rapidly changing IT landscape.

Nutanix Certified Professional - Multicloud Automation (NCP-MCA 6.10) Sample Questions (Q35-Q40):

NEW QUESTION # 35
An administrator is tasked with setting up a Policy Engine for a Calm VM.
What information does the administrator require to complete this task?

- A. Networking information for all devices to be managed by the policy engine for Calm.
- B. Every Prism Central Virtual IP address to be managed by the policy engine for Calm.
- C. Private Key of the Calm VX'L For the Scale-Out Calm VMU provide the private key of all VMs.
- D. Public key of the Calm VM. For the Scale-Out Calm VIVI, provide the public key of all VMs,

Answer: A

Explanation:
The policy engine is a single VM setup for the single or scale-out Prism Central. When you enable the policy engine for your Calm instance, a new VM is created and deployed for the policy engine. All you need is an available IP address that belongs to the same network as that of your Prism Central VM for the policy engine VM. You do not need to provide any public or private keys, or any Prism Central virtual IP addresses for this task. References: Nutanix Support & Insights, Calm on ESXi Deployment | Nutanix Community

NEW QUESTION # 36
Which is the correct Macro syntax?

- A. @@[and]@@
- B. @@{and}@@
- C. @@(and)@@
- D. @@{and]@@

Answer: B

Explanation:
The correct macro syntax in Nutanix Calm is @@{and}@@. This syntax is used to reference variables and parameters within blueprints and tasks, allowing for dynamic substitution of values during execution.

* Nutanix Calm documentation on Macro Syntax.
* Nutanix Best Practices for Using Macros.

NEW QUESTION # 37
What is the most optimal way to transfer Playbooks between different Nutanix Cloud Managers (NCM)?

- A. NCM Disaster Recovery
- B. Export and Import
- C. Use Date Lens to migrate.
- D. Recreate the Playbook

Answer: B

Explanation:
According to the Nutanix Support & Insights1, the most optimal way to transfer Playbooks between different Nutanix Cloud Managers (NCM) is to use the Export and Import function. This function allows you to save a copy of your Playbook as a JSON file and then upload it to another NCM instance. This way, you can easily reuse your Playbooks across different environments without having to recreate them from scratch or use other methods that may not be compatible or efficient. NEW QUESTION # 38

An administrator receives the following error while running a script through Calm on VM:

Which two conditions could cause this issue? (Choose two.)

- A. The VM port is not allowed by the firewall.
- B. The VM is still in the boot process.
- C. The credentials have insufficient permissions.
- D. There is an error in the script.

Answer: A,B

NEW QUESTION # 39

Which two groups of operations can a Prism Admin or Super Admin role perform? (Choose two.)

- A. Create, read, update, delete, enable, and run playbooks
- B. Create, read, automate, delete, enable, and run playbooks
- C. Create, read, update, or delete an action template in the action gallery
- D. Create, read, automate, or delete an action template in the action gallery

Answer: A,C

Explanation:
A Prism Admin or Super Admin role can perform the following operations related to X-Play and Nutanix Calm12:
Create, read, update, or delete an action template in the action gallery Create, read, update, delete, enable, and run playbooks
Create, read, update, delete, enable, and run blueprints and runbooks Manage applications and projects Configure endpoints and
plug-ins Access the library and categories Option A is incorrect because the action gallery does not support automation of action
templates. Option C is incorrect because only a Prism Admin or Super Admin role can enable and run playbooks, not a Prism User
role3. Reference:
