NEW QUESTION # 38

What is continuous integration?

- A. The ability to track and evaluate service value
- B. A method of ensuring ultra-scalable systems through operations engineering
- C. Automatically releasing every code change into production
- **D. Regularly merging code into a central repository with automated builds and tests**

Answer: D

Explanation:

Continuous integration is the practice of regularly merging code into a central repository, typically supported by automated builds and tests, so option B is correct. Its purpose is to detect integration issues early, improve quality, and support a smoother flow of changes through the build and transition activities. By integrating frequently, teams reduce the risk and complexity that arise when many changes are combined late. Automated testing and validation are essential because they provide fast feedback and confidence that the new code still works as expected.
