## ISA/IEC 62443 Cybersecurity Fundamentals Specialist Sample Questions (Q180-Q185):

### NEW QUESTION # 180

What programs are MOST effective if they are tailored to the audience, consistent with company policy, and communicated regularly?

- A. CSMS development
- **B. Cybersecurity awareness programs**
- C. Control systems adjustment programs
- D. ISCS cybersecurity certification programs

**Answer: B**

Explanation:

Cybersecurity awareness programs are critical for ensuring that all personnel understand and follow security practices. To be effective, these programs must be:

Tailored to roles and responsibilities

Aligned with company policies

Communicated regularly and reinforced

"An effective cybersecurity awareness program is audience-specific, policy-aligned, and continuously reinforced to ensure long-term behavioral change."

- ISA/IEC 62443-2-1:2010, Clause 4.3.3 - Security Training and Awareness These programs are part of the organization's security governance and are essential for building a security- focused culture.

### NEW QUESTION # 181

Which of the following BEST describes a control system?

- A. Measures taken to protect against unauthorized access
- B. Actions to prevent loss of revenue
- C. Unauthorized modifications to data
- **D. Hardware and software components of an IACS**

**Answer: D**

Explanation:

A control system, particularly in the context of IACS, is defined as a collection of hardware and software components used to monitor and control industrial processes. This includes PLCs, RTUs, SCADA software, HMIs, and communication networks.

"Control system: A set of hardware and software components that work together to monitor and control industrial or process operations."

- ISA/IEC 62443-1-1:2007, Clause 3.3.5 - Terminology

While the other options describe security functions or consequences, only Option C accurately describes what a control system is.

### NEW QUESTION # 182

Which statement BEST describes the Target Security Protection Ratings?

- A. They represent the actual security levels achieved at a time during operation.
- B. They define the levels of security requirements fulfilled through implementation measures.
- C. They measure the cost-effectiveness of security investments or implementation measures.
- **D. They outline the desired levels of system security requirements to be fulfilled during operation.**

**Answer: D**

Explanation:

In ISA/IEC 62443, Target Security Protection Ratings correspond to the concept of Target Security Levels (SL-T).

Step 1: Definition of target ratings

Target ratings describe the desired level of protection that a system or zone must achieve during operation, based on risk assessment.

Step 2: Difference between target and achieved

\* Target ratings define what is required.

\* Achieved ratings (SL-A) describe what has actually been implemented and verified.

Step 3: Why Option D is correct

The target rating outlines the intended security outcome that implementation measures must fulfill during operation, not what currently exists.

Step 4: Why other options are incorrect

Actual achieved levels, cost metrics, or implementation measurements are separate concepts.

Therefore, the correct description is that they outline the desired levels of system security requirements to be fulfilled during

operation.

### NEW QUESTION # 183

Which of the following is the BEST reason for periodic audits?

Available Choices (select all choices that are correct)

- A. To confirm audit procedures
- B. To adhere to a published or approved schedule
- C. To meet regulations
- D. To validate that security policies and procedures are performing

**Answer: D**

Explanation:

Periodic audits are an essential part of the ISA/IEC 62443 cybersecurity standards, as they help to verify the effectiveness and compliance of the security program. According to the ISA/IEC 62443-2-1 standard, periodic audits should be conducted to evaluate the following aspects1:

- \* The security policies and procedures are consistent with the security requirements and objectives of the organization
  - \* The security policies and procedures are implemented and enforced in accordance with the security program
  - \* The security policies and procedures are reviewed and updated regularly to reflect changes in the threat landscape, the IACS environment, and the business needs
  - \* The security performance indicators and metrics are measured and reported to the relevant stakeholders
  - \* The security incidents and vulnerabilities are identified, analyzed, and resolved in a timely manner
  - \* The security awareness and training programs are effective and aligned with the security roles and responsibilities of the personnel
  - \* The security audits and assessments are conducted by qualified and independent auditors
  - \* The security audit and assessment results are documented and communicated to the appropriate parties
  - \* The security audit and assessment findings and recommendations are addressed and implemented in a prioritized and systematic way
- Periodic audits are not only a means to meet regulations or adhere to a schedule, but also a way to validate that the security policies and procedures are performing as intended and achieving the desired security outcomes. Periodic audits also help to identify gaps and weaknesses in the security program and provide opportunities for improvement and enhancement.
