## Oracle Database Administration II Sample Questions (Q269-Q274):

### NEW QUESTION # 269

Which three are true about Recovery Manager (RMAN) in Oracle Database 19c and later releases?

- A. A Virtual Private Catalog used to register a container database must be created in a pluggable database.
- B. A Virtual Private Catalog used to register a container database can be created in a pluggable database.
- C. It is always possible for RMAN to connect to a pluggable database as a target.
- D. It is always possible for RMAN to connect to a pluggable database as a target if any RMAN Catalog is used.
- E. It is only possible for RMAN to connect to a pluggable database as a target if an RMAN Virtual Private Catalog is used.
- F. A Virtual Private Catalog used to register a container database can be created in a non-container database.

Answer: B,D,F

### NEW QUESTION # 270

You plan to create a database by using the Database Configuration Assistant (DBCA), with the following specifications: Applications will connect to the database via a middle tier. The number of concurrent user connections will be high. The database will have mixed workload, with the execution of complex BI queries scheduled at night. Which DBCA option must you choose to create the database?

- A. a default database configuration
- **B. a General Purpose database template, with the shared server mode option and Automatic Memory Management (AMM) enabled**
- C. a General Purpose database template with default memory allocation
- D. a Data Warehouse database template, with the dedicated server mode option and AMM enabled

**Answer: B**

### NEW QUESTION # 271

The USERS tablespace consists of data files 3 and 4 and must always be online in read/write mode. Which two are true about using RMAN to perform an open database backup of this tablespace? (Choose two.)

- **A. The database must be registered in an RMAN catalog.**
- B. Backups must be done incrementally.
- C. Backups can be done incrementally.
- D. Backups must be contained in backup sets.
- **E. Backups can be taken only if the database is in ARCHIVELOG mode.**
- F. Only consistent backups can be created.

**Answer: A,E**

### NEW QUESTION # 272

.Examine the RMAN command: RMAN> CONFIGURE ENCRYPTION FOR DATABASE ON; RMAN> BACKUP DATABASE PLUS ARCHIVELOG; Which prerequisite must be met before accomplishing the backup?

- **A. Oracle wallet for the encryption must be set up.**
- B. Oracle Database Vault must be enabled.
- C. All the tablespaces in the database must be encrypted
- D. The password for the encryption must be set up.

**Answer: A**

### NEW QUESTION # 273

Which two are true about Oracle Flashback features? (Choose two.)

- **A. FLASHBACK DROP can undrop an index when undropping a table.**
- B. FLASHBACK QUERY can retrieve REDO records from ONLINE and ARCHIVED REDO LOG files.
- C. FLASHBACK VERSION QUERY can retrieve REDO records from ONLINE and ARCHIVED REDO LOG files.
- D. FLASHBACK TABLE can undrop a column.
- **E. After a database is restored from flashback logs using the FLASHBACK DATABASE command, it is sometimes rolled forward using redo logs.**

**Answer: A,E**

Explanation:

A & B are wrong, because flashback use undo not redo/archive.

Not C because flashback table cannot revert ddl

D & E are correct -> as of before drop retrieve from the recycle bin also the related index, and after using flashback database command, sometimes you could go forward with redo.
