C_S4PM_2504 Top Questions & Valid C_S4PM_2504 Test Duration

The SAP C_S4PM_2504 real exam simulation by the software helps you counter C_S4PM_2504 exam anxiety. You need to install the desktop software on Windows to take the practice test. Our web-based C_S4PM_2504 Practice Test has all aspects of the desktop software. The only difference is that this SAP C_S4PM_2504 practice test works online using any operating system

and browsers.

SAP C_S4PM_2504 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Project Management• Organizational Change Management (OCM): This section of the exam measures the skills of Project Managers and covers the key principles of managing SAP cloud implementation projects, including team coordination, stakeholder communication, and change management. It evaluates the ability to lead project activities, manage expectations, and handle resistance during digital transformation. Emphasis is placed on aligning organizational goals with implementation strategies to ensure effective user adoption and project success.
Topic 2	<ul style="list-style-type: none">• SAP S• 4HANA Cloud Public Edition Implementation: This section of the exam measures the skills of Implementation Consultants and covers the foundational aspects of deploying SAP S• 4HANA Cloud Public Edition in a business environment. It focuses on understanding system architecture, scope definition, and the technical and functional setup required for a successful implementation. The candidate is expected to have a strong grasp of how to execute the necessary configuration and adoption tasks that align with customer-specific requirements.
Topic 3	<ul style="list-style-type: none">• SAP Activate Methodology: This section of the exam measures skills of Business Process Architects and covers the structure and practical application of SAP Activate. It includes understanding the phases of the methodology: Discover, Prepare, Explore, Realize, Deploy, and Run, and the use of supporting tools such as SAP Roadmap Viewer and SAP Best Practices. Candidates are expected to demonstrate the ability to apply this methodology to streamline cloud implementation processes and ensure agile delivery.

SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q52-Q57):

NEW QUESTION # 52

What are objectives of the Executive board as opposed to the Steering Committee? Note: There are 3 correct answers to this question.

- A. To approve project goals
- B. To set business vision and goals
- C. To allocate project funding
- D. To approve the project vision
- E. To approve project results

Answer: B,C,D

Explanation:

In SAP S/4HANA Cloud Public Edition projects, the Executive Board and Steering Committee have distinct roles. The Executive Board focuses on strategic oversight, while the Steering Committee handles operational governance.

* Option A: To approve project results Incorrect. Approving project results is typically a Steering Committee responsibility, as it oversees project progress and deliverables. The SAP Activate Methodology Guide states, "The Steering Committee approves project results and deliverables, ensuring alignment with project plans, while the Executive Board focuses on strategic objectives."

* Option B: To set business vision and goals Correct. The Executive Board defines the organization's strategic vision and goals, which guide the project. The SAP S/4HANA Cloud Project Management Guide explains, "The Executive Board sets the business vision and goals, providing the strategic direction for the SAP S/4HANA Cloud implementation."

* Option C: To approve the project vision Correct. The Executive Board approves the project vision to ensure alignment with organizational strategy. The SAP Activate Methodology Guide notes, "The Executive Board approves the project vision, ensuring it supports the broader business objectives."

* Option D: To allocate project funding Correct. The Executive Board is responsible for securing and allocating funding for the project. The SAP S/4HANA Cloud Implementation Guide confirms, "The Executive Board allocates project funding, ensuring resources are available to achieve the strategic goals of the implementation."

* Option E: To approve project goals Incorrect. Project goals are typically approved by the Steering Committee, which translates

the Executive Board's vision into actionable objectives. The SAP S/4HANA Cloud Study Guide clarifies, "The Steering Committee approves project goals, while the Executive Board focuses on strategic vision and funding." Extract from Official Documentation:

* SAP Activate Methodology Guide (SAP Community, <https://community.sap.com>): "The Executive Board's objectives include setting the business vision, approving the project vision, and allocating funding, while the Steering Committee focuses on approving project goals and results."

* SAP S/4HANA Cloud Implementation Guide (SAP Help Portal, <https://help.sap.com>): "The Executive Board sets the strategic direction by defining the business vision, approving the project vision, and securing funding, distinguishing its role from the Steering Committee's operational oversight." Additional Context:

The Executive Board's strategic focus ensures the SAP S/4HANA Cloud project aligns with organizational priorities, while the Steering Committee's operational role drives execution. This separation of responsibilities enhances governance and accountability in complex cloud projects.

:

SAP Help Portal: SAP S/4HANA Cloud Implementation Guide (<https://help.sap.com>).

SAP Community: SAP Activate Methodology Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details governance roles.

SAP Project Management Best Practices: Outlines board and committee responsibilities.

NEW QUESTION # 53

What defines the organizational entities that are required in SAP Central Business Configuration? Note: There are 2 correct answers to this question.

- A. The selected scope
- B. System consistency checks
- C. The selected deployment target
- D. Added partner content

Answer: A,C

Explanation:

SAP Central Business Configuration (CBC) is a tool used to configure the organizational structure and scope for SAP S/4HANA Cloud Public Edition. The definition of organizational entities depends on specific inputs during the configuration process.

* Option A: The selected scope Correct. The selected scope determines which business processes and organizational entities (e.g., company codes, plants) are required. The scope defines the functional areas to be implemented, which directly influences the organizational structure configured in CBC. SAP's documentation on CBC emphasizes that scoping decisions drive the creation of organizational entities.

* Option B: The selected deployment target Correct. The deployment target (e.g., specific system or tenant) influences the configuration of organizational entities, as it defines where the configuration will be applied. CBC uses the deployment target to ensure that entities are aligned with the target system's requirements, as per SAP's implementation guidelines.

* Option C: Added partner content Incorrect. Partner content may enhance functionality but does not directly define the organizational entities required in CBC. Entities are primarily determined by scope and deployment decisions.

* Option D: System consistency checks Incorrect. System consistency checks validate configurations but do not define the organizational entities. They ensure that the configured entities are consistent with SAP standards.

:

SAP Central Business Configuration Documentation: Details the role of scope and deployment target in defining organizational entities (<https://help.sap.com>).

SAP S/4HANA Cloud Public Edition Implementation Guide: Explains CBC configuration processes.

SAP Activate Methodology: Highlights scoping and deployment as key configuration drivers.

NEW QUESTION # 54

Which of the following configuration items CANNOT be changed after the initial provisioning of SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. Fiscal Year Variant
- B. Custom fields in standard objects
- C. Group currency
- D. User access rights

Answer: A,C

Explanation:

Certain configuration items in SAP S/4HANA Cloud Public Edition are locked after initial provisioning to ensure system consistency and compliance with cloud standards. This is managed through SAP Central Business Configuration (CBC).

* Option A: Group currency Correct. The group currency, used for financial reporting across the organization, cannot be changed after initial provisioning due to its impact on financial data integrity.

The SAP Central Business Configuration Guide states, "The group currency is a critical configuration item that is locked after initial provisioning to maintain consistency in financial reporting."

* Option B: Custom fields in standard objects Incorrect. Custom fields can be added or modified post-provisioning using the Custom Fields and Logic app, supporting extensibility. The SAP S/4HANA Cloud Extensibility Guide notes, "Custom fields in standard objects can be created or adjusted throughout the system lifecycle to meet evolving business needs."

* Option C: User access rights Incorrect. User access rights, managed through business roles, can be modified at any time using the Maintain Business Roles app. The SAP S/4HANA Cloud Security Guide clarifies, "User access rights are flexible and can be updated post-provisioning to align with organizational changes."

* Option D: Fiscal Year Variant Correct. The Fiscal Year Variant, which defines the financial calendar, is locked after provisioning to prevent disruptions in financial processes. The SAP Central Business Configuration Guide explains, "The Fiscal Year Variant is a non-changeable configuration item after initial provisioning, as it underpins all financial transactions and reporting." Extract from Official Documentation:

* SAP Central Business Configuration Guide (SAP Help Portal, <https://help.sap.com>): "Configuration items such as the group currency and Fiscal Year Variant are fixed after initial provisioning in SAP S/4HANA Cloud Public Edition to ensure system stability and data integrity."

* SAP S/4HANA Cloud Implementation Guide: "Certain settings, including group currency and Fiscal Year Variant, are locked post-provisioning to prevent changes that could impact financial consistency, while custom fields and access rights remain configurable." Additional Context:

The locking of group currency and Fiscal Year Variant reflects SAP's cloud strategy to maintain standardization and prevent costly reconfigurations, while allowing flexibility in areas like custom fields and access rights to support ongoing business needs.

:

SAP Help Portal: SAP Central Business Configuration Guide (<https://help.sap.com>).

SAP S/4HANA Cloud Extensibility Guide: Details custom field management.

SAP S/4HANA Cloud Security Guide: Explains access rights flexibility.

SAP S/4HANA Cloud Study Guide: Outlines configuration constraints.

NEW QUESTION # 55

Which of the following is the customer's responsibility in both on-premise and private cloud scenarios?

- A. Operating system
- B. Database
- C. Middleware
- D. Servers

Answer: C

Explanation:

In SAP S/4HANA on-premise and Private Cloud scenarios, the customer assumes certain responsibilities for system management, distinct from the fully managed SAP S/4HANA Cloud Public Edition. Identifying the correct responsibility is key to understanding deployment models.

* Option A: Middleware Correct. In both on-premise and Private Cloud scenarios, customers are responsible for managing middleware, such as integration platforms or custom interfaces. The SAP S/4HANA Deployment Guide states, "In on-premise and SAP S/4HANA Cloud Private Edition deployments, customers are responsible for managing middleware, including integration and connectivity solutions."

* Option B: Operating system Incorrect. In Private Cloud, SAP manages the operating system, while in on-premise, customers manage it. The SAP S/4HANA Cloud Implementation Guide notes, "Operating system management is handled by SAP in Private Cloud, but by customers in on-premise, making it inconsistent across both scenarios."

* Option C: Servers Incorrect. Servers are managed by SAP in Private Cloud, but by customers in on-premise. The SAP S/4HANA Deployment Guide clarifies, "Server management is a customer responsibility in on-premise but handled by SAP in Private Cloud, not a consistent responsibility."

* Option D: Database Incorrect. Database management varies, with SAP handling it in Private Cloud and customers in on-premise. The SAP S/4HANA Cloud Study Guide states, "Database management is SAP's responsibility in Private Cloud, but the customer's in on-premise, not a shared responsibility." Extract from Official Documentation:

* SAP S/4HANA Deployment Guide (SAP Help Portal, <https://help.sap.com>): "In both on-premise and SAP S/4HANA Cloud Private Edition scenarios, customers are responsible for managing middleware, ensuring integration and connectivity align with their

requirements."

* SAP S/4HANA Cloud Implementation Guide(SAP Community,<https://community.sap.com>):

"Middleware management remains a customer responsibility in on-premise and Private Cloud deployments, unlike infrastructure components like servers or databases, which vary by model." Additional Context:

Middleware management, such as configuring SAP Integration Suite or custom APIs, is a consistent customer responsibility due to the need for tailored integration in both on-premise and Private Cloud scenarios. This contrasts with Public Cloud, where SAP manages most integration components, highlighting the increased control and responsibility in Private Cloud and on-premise deployments.

:

SAP Help Portal: SAP S/4HANA Deployment Guide (<https://help.sap.com>).

SAP Community: SAP S/4HANA Cloud Implementation Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details deployment responsibilities.

SAP Activate Methodology: Outlines customer roles in deployment models.

NEW QUESTION # 56

What tools enable non-developers to create low/no-code extensions? Note: There are 2 correct answers to this question.

- A. SAP Business Application Studio
- B. SAP Cloud SDK
- C. SAP Fiori extensibility apps
- D. SAP Build

Answer: C,D
