P.S. Free & New FCP\_FGT\_AD-7.6 dumps are available on Google Drive shared by TestSimulate:  
<https://drive.google.com/open?id=15wu7gH4JUtinKr6FY4LevhusVhiOYtzK>

Market is a dynamic place because a number of variables keep changing, so is the practice materials field of the FCP\_FGT\_AD-7.6 practice exam. Our FCP\_FGT\_AD-7.6 exam dumps are indispensable tool to pass it with high quality and low price. Once you decide to buy, you will have many benefits like free update lasting one-year and convenient payment mode. We will inform you immediately once there are latest versions of FCP\_FGT\_AD-7.6 Test Question released. And if you get any questions, please get contact with us, our staff will be online 24/7 to solve your problems all the way.

The software keeps track of the previous FCP - FortiGate 7.6 Administrator (FCP\_FGT\_AD-7.6) practice exam attempts and shows the changes of each attempt. You don't need to wait days or weeks to get your performance report. The software displays the result of the Fortinet FCP\_FGT\_AD-7.6 Practice Test immediately, which is an excellent way to understand which area needs more attention.

**FCP\_FGT\_AD-7.6 Exam Materials: FCP - FortiGate 7.6 Administrator & FCP\_FGT\_AD-7.6 Study Guide Files**

Everybody wants success, but not everyone has a strong mind to persevere in study. If you feel unsatisfied with your present status, our FCP\_FGT\_AD-7.6 actual exam can help you out. Our products always boast a pass rate as high as 99%. Using our FCP\_FGT\_AD-7.6 study materials can also save your time in the exam preparation. If you choose our FCP\_FGT\_AD-7.6 Practice Engine, you are going to get the certification easily. Just make your choice and purchase our FCP\_FGT\_AD-7.6 training quiz and start your study now!

## Fortinet FCP\_FGT\_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.</li> </ul>

## Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q29-Q34):

### NEW QUESTION # 29

Refer to the exhibit.

**Edit Address**

Name: Fortinet

Color: Change

Interface: port2

Type: FQDN

FQDN: www.fortinet.com

Routing configuration:

Comments: Write a comment... 0/255

An administrator has created a new firewall address to use as the destination for a static route.

Why is the administrator not able to select the new address in the Destination field of the new static route?

- A. In the new static route, the administrator must select Named Address.
- B. In the new static route, the administrator must first set the interface to port2.
- C. In the new firewall address, Routing configuration must be enabled.
- D. In the new firewall address, the FQDN address must first be resolved.

**Answer: C**

Explanation:

To use an FQDN-based address object as a destination in a static route, the "Routing configuration" option must be enabled in the firewall address settings. Without this, the address cannot be selected for routing.

**NEW QUESTION # 30**

Refer to the exhibit, which contains a RADIUS server configuration.

An administrator added a configuration for a new RADIUS server. While configuring, the administrator enabled Include in every user group.

What is the impact of enabling Include in every user group in a RADIUS configuration?

- A. This option places the RADIUS server, and all users who can authenticate against that server, into every RADIUS group.
- B. This option places all FortiGate users and groups required to authenticate into the RADIUS server, which, in this case, is FortiAuthenticator.
- C. This option places the RADIUS server, and all users who can authenticate against that server, into every FortiGate user group.
- D. This option places all users into every RADIUS user group, including groups that are used for the LDAP server on FortiGate.

**Answer: C**

Explanation:

Enabling Include in every user group in the RADIUS configuration means the RADIUS server is automatically added to all FortiGate user groups. As a result, any user who can authenticate successfully against that RADIUS server becomes a member of every FortiGate user group, without needing to be manually assigned. This can inadvertently grant excessive access if not carefully controlled.

#### NEW QUESTION # 31

Refer to the exhibit.

FortiGate has two separate firewall policies for Sales and Engineering to access the same web server with the same security profiles. Which action must the administrator perform to consolidate the two policies into one?

- A. Select port1 and port2 subnets in a single firewall policy.
- B. Create an Aggregate interface that includes port1 and port2 to create a single firewall policy.
- C. Enable Multiple Interface Policies to select port1 and port2 in the same firewall policy.
- D. Replace port1 and port2 with the any interface in a single firewall policy.

**Answer: C**

Explanation:

Enabling Multiple Interface Policies allows you to select multiple interfaces (like port1 and port2) in a single firewall policy, consolidating access rules for both Sales and Engineering to the web server.

### NEW QUESTION # 32

Refer to the exhibits.

**System Performance output**

```

# get system performance status
CPU states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
CPU0 states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
CPU1 states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
Memory: 2042076k total, 1837868k used (90%), 104146k free (5.1%), 100062k freeable (4.9%)
Average network usage: 19/2 kbps in 1 minute, 19/4 kbps in 10 minutes, 19/3 kbps in 30 minutes
Maximal network usage: 36/18 kbps in 1 minute, 58/86 kbps in 10 minutes, 58/87 kbps in 30 minutes
Average sessions: 21 sessions in 1 minute, 22 sessions in 10 minutes, 21 sessions in 30 minutes
Maximal sessions: 22 sessions in 1 minute, 28 sessions in 10 minutes, 28 sessions in 30 minutes
Average session setup rate: 0 sessions per second in last 1 minute, 0 sessions per second in last 10 minutes
Maximal session setup rate: 0 sessions per second in last 1 minute, 1 sessions per second in last 10 minutes
Average NPU sessions: 0 sessions in last 1 minute, 0 sessions in last 10 minutes, 0 sessions in last 30 minutes
Maximal NPU sessions: 0 sessions in last 1 minute, 0 sessions in last 10 minutes, 0 sessions in last 30 minutes
Virus caught: 0 total in 1 minute
IPS attacks blocked: 0 total in 1 minute
Uptime: 10 days, 22 hours, 50 minutes

```

**Memory usage threshold settings**

```

config system global
  set memory-use-threshold-extreme 89
  set memory-use-threshold-green 82
  set memory-use-threshold-red 88
end

```

The exhibits show the system performance output and default configuration of high memory usage thresholds on a FortiGate device. Based on the system performance output, what are the two possible outcomes? (Choose two.)

- A. Administrators can access FortiGate only through the console port.
- **B. Administrators can change the configuration.**
- C. FortiGate has entered conserve mode.
- **D. FortiGate drops new sessions.**

**Answer: B,D**

Explanation:

Since memory usage is at 90%, exceeding the red threshold (88%), FortiGate enters a state where configuration changes are still allowed.

In this state, FortiGate drops new sessions to preserve resources and maintain stability.

### NEW QUESTION # 33

You are analyzing connectivity problems caused by intermediate devices blocking traffic in SSL VPN environment.

In which two ways can you effectively resolve the problem? (Choose two.)

- A. You should use IPsec to solve issues with fragment drops and large certificate exchanges.
- **B. You can turn off IKE fragmentation to fix large certificate negotiation problems.**
- **C. You can use SSL VPN tunnel mode to prevent problems with blocked ESP and UDP ports (500 or 4500).**
- D. You can configure a hub-and-spoke topology with SSL VPN tunnels to bypass blocked UDP ports.

**Answer: B,C**

Explanation:

Disabling IKE fragmentation helps resolve issues caused by intermediate devices blocking large fragmented packets during certificate negotiation.

Using SSL VPN tunnel mode encapsulates traffic over HTTPS, bypassing blocks on ESP and UDP ports commonly used by IPsec.

### NEW QUESTION # 34

.....

our FCP\_FGT\_AD-7.6 exam guide has not unequivocal content that may confuse exam candidates. All question points of our FCP\_FGT\_AD-7.6 study quiz can dispel your doubts clearly. Get our FCP\_FGT\_AD-7.6 certification actual exam and just make sure that you fully understand it and study every single question in it by heart. And we believe you will get benefited from it enormously beyond your expectations with the help our FCP\_FGT\_AD-7.6 Learning Materials.
