## 準確的最新C\_BCFIN\_2502試題和資格考試中的領導者和值得信賴的SAP SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions

NewDumps是個為SAP C\_BCFIN\_2502認證考試提供短期有效培訓的網站。SAP C\_BCFIN\_2502 是個能對生活有改變的認證考試。拿到SAP C\_BCFIN\_2502 認證證書的IT人士肯定比沒有拿人員工資高，職位上升空間也很大，在IT行業中職業發展前景也更廣。

### 最新的 SAP Certified Associate C\_BCFIN\_2502 免費考試真題 (Q63-Q68):

#### 問題 #63

Which of the following is a key benefit of SAP Business Suite?

- A. Real-time data sharing
- B. Limited integration
- C. Manual data entry
- D. Batch-based reporting

答案： A

#### 問題 #64

Which solution helps multi-ERP system clients centralize their accounting and reporting system?

- A. SAP Analytics Cloud
- B. SAP Integration Suite
- **C. SAP S/4HANA Cloud for central finance**
- D. SAP Advanced Financial Closing

答案： C

解題說明：

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

Many large enterprises operate in a fragmented IT landscape where multiple ERP systems (both SAP and non- SAP) are used across different subsidiaries or regions. SAP S/4HANA Cloud for central finance is the specific deployment option designed to bridge these gaps without requiring a full-scale migration of all local systems at once. It allows organizations to replicate financial transactions from various source systems into a single, centralized SAP S/4HANA instance in real-time.

By using Central Finance, a company can create a centralized accounting and reporting system that serves as a "Single Source of Truth" for the entire group. This enables centralized processes such as "Central Payments," "Central Credit Management," and "Centralized Reporting." Instead of waiting for period-end extracts from dozens of different systems, the group finance team can see the total financial position of the company at any moment. This significantly simplifies the consolidation process and provides a clear path for digital transformation. It allows the CFO to harmonize data and processes at the corporate level while local entities continue to operate on their existing legacy systems, providing a low-risk, high-value approach to modernizing the finance function.

問題 #65

What are future features with which AI agents are expected to facilitate the Quote to Cash process?

Note: There are 2 correct answers to this question.

- A. Automatically solve dispute cases without supervision.
- **B. Recommend working-capital strategies to treasury.**
- **C. Identify high-risk collections transactions.**
- D. Proactively cut business ties with unreliable customers.

答案： B,C

解題說明：

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

As SAP moves toward "Autonomous Finance," AI agents are expected to evolve from simple automation to proactive decision support within the Quote-to-Cash (Q2C) and Treasury cycles. One key future feature is the ability for AI to identify high-risk collections transactions before they become problematic. By analyzing vast amounts of historical payment behavior, external credit scores, and market trends, AI can flag specific customers or invoices that are likely to result in a dispute or late payment, allowing the collections team to intervene early.

Another advanced capability is the use of AI to recommend working-capital strategies to treasury. In this scenario, the AI agent analyzes the company's current cash position, upcoming payables, and projected receivables to suggest the most efficient use of capital—such as whether to take advantage of early payment discounts or to invest excess liquidity. While AI will significantly assist in solving dispute cases (Option A), doing so "without supervision" is generally not the goal for complex financial disputes, as human oversight remains critical for relationship management. Similarly, cutting ties with customers (Option B) remains a strategic human decision. The value of AI in SAP's roadmap lies in its ability to provide predictive "risk identification" and "strategic recommendations" to enhance human decision-making.

問題 #66

Which essential capabilities are needed to effectively support subscriptions and recurring revenue models in the Quote-to-Cash process?

Note: There are 2 correct answers to this question.

- A. Real-time inventory tracking and management.
- **B. Automated payment collection and handling of receivables.**
- C. Automated proposal generation for potential customers.
- **D. Flexible creation of bundled offerings with varied pricing plans.**

答案： B,D

解題說明：

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

As companies transition from traditional one-time product sales to "As-a-Service" models, the Quote-to-Cash (Q2C) process must evolve to handle significantly higher complexity. Two essential capabilities for this transition are flexible creation of bundled offerings and automated payment collection.

The ability to create bundled offerings is critical because subscription models often involve a mix of physical goods, digital services, and professional maintenance, all with varied pricing plans (e.g., flat fees, usage-based, or tiered pricing). SAP S/4HANA enables the "Monetize" capability, allowing businesses to configure these complex bundles quickly to meet market demand.

Furthermore, because subscription models generate a high volume of frequent, lower-value transactions, automated payment collection and handling of receivables is vital. Manual processing of thousands of monthly subscription payments is impossible at scale. SAP's Q2C solutions automate the entire lifecycle- from recurring billing and credit card processing to the reconciliation of payments and the management of

"dunning" (collection) processes for failed payments. This automation ensures high cash flow predictability and reduces the administrative overhead associated with managing a large-scale recurring revenue stream.

While inventory tracking (A) and proposal generation (C) are relevant to general commerce, they are not the specific "Subscription-enabling" capabilities emphasized in the SAP Financial Management Q2C framework.

#### 問題 #67

What is the primary function of SAP Business Workflow?

- A. To optimize supply chain operations
- B. To manage employee benefits
- C. To enhance customer relationship management
- **D. To automate business processes**

答案： D

#### 問題 #68
