Isn't it a good way to make full use of fragmentary time?

Fortinet FCP_FAZ_AN-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Log Analysis: This domain focuses on examining and interpreting logs, events, and incidents, using FortiView dashboards and widgets for data visualization, and diagnosing report generation issues.
Topic 2	<ul style="list-style-type: none">Reports: This domain explains the use of reports, charts, and datasets for presenting security intelligence, covers report configuration to meet organizational requirements, and includes troubleshooting report generation problems.

Topic 3	<ul style="list-style-type: none"> • Features and concepts: This domain covers FortiAnalyzer's integration with Security Fabric for log collection, the technical processes of log data flow, normalization and parsing, and the SOC features available for security monitoring and analysis.
Topic 4	<ul style="list-style-type: none"> • SOC operation and automation: This domain addresses configuring events and event handlers, setting up incidents and indicators for threat tracking, configuring playbooks and fabric automation for orchestrated responses, and troubleshooting automation workflow issues.

Fortinet FCP - FortiAnalyzer 7.6 Analyst Sample Questions (Q10-Q15):

NEW QUESTION # 10

Which two statements about playbook execution are true? (Choose two)

- A. Even if the playbook status is Failed, individual tasks may have succeeded.
- B. FortiAnalyzer will not commit changes made by a Failed playbook
- C. The Playbook Monitor provides troubleshooting logs
- D. You can turn the default debugging playbook to investigate playbook errors.

Answer: B,C

NEW QUESTION # 11

You want to design a playbook that runs a series of tasks in parallel. How can you accomplish this goal?

- A. Queue the same playbook to run multiple times
- B. Set up multiple connectors
- C. Create multiple triggers and link one task to each trigger
- D. Connect a trigger or task to multiple tasks.

Answer: D

Explanation:

In FortiAnalyzer playbooks, parallel execution is achieved by branching. When you connect one trigger or task to multiple subsequent tasks, those tasks run in parallel rather than sequentially.

NEW QUESTION # 12

An administrator on your team has configured multiple reports to run periodically. Management has an additional request that all new generated reports be sent to a company email inbox for accessibility. The mail server has already been configured on FortiAnalyzer. Which item must be configured on FortiAnalyzer so that emails are sent when the reports are generated?

- A. Enable the option to email all reports under the mail server.
- B. Add a mailto:<email address> option within the report layouts.
- C. Enable email notification under the report calendar.
- D. Enable an output profile on the reports.

Answer: D

Explanation:

To ensure that reports generated by FortiAnalyzer are automatically sent to an email inbox, you need to set up an output profile for the reports. Output profiles specify where and how reports should be delivered, including the option to send them via email.

Option D - Enable an Output Profile on the Reports:

An output profile can be configured on FortiAnalyzer to define delivery options, including emailing the report to specified recipients. This setup ensures that every time a report is generated according to the schedule, it is automatically emailed to the configured address.

NEW QUESTION # 13

Which two methods can you use to send notifications when an event occurs that matches a configured event handler? (Choose two.)

- **A. Send Alert through Fabric Connectors**
- B. Send SMS notification
- C. Send Alert through FortiSIEM MEA
- **D. Send SNMP trap**

Answer: A,D

Explanation:

Send Alert through Fabric Connectors: This method involves creating a Fabric Connector profile and selecting the option "Send Alert through Fabric Connectors" in the event handler notification settings. Notifications are then sent in JSON format to the configured endpoint, such as Microsoft Teams or other integrated platforms.

Send SNMP trap: You can configure SNMP traps to be sent when an event triggers an incident.

This involves setting the SNMP Trap IP address, community string, trap type, and protocol in the system's analytics or incident settings.

NEW QUESTION # 14

You are tasked with finding logs corresponding to a suspected attack on your network. You need to use an interface where all identified threats within timeframe are listed and organized. You also need to be able to quickly export the information to a PDF file. Where can you go to accomplish this task?

- **A. FortiView**
- B. Log Browse
- C. Log View
- D. Fabric View

Answer: A

Explanation:

FortiView is a comprehensive monitoring system on FortiAnalyzer that integrates real-time and historical data into a single view, including threats. It provides intuitive summary dashboards listing top threats, sources, destinations, and more, all filterable by timeframe and other criteria.

FortiView allows drill-down into detailed threat information and supports exporting data and reports, including to PDF format, facilitating quick sharing and analysis.
