

# Actual EXIN CDCS Exam Questions–Key To Success

DOWNLOAD the newest Real4test CDCS PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1D9foyhHblorI\\_jCixS09HmljHmTaE\\_2M](https://drive.google.com/open?id=1D9foyhHblorI_jCixS09HmljHmTaE_2M)

As the feebacks from our worthy customers praised that our CDCS exam braindumps are having a good quality that the content of our CDCS learning quiz is easy to be understood. About some esoteric points, our experts illustrate with examples for you. Our CDCS learning quiz is the accumulation of professional knowledge worthy practicing and remembering, so you will not regret choosing our CDCS study guide.

Our CDCS learning torrent helps you pass the exam in the shortest time and with the least amount of effort. And CDCS guide aaterials have different versions. Besides, CDCS actual exam can strengthen the weaknesses of your study habit in your practicing period. Whether you are an office worker or a student or even a housewife, time is your most important resource. We are a comprehensive service platform aiming at help you to pass CDCS Exams in the shortest time and with the least amount of effort.

## EXIN CDCS Relevant Answers & New CDCS Exam Format

Our CDCS practice materials are high quality and high accuracy rate products. It is all about their superior concreteness and precision that helps. Every page and every points of knowledge have been written from professional experts who are proficient in this line and are being accounting for this line over ten years. Many exam candidates attach great credence to our CDCS practice materials. Our CDCS practice materials do not need any ads, their quality has propaganda effect themselves.

## EXIN CDCS Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Data Centre Life Cycle and Standards: This section of the exam measures the skills of data center professionals and covers the various stages involved in the life cycle of a data center, from planning and design to implementation and decommissioning.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Data Centre Environmental Considerations and Efficiency: This section evaluates the proficiency of data center professionals in addressing environmental factors and promoting efficiency within data center operations. The target audience, including data center managers and engineers, will be tested on their ability to identify and implement measures that enhance energy efficiency, cooling management, and sustainable practices.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Designing and Implementing a Data Centre: In this module, the exam assesses the knowledge of Exin data center professionals tasked with the design and implementation of data centers. Candidates will learn the key principles of creating an efficient data center layout, including considerations for scalability, redundancy, and security.</li> </ul>

## EXIN EPI Certified Data Centre Specialist Sample Questions (Q32-Q37):

### NEW QUESTION # 32

What is the effect of having a damper (in open position) construction in a raised-floor tile?

- A. Dampers allow for a higher supply air temperature
- B. Dampers increase the air volume by approximately 10%
- C. Dampers can be used when there is a high rate of temperature change in the computer room
- D. Dampers reduce the air volume by approximately 10%**

**Answer: D**

Explanation:

Perforated tiles with integrated dampers are common in raised-floor data centers because they allow airflow regulation at the rack level. However, even when the damper is fully open, the mechanism inside the tile restricts airflow. This typically reduces the delivered airflow by around 10% compared to a non-dampened tile of the same type.

\* Option A is incorrect because dampers do not affect supply temperature; they only throttle volume.

\* Option B is wrong since dampers cannot increase volume—they only add resistance.

\* Option D is partially true that dampers help with temperature balancing, but the main effect (in open position) is volume reduction.

Thus, the technical impact of dampers in open position is a slight airflow reduction, usually quantified as ~10%.

References: ASHRAE TC 9.9 - "Airflow Management in Raised-Floor Environments," ANSI/TIA-942-B §6.5 (Cooling Infrastructure).

### NEW QUESTION # 33

The building requires sprinklers and is equipped with a wet-pipe system. What action should you recommend for the computer room?

- A. Replace the wet-pipe system with a dry-pipe system
- B. Maintain the current wet-pipe system
- C. Replace the wet-pipe system with a pre-action system**
- D. Replace the wet-pipe system with a deluge system

**Answer: C**

Explanation:

NFPA 75 (IT equipment rooms) recommends pre-action sprinklers for data processing spaces to minimize accidental water discharge risk; wet-pipe is generally discouraged directly over IT hardware.

References: NFPA 75 §5.4 (Water-based fire protection), NFPA 13 (sprinkler system types).

#### NEW QUESTION # 34

A data center requires an audit to find out whether it conforms with ANSI/TIA-942 Rated-3 (concurrently maintainable). Will the network architecture be part of this audit?

- A. Yes, amongst other aspects, the network architecture should be Rated-3 compliant with the requirements of ANSI/TIA-942.
- B. Yes, but only if the network administration does not comply with ANSI/TIA-606.
- C. No, only the type of cabling used will be audited.
- D. No, as concurrently maintainable only applies to electrical and mechanical (power and cooling).

**Answer: A**

Explanation:

For a Rated-3 data center, network architecture is indeed a key component of the audit under ANSI/TIA-942.

This rating requires concurrent maintainability across all systems, including telecommunications infrastructure. The network architecture must therefore meet specific redundancy and reliability standards to ensure uninterrupted operations during maintenance or failure of any single component.

Detailed Explanation:

Rated-3 requirements extend beyond electrical and mechanical systems to include network architecture. This ensures that telecommunications systems are also designed for concurrent maintainability, thus contributing to overall uptime and resilience.

EPI Data Center Specialist References:

EPI endorses comprehensive assessments for Rated-3 facilities, emphasizing that network systems must meet standards for redundancy and concurrent maintainability, which align with ANSI/TIA-942's holistic approach to data center reliability.

#### NEW QUESTION # 35

When installing a raised floor, can we use a spirit level bar to level the floor?

- A. Yes, spirit level bars can be used as long as their length is longer than 60 cm/2 ft (the size of a typical raised floor tile).
- B. No, because using a spirit level bar, a measurement error will be transferred from pedestal to pedestal.
- C. Yes, using a spirit level bar for raised floors higher than 40 cm is preferred.
- D. Yes, but spirit level bars can only be used in the vertical plane.

**Answer: B**

Explanation:

A spirit level bar should not be used for leveling a raised floor, as measurement errors are likely to propagate from one pedestal to the next. Spirit levels can introduce cumulative errors, leading to uneven floors, particularly in large installations where precise leveling is critical.

Detailed Explanation:

Using a laser level or a precision leveling device is recommended to ensure accuracy across all floor tiles. Spirit levels, while adequate for short spans, can transfer small inaccuracies from one pedestal to another, which can cause alignment issues and floor instability over time.

EPI Data Center Specialist References:

EPI data center guidelines discourage the use of spirit levels for raised floors. Instead, they advocate for precision tools like laser levels that ensure consistency and accuracy in large-scale installations, aligning with best practices for raised floor construction.

#### NEW QUESTION # 36

The computer room has high levels of H<sub>2</sub>S gas contamination. What is the best option to resolve this issue?

- A. Clean the room and racks with a damp/wet cloth.
- B. Provide more air changes per hour by adding more fresh air to the computer room.
- C. Vacuum the whole room using a HEPA/S-Class-based filter.
- D. Install air-scrubbers.

**Answer: D**

Explanation:

High levels of H<sub>2</sub>S (hydrogen sulfide) gas contamination in a computer room are best addressed by installing air-scrubbers. Air-

scrubbers can effectively filter out contaminants, including corrosive gases like H<sub>2</sub>S, ensuring clean air circulation and protecting sensitive IT equipment from potential corrosion and damage.

Detailed Explanation:

Air-scrubbers are designed to remove various airborne contaminants and are particularly useful in environments where corrosive gases are present. These systems use filters or chemical reactions to neutralize harmful substances, making them ideal for data centers that need to maintain high air quality for equipment reliability.

EPI Data Center Specialist References:

EPI guidelines suggest air-scrubbing technologies to remove contaminants that pose risks to electronic equipment, maintaining air quality and reducing corrosion risk.

## NEW QUESTION # 37

.....

For successful preparation, you can also rely on Understanding EXIN EPI Certified Data Centre Specialist CDCS real questions. Visit For More Information: Three Formats of EXIN CDCS Updated Practice Material. The EXIN CDCS practice test is available in three compatible and user-friendly formats. These formats are CDCS desktop practice test software, EXIN CDCS web-based practice exam, and EXIN CDCS PDF dumps file. All three formats of EXIN CDCS study material contain actual and verified Understanding EXIN EPI Certified Data Centre Specialist CDCS exam dumps that will help you boost your exam preparation.
