Our CSC2 test material is updating according to the precise of the real exam. Our Canadian Securities Course Exam2 exam dumps will help you to conquer all difficulties you may encounter.

CSI Canadian Securities Course Exam2 Sample Questions (Q21-Q26):

NEW QUESTION # 21

What obligation does an IA have when communicating information about a preliminary prospectus to prospective investors?

- A. The IA must make a tombstone advertisement.
- B. The IA must record the names addresses of those who have requested and received a preliminary prospectus
- C. The IA must ensure 3 proxy is mailed to the investors to vote for approval or disapproval of the offering.
- D. The IA must provide a greensheet

Answer: B

Explanation:

Investment advisors (IAs) are required to record the names and addresses of all individuals who have requested and received a preliminary prospectus. This ensures compliance with securities regulations and provides a record for follow-ups and potential disclosures related to the offering.

- * A. The IA must ensure a proxy is mailed: Proxy voting is related to shareholder meetings, not the prospectus distribution.
- * B. The IA must provide a greensheet: A greensheet is used internally by investment firms, not distributed to clients.
- * C. The IA must make a tombstone advertisement: Tombstone advertisements are created by the issuer, not the IA.

Reference:CSC Volume 1, Chapter 12, "Preliminary Prospectus - IA Obligations" explains the compliance requirements during prospectus distribution.

NEW QUESTION # 22

What is the likely outcome at the end of a five-year term of a rate-reset preferred share if the issuer does not redeem the shares?

- A. The shareholder exchanges the rate-reset preferred share for a floating-rate preferred share
- B. The shareholder exchanges the rate-reset preferred share for a specified number of common shares.
- C. The shareholder exchanges the rate-reset preferred share for a fixed-rate preferred share.
- D. The shareholder exchanges the rate-reset preferred share for an unsecured bond

Answer: A

Explanation:

At the end of the five-year term, if the issuer does not redeem the rate-reset preferred shares, the shareholder can choose to:

- * Continue holding the shares at the reset fixed rate.
- * Convert them into floating-rate preferred shares with rates tied to a benchmark (e.g., prime or LIBOR).

This conversion offers flexibility to the shareholder based on market conditions.

- * A. Exchange for a specified number of common shares: Rate-reset preferred shares do not have this feature.
- * B. Exchange for a fixed-rate preferred share: The fixed-rate component is reset, not exchanged.
- * C. Exchange for an unsecured bond: This is not a feature of rate-reset preferred shares.

NEW QUESTION # 23

What is a structured product?

- A. An equity index.
- B. A credit card receivable
- C. A mortgage loan.
- D. A principle-protected note.

Answer: D

Explanation:

A structured product is a pre-packaged investment strategy often involving derivatives and fixed-income securities to offer a combination of protection and growth potential.

* Principal-Protected Note (PPN): A PPN is a common type of structured product that guarantees the return of the original investment (principal) at maturity while offering potential upside linked to the performance of an underlying asset or index.

* Why Other Options Are Incorrect:

- * A. A mortgage loan: This is a form of debt, not a structured product.
- * C. An equity index: An index tracks the performance of a market but is not a structured product itself.
- * D. A credit card receivable: This is a financial asset used in securitization, not a structured product.

:

CSC Volume 2, Chapter 23: Structured products and their features.

NEW QUESTION # 24

What is unique to responsible investment?

- A. It bases investment decisions exclusively on environmental factors.
- B. It is unavailable with certain asset classes like segregated funds
- C. ESG factors are standardized across the investment no industry.
- D. A combination of a values and valuation-based approach to investing

Answer: D

Explanation:

Responsible investing (RI) incorporates environmental, social, and governance (ESG) factors into investment decisions. This approach combines values-based investing (aligning investments with personal or institutional ethics) and valuation-based investing (analyzing ESG factors to assess potential risks and returns).

- * A. It is unavailable with certain asset classes like segregated funds: RI is increasingly available across various asset classes, including segregated funds.
- * B. ESG factors are standardized across the investment industry: ESG standards vary and are not uniformly applied.
- * D. It bases investment decisions exclusively on environmental factors: RI considers environmental, social, and governance factors, not just environmental concerns.

NEW QUESTION # 25

What market condition is typically evident during the late contraction to end of contraction phases?

- A. Interest rates fall
- B. Stock prices fall.
- C. Tight monetary policy
- D. Inverter yield curve.

Answer: A

Explanation:

During the late contraction to the end of contraction phase in the business cycle, the economy typically begins to show early signs of recovery, leading to shifts in monetary policy and interest rate trends. This period is marked by declining interest rates. Here's a breakdown of the conditions evident in this phase:

* Economic Context:

- * As the economy contracts, unemployment may still be relatively high, consumer and business confidence is weak, and production is below potential output. These conditions prompt monetary authorities to adopt accommodative policies.

* The central bank, such as the Bank of Canada, reduces interest rates to stimulate borrowing, investment, and spending, aiding in economic recovery.

* Interest Rate Dynamics:

* Falling interest rates are a hallmark of the late contraction phase. These declines occur as central banks aim to provide economic support and lower the cost of capital.

* Lower interest rates tend to support a recovery in equity markets and encourage investment activity, setting the stage for the next phase of growth.

* Yield Curve Observation:

* During this phase, the yield curve, which may have inverted during earlier contraction stages, starts to steepen. This steepening is indicative of improving economic expectations.

* Elimination of Tight Monetary Policies:

* Tight monetary policies, which involve high interest rates to curb inflation, are generally not present in this phase. Instead, monetary easing is observed.

References to Study Documents:

- * Canadian Securities Course Volume 2, Chapter 13, "Fundamental and Technical Analysis," discusses the business cycle and its implications on market conditions.
- * Volume 1, Chapter 4, "Overview of Economics," explains how interest rates influence the economy and describes their behavior during different phases of the business cycle.

NEW QUESTION # 26
