provisioning of Exadata systems, management of Exadata Cloud Infrastructure, and VM Cluster administration. It also evaluates knowledge of lifecycle management tasks and how to interact with various Exadata management utilities and interfaces.
Topic 3	• Base Database Service - VM (BaseDB): This section of the exam measures the skills of a Cloud Database Administrator and covers the foundational elements of Oracle's Base Database Service. It includes understanding what the BaseDB service is, how to provision and manage it, and lifecycle operations such as backups, recovery, patching, and upgrades. It also tests familiarity with monitoring and management interfaces used to control and observe the BaseDB environment.
Topic 4	• MySQL HeatWave Technical Overview: This section of the exam measures the skills of a MySQL Cloud Specialist and introduces MySQL HeatWave, Oracle's high-performance analytics engine for MySQL. It includes provisioning, migrating existing MySQL databases to HeatWave, and working with its analytical and machine-learning capabilities. It also covers day-to-day operational activities within the MySQL HeatWave environment.
Topic 5	• NoSQL Database Service Technical Overview: This section of the exam measures the skills of a NoSQL Developer and explores Oracle's NoSQL Database Service. It includes understanding the basics of NoSQL architecture, handling table-level security, rate limiting, and data modeling. It also covers concepts like provisioned throughput and the usage of language SDKs for interacting with NoSQL services on Oracle Cloud.

Trustworthy 1z0-1093-25 Exam Guide Materials Offers Candidates Pass-Sure Actual Oracle Oracle Cloud Database Services 2025 Professional Exam Products

Our 1z0-1093-25 real exam materials have ugh appraisal in the market for their quality and high efficiency. Because satisfied customer is the best ads, and the word of mouth communication by the customers give others more sense of credibility than any other form of marketing communication. We know a satisfied customer will come back again for the same or different need to the company, so we always provide high-rank 1z0-1093-25 real exam materials over ten years. They have experienced all trials of the market these years approved by experts. Besides, they are easy to assimilate so if you get stuck in the bottleneck of review, and under the guidance of our Oracle Cloud Database Services 2025 Professional exam question they are widely regarded as top notch in this area. Recently our 1z0-1093-25 Guide prep rise to the forefront in the field of practice materials. So if you need other 1z0-1093-25 real exam materials from us, we will not let you down not even once. Hope you pass the exam once successfully by our Oracle Cloud Database Services 2025 Professional exam question and recommend them to your friends. We are sure you will be splendid!

Oracle Cloud Database Services 2025 Professional Sample Questions (Q49-Q54):

NEW QUESTION # 49
Which statement is FALSE regarding the relationship between provisioned throughput and workload characteristics in NoSQL Database Cloud Service?

- A. Larger average record sizes usually demand higher read and write capacity units.
- B. Higher query complexity generally requires higher read throughput.
- C. A write-heavy workload typically necessitates more write capacity units than a read-heavy workload.
- D. Increased frequency of table scans reduces the throughput needed.

Answer: D

Explanation:

Understanding Throughput in NoSQL:

Throughput in NoSQL databases is influenced by factors likequery complexity, workload type (read/write), and record size.

* Higher query complexity (A):Complex queries involving aggregation or joins consume more read capacity.

* Write-heavy workload (B):Writes inherently require more capacity units due to data modification and consistency checks.

* Larger record sizes (D):More data per operation increases the read/write capacity needed.

Why C is incorrect:

* C:Table scans involve reading large volumes of data, which increases throughput requirements rather than reducing them. Frequent table scans can overwhelm the system, especially with large datasets.

NEW QUESTION # 50

You are responsible for managing the storage configuration of an Exadata Database Service (ExaDB). You need to use the cellcli utility to modify the IORM (I/O Resource Management) settings to prioritize critical database workloads. Specifically, you want to adjust the share allocation for a specific database. Which cellcli command will accomplish this?

- A. cellcli configure iormplan database dbname shares=value
- B. cellcli change iormplan database dbname shares=value
- C. cellcli alter iormplan database dbname shares=value
- D. cellcli modify iormplan database dbname shares=value

Answer: C

Explanation:

A: cellcli alter iormplan database dbname shares=value

CellCLI Utility:

* cellcli is a command-line interface used to manage Exadata storage cells.

* Thealtercommand is used to modify existing configurations, including IORM plans.

* IORM (I/O Resource Management):

* Helps control how I/O resources are allocated among databases.

* Thesharesparameter adjusts the relative priority of I/O requests.

* Correct syntax for adjusting IORM:

bash

CopyEdit

cellcli -e "alter iormplan database dbname shares=value"

Why the other options are incorrect:

* B. configure iormplan:Used for creating or setting up new IORM plans, not for modification.

* C. modify iormplan:modify is not a valid command in CellCLI for IORM.

* D. change iormplan:No such command exists in CellCLI.

NEW QUESTION # 51

When upgrading the Oracle Database software version on a BaseDB VM system, what is the primary responsibility of the database administrator (DBA) regarding the underlying operating system?

- A. The DBA has no direct responsibility for the operating system as it is fully managed by Oracle Cloud Infrastructure.
- B. The DBA should manually update the operating system packages after the database upgrade is successfully completed.
- C. The DBA is responsible for initiating and managing the operating system upgrade process through the Oracle Cloud Infrastructure console.
- D. The DBA must ensure the operating system is compatible with the target Oracle Database software version before initiating the database upgrade.

Answer: D

Explanation:

Responsibility of DBA:

Before upgrading the Oracle Database software on aBaseDB VM system, the DBA must verify that the underlying operating system versionis compatible with the new database software version. This is crucial because Oracle Database upgrades may introduce new requirements or dependencies.

The DBA needs to check theOracle Database Upgrade Guideand theOracle Validated Configurationsto ensure compatibility.

Upgrading without this validation could lead to compatibility issues, failed upgrades, or reduced performance.

Why the other options are incorrect:

* A:OCI manages the infrastructure, but the DBA must ensure compatibility.
* C:While OCI manages the OS patching, ensuring compatibility is still a DBA responsibility.
* D:OS updates should be addressed before the database upgrade, not afterward.

NEW QUESTION # 52
Which two prerequisites are required before you can provision a MySQL HeatWave DB system?

- A. A configured OCI Vault with encryption keys for database security.
- B. An OCI Compute instance to act as a client for the MySQL DB system.
- C. A Virtual Cloud Network (VCN) with appropriately configured subnets.
- D. A MySQL Enterprise Edition license.
- E. A pre-configured MySQL database dump for initial data loading.

Answer: C,D

Explanation:
VCN Requirement (B):
AVirtual Cloud Network (VCN)with appropriate subnets is essential to providenetwork connectivity and isolationfor the HeatWave DB system. It ensures secure data flow within the Oracle Cloud Infrastructure.
License Requirement (E):
Since HeatWave is anenterprise feature, it requires aMySQL Enterprise Edition license.Without this license, the HeatWave functionalities cannot be utilized.
Why the other options are incorrect:
* A:Data loading can be performed post-provisioning.
* C:While encryption can be configured, it is not a prerequisite.
* D:An OCI Compute instance may be used as a client but is not mandatory for provisioning.

NEW QUESTION # 53
When a new security patch is released for the Oracle Database software on a BaseDB VM system, what is the recommended approach for applying it in a production environment?

- A. Download the patch and apply it to a non-production environment that mirrors the production environment for testing before applying it to production.
- B. Apply the patch to a production standby database (if one exists) and then failover to the patched standby.
- C. Immediately apply the patch directly to the production database during off-peak hours to minimize potential security vulnerabilities.
- D. Wait for Oracle Cloud Infrastructure to automatically apply the security patch to all BaseDB VM systems.

Answer: A

Explanation:
B: Testing patches in a non-production environment:
* Critical to ensure that the patch does not introduce performance issues or compatibility problems.
* Best Practice:Apply the patch to astaging environmentthat mirrors production, validate stability, and then proceed to production.
* Minimizes the risk of unplanned downtime or disruptions.
Why the other options are incorrect:
* A. Immediate application in production:Risky as untested patches might cause outages.
* C. Automatic patching by OCI:OCI does not automatically apply database patches; the customer must manage this.
* D. Patching the standby and failing over:While a good strategy when applicable, it still requires prior testing.

NEW QUESTION # 54
......

According to the different demands from customers, the experts and professors designed three different versions for all customers. According to your need, you can choose the most suitable version of our Oracle Cloud Database Services 2025 Professional guide torrent for yourself. The three different versions have different functions. If you decide to buy our 1z0-1093-25 Test Guide, the online workers of our company will introduce the different function to you. You will have a deep understanding of the three versions

of our 1z0-1093-25 exam questions. We believe that you will like our products.
