

APMG-International AgilePM-Foundation덤프의 무료샘플을 원하신다면 위의 PDF Version Demo 버튼을 클릭하고 메일 주소를 입력하시면 바로 다운받아 APMG-International AgilePM-Foundation덤프의 일부분 문제를 체험해 보실수 있습니다. APMG-International AgilePM-Foundation 덤프는 모든 시험문제유형을 포함하고 있어 적응율이 아주 높습니다. APMG-International AgilePM-Foundation덤프로 APMG-International AgilePM-Foundation시험패스 GO GO GO !

APMG-International AgilePM-Foundation: Agile Project Management (AgilePM) Foundation Exam은 Agile 프로젝트 관리 방법론에 대한 개인의 이해와 지식을 검증하는 국제적으로 인정받는 인증 프로그램입니다. 이 인증은 개인에게 성공적인 Agile 프로젝트를 관리하고 제공하기 위한 기술과 도구를 제공하기 위해 설계되었습니다.

## 최신 AgilePM AgilePM-Foundation 무료샘플문제 (Q146-Q151):

### 질문 # 146

Which responsibility relates to the role of the Business Ambassador?

- A. Provide the team with strategic direction.
- B. Resolve business issues and make financial decisions
- **C. Responsible for the Business Case and project budget.**
- D. Provide day-to-day detail of the requirements during timeboxes

정답: C

### 질문 # 147

Which competence is NOT required within the Solution Development team?

- A. Technical expertise
- **B. All members to be multi-skilled experts**
- C. Willingness to work with other
- D. Business knowledge

정답: B

### 설명:

Within the Solution Development team, it is not required for all members to be multi-skilled experts<sup>1</sup>. While a diverse set of skills is beneficial, DSDM emphasizes collaboration and the effective use of individual strengths rather than expecting every team member to be an expert in all areas<sup>1</sup>.

### 질문 # 148

Which of the following statements about Scrum Theory is true?

Scrum employs an iterative approach (correcting the typo "interactive" to "iterative" as requested) Decisions should be based on evidence

- A. Only 1 is true
- B. Neither 1 or 2 is true
- **C. Both 1 and 2 are true**
- D. Only 2 is true

정답: C

### 설명:

Comprehensive and Detailed Explanation (concise, policy-compliant):

Scrum rests on empiricism and lean thinking. Empiricism means knowledge comes from experience and evidence, and decisions are made based on what is observed. Scrum implements empiricism through iterative and incremental delivery: short Sprints create frequent opportunities to inspect a usable Increment and adapt the plan based on real results rather than speculation. Iteration reduces risk by enabling rapid learning, early validation of assumptions, and continuous refinement of the Product Backlog. Evidence-based decision-making is reinforced by transparent artifacts (Product Backlog, Sprint Backlog, Increment), a clear Definition of Done, and regular inspection points (Daily Scrum, Sprint Review, Sprint Retrospective). Together, these ensure that planning and prioritization are continuously informed by what has actually been delivered and learned. Therefore, both statements- Scrum is iterative and decisions are evidence-based-are true.

### 질문 # 149

Which of the following is NOT an expectation for a Product increment?

- A. It has been accepted as usable
- B. It is a step towards achieving a Product Goal
- C. It meets the Definition of 'Done'
- **D. It is independent of all other Product Increments**

정답: D

설명:

Agile delivery expects each increment to be usable, meet the agreed quality bar (Definition of Done), and move the product toward its goal. AgilePM's incremental, timeboxed approach stresses that every slice should be demonstrably valuable or verifiable, with acceptance criteria satisfied and quality never compromised. However, increments in an evolving solution are typically additive and cumulative; they build upon prior work to extend capability. Requiring that an increment be independent of all others is unnecessary and often impractical for integrated solutions. What matters is that it is coherent, tested, and acceptable to stakeholders within the agreed standards. Thus, options A, C, and D describe standard expectations for an increment in AgilePM/Scrum-aligned practice, whereas B does not. Therefore, B is the correct 'NOT' choice.

### 질문 # 150

Which of the phases in the AgilePM project lifecycle is optional?

- A. Realization
- **B. Feasibility**
- C. None
- D. Foundations

정답: B

설명:

The AgilePM lifecycle typically includes Pre-Project, Feasibility, Foundations, Evolutionary Development/Realization, Deployment, and Post-Project (benefits). Feasibility is designed as a lightweight, optional phase to confirm there is a sensible case to proceed before deeper investment. In some contexts-when viability is already established, or scope and constraints are straightforward-Feasibility may be skipped or greatly abbreviated, moving directly to Foundations, where the approach, governance, and baselines are established. By contrast, Foundations is expected for alignment and control, and Realization (timeboxed delivery) is where the solution is built; these are not optional if you are proceeding with delivery. Thus, Feasibility is the optional phase.
