Questions HCL-DOM-AADM-12 Exam - HCL-DOM-AADM-12 Valid Dumps Free

Several advantages we now offer for your reference. On the one hand, our HCL-DOM-AADM-12 learning questions engage our working staff in understanding customers' diverse and evolving expectations and incorporate that understanding into our strategies, thus you can 100% trust our HCL-DOM-AADM-12 Exam Engine. On the other hand, the professional HCL-DOM-AADM-12 study materials determine the high pass rate. According to the research statistics, we can confidently tell that 99% candidates have passed the HCL-DOM-AADM-12 exam.

HCL Software Academy HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 Sample Questions (Q56-Q61):

NEW QUESTION # 56

Which two actions can be initiated via the AdminP interface? (Choose two)

- A. Convert Notes documents to PDF
- B. Move mail file to a new server
- C. Enable Smart Upgrade policies
- D. Rename a user across replicas

Answer: B,D

Explanation:

AdminP is designed to automate complex, multi-server tasks. Renaming a user is a primary function, as it requires updating the Directory, ACLs, and Reader/Author fields across the entire domain. Moving a mail file to a new server is another key function; AdminP automates the creation of the new replica, the synchronization of data, and the eventual deletion of the old mail file, while simultaneously updating the user's Person document to point to the new location.

NEW QUESTION # 57

The AdminP task processes its queue from the ____ database.

- A. admin4.nsf
- B. names.nsf
- C. certlog.nsf
- D. mail.box

Answer: A

Explanation:

The Administration Process (AdminP) is an automated system for updating the Domino Directory and managing various server and database tasks throughout a domain. All administrative requests-such as user renames, deletions, or moves-are submitted as "request notes" to the Administration Requests database (admin4.nsf) . The AdminP task on each server monitors this database, identifies tasks it needs to perform, and records the results of those actions back into the same database for the administrator to review.

NEW QUESTION # 58

Which two tasks can an administrator perform from the People & Groups tab of the Domino Administrator Client? (Choose two)

- A. Create groups
- B. View system resource usage
- C. View DAOS objects
- D. Register new users

Answer: A,D

Explanation:

The People & Groups tab is the primary management interface for directory objects in HCL Domino. Administrators use this tab to manage the lifecycle of identities, specifically for registering new users into the Domino Directory and creating groups . Groups are essential for defining mail distribution lists and managing security access levels across the domain. System resource monitoring and DAOS management are typically handled in the Server and Files tabs, respectively.

NEW QUESTION # 59

DAOS uses a catalog database named ____ to track attachment references across NSF files.

- A. daos.nsf
- B. daoslog.nsf
- C. daoscat.nsf
- D. daosrep.nsf

Answer: C

Explanation:

The Domino Attachment and Object Service (DAOS) relies on a specialized database called daoscat.nsf (the DAOS Catalog) to maintain its infrastructure. This catalog tracks every file attachment that has been moved out of an NSF file and into the central DAOS repository. It records the "reference count" for each attachment, ensuring that the system knows exactly which databases are using a specific attachment and preventing the deletion of files that are still in use by one or more users.

NEW QUESTION # 60

Domino uses Sequence numbers and replication history to determine when a database requires replication.

- A. File creation date
- B. Document size in bytes
- C. Sequence numbers and replication history
- D. ACL last modified date

Answer: C

Explanation:

Domino replication is an efficient process that only copies modified data. To achieve this, it uses sequence numbers (which track how many times a document has changed) and the replication history (which logs when two specific replicas last successfully synchronized). By comparing these two elements, the replication task can precisely identify which documents are new or modified since the last update, rather than scanning the entire database or relying on simple file dates.

NEW QUESTION # 61

.....

The privacy protection of users is an eternal issue in the internet age. Many illegal websites will sell users' privacy to third parties, resulting in many buyers are reluctant to believe strange websites. But you don't need to worry about it at all when buying our HCL-DOM-AADM-12 Learning Engine. We assure you that we will never sell users' information on the HCL-DOM-AADM-12 exam questions because it is damaging our own reputation. And we will help you on the HCL-DOM-AADM-12 study materials if you have any question.
