ServiceNow is a powerful and versatile cloud-based platform that enables organizations to streamline their IT service management processes. It is used by businesses across various industries worldwide to automate workflows, improve collaboration, and enhance service delivery. ServiceNow Certified Application Developer (CAD) is a widely recognized certification that demonstrates an individual's proficiency in developing applications on the ServiceNow platform.

ServiceNow CAD exam is a 90 minute web-based exam that is open-book, meaning that candidates can refer to ServiceNow documentation and materials throughout the test. CAD Exam is competency-based, meaning that it tests a candidate's ability to perform tasks in the ServiceNow platform, rather than simply testing their knowledge of the platform. CAD exam covers ServiceNow's development practices, application architecture, customization, and other key aspects of developing on the ServiceNow platform.

ServiceNow Certified Application Developer-ServiceNow Sample Questions (Q108-Q113):

NEW QUESTION # 108
Here is the Business Rule script template:
This type of JavaScript function is known as:

- A. Constructor
- B. Anonymous
- C. Scoped
- D. Self-invoking

Answer: D

Explanation:
Self-invoking. Learn JavaScript!
This type of JavaScript function is known as self-invoking or immediately-invoked function expression (IIFE). It is a function that is defined and executed at the same time, without being assigned to a variable or being called by another function. It is often used to create a local scope for variables and avoid polluting the global namespace. References: [W3Schools - JavaScript Function Definitions], [MDN Web Docs - Immediately-invoked function expressions]

NEW QUESTION # 109
Which source control operation is available from BOTH Studio and the Git Repository?

- A. Edit Repository Configurations
- B. Apply Remote Changes
- C. Create Branch
- D. Stash Local Changes

Answer: A

Answer: A,B,D

NEW QUESTION # 112
What is the REST API Explorer used to do?

- A. Create sample code for sending REST requests to ServiceNow
- B. Practice using REST to interact with public data providers
- C. Find resources on the web for learning about REST
- D. Convert SOAP Message functions to REST methods

Answer: A

Explanation:
One of the uses of the ServiceNow REST API Explorer is to create sample code for sending REST requests to ServiceNow. The

REST API Explorer is a tool that allows you to discover and test the ServiceNow REST APIs. You can select an API endpoint, set the HTTP method, parameters, headers, and body, and then execute the request. The REST API Explorer will show you the response status, headers, and body, as well as generate sample code for various languages and frameworks, such as cURL, Java, JavaScript, Node.js, Python, Ruby, and more. Reference: [Use the REST API Explorer - Product Documentation: Tokyo - ServiceNow], [Introduction to Scripted REST APIs - ServiceNow Developers]

NEW QUESTION # 113
......

It is similar to the Certified Application Developer-ServiceNow (CAD) desktop-based exam simulation software, but it requires an active internet. No extra plugins or software installations are required to take the Certified Application Developer-ServiceNow (CAD) web-based practice test. Every browser such as Chrome, Mozilla Firefox, MS Edge, Internet Explorer, Safari, and Opera supports this format of CAD mock exam.
