COF-C02 Exam Dumps Provider - Snowflake First-grade COF-C02 Valid Vce

While making revisions and modifications to the SnowPro Core Certification Exam (COF-C02) practice exam, our team takes reports from over 90,000 professionals worldwide to make the SnowPro Core Certification Exam (COF-C02) exam questions foolproof. To make you capable of preparing for the Snowflake COF-C02 exam smoothly, we provide actual Snowflake COF-C02 exam dumps.

Snowflake SnowPro Core Certification Exam Sample Questions (Q500-Q505):

NEW QUESTION # 500
Which of the following statements are true of Snowflake releases: (Choose two.)

- A. They happen approximately weekly
- B. A customer is assigned a 30 minute window (that can be moved anytime within a week) during which the system will be unavailable and customer is upgraded
- C. During a release, new customer requests/queries/connections transparently move over to the newer version
- D. They roll up and release approximately monthly, but customers can request early release application

Answer: A,C

NEW QUESTION # 501
Which DDL/DML operation is allowed on an inbound data share?

- A. MERGE
- B. ALTER TA3LE
- C. SELECT
- D. INSERT INTO

Answer: C

Explanation:
In Snowflake, an inbound data share refers to the data shared with an account by another account. The only DDL/DML operation allowed on an inbound data share is SELECT. This restriction ensures that the shared data remains read-only for the consuming account, maintaining the integrity and ownership of the data by the sharing account.

NEW QUESTION # 502
Which categories are included in the execution time summary in a Query Profile? (Select TWO).

- A. Pruning
- B. Initialization
- C. Local Disk I/O
- D. Spilling
- E. Percentage of data read from cache

Answer: A,B

Explanation:
In the execution time summary of a Query Profile in Snowflake, the categories included provide insights into various aspects of query execution. "Pruning" refers to the process by which Snowflake reduces the amount of data scanned by eliminating partitions of data that are not relevant to the query, thus improving performance. "Initialization" represents the time taken for query planning and setup before actual execution begins. These metrics are crucial for understanding and optimizing query performance.

NEW QUESTION # 503
In which scenarios would a user have to pay Cloud Services costs? (Select TWO).

- A. Compute Credits = 10 Credits Cloud Services = 9

- B. Compute Credits = 80 Credits Cloud Services = 5
- C. Compute Credits = 200 Credits Cloud Services = 26
- D. Compute Credits = 50 Credits Cloud Services = 10
- E. Compute Credits = 120 Credits Cloud Services = 10

Answer: C,D

Explanation:
In Snowflake, Cloud Services costs are incurred when the Cloud Services usage exceeds 10% of the compute usage (measured in credits). Therefore, scenarios A and E would result in Cloud Services charges because the Cloud Services usage is more than 10% of the compute credits used.

NEW QUESTION # 504
Which activities are included in the Cloud Sen/ices layer? (Select TWO).

- A. User authentication
- B. Dynamic data masking
- C. Infrastructure management
- D. Partition scanning
- E. Data storage

Answer: A,C

Explanation:
The Cloud Services layer in Snowflake includes activities such as user authentication and infrastructure management. This layer coordinates activities across Snowflake, including security enforcement, query compilation and optimization, and more

NEW QUESTION # 505
.....

As long as you face problems with the COF-C02 exam, our company is confident to help you solve. Give our COF-C02 practice quiz a choice is to give you a chance to succeed. We are very willing to go hand in hand with you on the way to preparing for COF-C02 Exam. And we have three different versions of our COF-C02 learning materials, you will find that it is so interesting and funny to study with our study guide.
