It is understandable that different people have different preference in terms of AZ-801 study guide. Taking this into consideration, and in order to cater to the different requirements of people from different countries in the international market, we have prepared three kinds of versions of our AZ-801 Preparation questions in this website, namely, PDF version, online engine and software version, and you can choose any one version of AZ-801 exam questions as you like.

The AZ-801 exam is the successor to the previous AZ-103 and AZ-104 exams, and it is part of the new Azure Administrator certification path. Passing AZ-801 exam demonstrates that an individual has the skills required to design, implement, and manage complex hybrid solutions that integrate on-premises and cloud resources. AZ-801 Exam consists of around 40-60 questions and has a time limit of 150 minutes. It is recommended that candidates have at least one year of experience with Azure and Windows Server before attempting AZ-801 exam.

The AZ-801 Exam is intended for IT professionals who have experience working with Windows Server technologies and want to expand their skills into hybrid cloud environments. It is also suitable for IT professionals who are already working with Azure and want to validate their skills in hybrid scenarios.

Microsoft AZ-801 (Configuring Windows Server Hybrid Advanced Services) is a certification exam that is designed to assess the

knowledge and skills of IT professionals who wish to configure and manage advanced Windows Server Hybrid solutions. Configuring Windows Server Hybrid Advanced Services certification exam is intended for individuals who have a thorough understanding of Azure services, Windows Server administration, and networking technologies.

Microsoft Configuring Windows Server Hybrid Advanced Services Sample Questions (Q194-Q199):

NEW QUESTION # 194

You have a server that runs Windows Server.

You plan to back up the server to an Azure Recovery Services vault once per week starting on the next Saturday.

You need to schedule the weekly backup and perform the initial backup as soon as possible.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION # 195

You need to back up Server 4 to meet the technical requirements.

What should you do first?

- A. Configure Windows Server Backup.
- B. Deploy Microsoft Azure Backup Server (MABS).
- C. Configure Storage Replica.
- **D. Install the Microsoft Azure Recovery Services (MARS) agent.**

Answer: D

Explanation:

NEW QUESTION # 196

What is the effective minimum password length for User1 and Admin1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 197

You have a server named Server1 that runs Windows Server.

For Server1, you enable the default App Control for Business policies in audit mode.

You need to ensure that specific third-party applications installed on Server1 are allowed to run by using App Control for Business.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

□

NEW QUESTION # 198

What is the effective minimum password length for User1 and Admin1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Table Description automatically generated

Box 1: 9

When multiple PSOs apply to a user, the PSO with the highest precedence (lowest precedence number) applies which in this case is PSO1.

Box 2: 8

There are no PSOs applied to Admin1 so the password policy from the Default Domain GPO applies.

The Minimum password length setting in GPO1 would only apply to local user accounts on computers in OU1. It does not apply to domain user accounts.

NEW QUESTION # 199
