As practice makes perfect, we offer three different formats of H13-511_V5.5 exam study material to practice and prepare for the H13-511_V5.5 exam. Our Huawei H13-511_V5.5 practice test simulates the real HCIA-Cloud Computing V5.5 (H13-511_V5.5) exam and helps applicants kill exam anxiety. These H13-511_V5.5 practice exams provide candidates with an accurate assessment of their readiness for the H13-511_V5.5 test.

Nowadays certificates are more and more important for our job-hunters because they can prove that you are skillful to do the jobs in the certain areas and you boost excellent working abilities. Passing the test of H13-511_V5.5 certification can help you find a better job and get a higher salary. With this target, we will provide the best H13-511_V5.5 Exam Torrent to the client and help the client pass the exam easily if you buy our product.

Quiz 2026 Newest H13-511_V5.5: HCIA-Cloud Computing V5.5 Test Simulator Fee

The H13-511_V5.5 study materials from our company are very convenient for all people, including the convenient buying process,

the download way and the study process and so on. Upon completion of your payment, you will receive the email from us in several minutes, and then you will have the right to use the H13-511_V5.5 Study Materials from our company. In addition, there are three different versions for all people to choose. According to your actual situation, you can choose the suitable version from our H13-511_V5.5 study materials.

Huawei H13-511_V5.5 Exam Syllabus Topics:

Topic	Details
Topic 1	Describe what cloud computing is: This topic covers the fundamental definition and concept of cloud computing technology. It explains how cloud computing enables on-demand access to shared computing resources over the internet.
Topic 2	Describe the history of cloud computing: This section traces the evolution and development of cloud computing from its origins to its current state. It provides historical context for how cloud technology emerged and transformed over time.
Topic 3	Understand the differences between virtualization and cloud computing: This section clarifies how virtualization and cloud computing are related yet distinct technologies. It explains that virtualization is a key enabler of cloud computing but cloud encompasses broader service delivery models and characteristics.
Topic 4	Describe the characteristics of cloud computing: This section explains the essential attributes and defining features of cloud computing such as on-demand self-service, broad network access, and resource pooling. It outlines what distinguishes cloud computing from traditional computing models.
Topic 5	Be able to describe what virtualization is: This topic covers the concept of virtualization technology and how it enables multiple virtual instances to run on physical hardware. It explains the foundational role virtualization plays in creating isolated computing environments.

Huawei HCIA-Cloud Computing V5.5 Sample Questions (Q105-Q110):

NEW QUESTION # 105

Which of the following statements are true about deploying Compute Node Agent (CNA) and Virtual Resource Management (VRM) in Huawei FusionCompute?

- A. CNA can be deployed on virtual machines or physical servers.
- B. If the VRM nodes are deployed on virtual machines, you need to select two hosts in the management cluster and deploy the active and standby VRM VMs on these hosts.
- C. If the VRM nodes are deployed on physical servers, the active and standby VRM nodes must be deployed on two physical servers.
- D. VRM can be deployed on virtual machines or physical servers.

Answer: B,C,D

Explanation:

In FusionCompute architecture, CNA and VRM have clearly defined deployment models.

Option A is false. CNA is deployed only on physical servers (compute nodes). It is responsible for interacting directly with hardware resources and cannot run inside a VM.

Option B is true. When VRM is deployed on physical servers, active and standby VRM nodes must be installed on separate physical servers to ensure high availability.

Option C is true. When VRM is deployed on virtual machines, the active and standby VRM VMs must be placed on different hosts within the management cluster to avoid single points of failure.

Option D is true. VRM supports deployment on either physical servers or virtual machines, providing flexible management options. Therefore, the correct answers are B, C, and D.

NEW QUESTION # 106

Which of the following devices can provide the network address translation function?

- A. layer to switch
- B. layer three switch
- C. firewall
- D. router

Answer: B,C,D

NEW QUESTION # 107

Artificial intelligence is a new technical science that studies and develops theories, methods, technologies and application systems used to simulate and expand artificial intelligence. Which of the following statements about artificial intelligence is wrong?

- A. AI is an unconscious mechanical physical process
- B. AI is not social
- C. Artificial intelligence does not have the active creativity that human consciousness possesses
- D. Artificial intelligence is a technology in which items are connected to each other through the network for information interaction

Answer: D

NEW QUESTION # 108

The DVS in FusionCompute supports SRIOV pass-through mode. Which of the following descriptions about this feature are correct? (Multiple choice)

- A. It can accelerate the forwarding performance of the physical network-card
- B. Satisfy business requirements with high bandwidth requirements such as web video on demand
- C. Reduce the I/O overhead of the software simulation layer
- D. Does not affect the virtual machine migration function

Answer: A,B,C

NEW QUESTION # 109

The port configuration of a Huawei switch is as follows: `interface GigabitEthernet 1/0/24` `port link-type access` `port default vlan 16` According to the above configuration, which of the following description is correct?

- A. The port will strip off the vlan16 label in the passing data frame and forward it
- B. The port will not perform any operations on the passing data
- C. This port will add a Vlan16 tag to the data frame that will pass through
- D. This port only allows data frames containing Vlan16 tags to pass through

Answer: A

NEW QUESTION # 110

.....

With these mock exams, it is easy to track your progress by monitoring your marks each time you go through the H13-511_V5.5 practice test. Our H13-511_V5.5 practice exams will give you an experience of attempting the H13-511_V5.5 original examination. You will be able to deal with the actual exam pressure better when you have already experienced it in our Huawei H13-511_V5.5 practice exams.
