It is also an excellent way to validate and enhance one's professional skills and knowledge, and to stay up-to-date with the latest trends and best practices in data analysis.

Tableau Certified Data Analyst Sample Questions (Q85-Q90):

NEW QUESTION # 85

You are the owner of an alert.

You receive an email notification that the alert was suspended

From where can you resume the suspended alert?

- A. The Notification area of Tableau Prep
- B. The Data Source page of Tableau Desktop
- C. The Shared with Me page
- **D. The My Content area of Tableau web pages**

Answer: D

Explanation:

To resume a suspended alert, you need to go to the My Content area of Tableau web pages, where you can see all the alerts that you own or subscribe to. You can click on the alert name and then select Resume from the menu. You can also edit or delete the alert from there. Reference: <https://help.tableau.com/current/pro/desktop/en-us/alerts.htm>

https://help.tableau.com/current/pro/desktop/en-us/alerts_manage.htm

NEW QUESTION # 86

Open the link to Book1 found on the desktop. Open the Line worksheet.

Modify the chart to show only min and max values of both measures in each region.

Answer:

Explanation:

To modify the chart to show only min and max values of both measures in each region, you need to do the following steps:

Open the link to Book1 found on the desktop. This will open the Tableau workbook that contains the Line worksheet.

Click on the Line tab at the bottom of the workbook to open the worksheet. You will see a line chart that shows the sales and profit for each month by region.

Drag Month from the Columns shelf to Filters shelf. This will open a dialog box that allows you to filter by different criteria.

Select Range of Dates from the dialog box. This will show you options to filter by a range of dates or values.

Select Minimum and Maximum from the drop-down list next to Month. This will filter by the minimum and maximum values of Month for each region. You can also enter specific values or use the sliders to adjust the range.

Click OK to apply the filter. You will see that the line chart now shows only min and max values of both measures in each region.

NEW QUESTION # 87

You have a Tableau workbook.

You want to make the workbook available in Tableau Online.

What should you do?

- A. From the File menu, select Export Packaged Workbook.
- B. From the Server menu, select Publish Data Source.
- **C. From the Server menu, select Publish Workbook.**
- D. From the Server menu, select Tableau Public, and then select Save to Tableau Public.

Answer: C

Explanation:

To make a workbook available in Tableau Online, you need to publish it from Tableau Desktop to Tableau Online. You can do this by selecting Publish Workbook from the Server menu, signing in to your Tableau Online account, choosing a project and a name for your workbook, and clicking Publish. This will upload your workbook and its data sources to Tableau Online, where you can view, edit, and share it with others. References:

Publish a Workbook

NEW QUESTION # 88

You have a sales dataset that contains the following fields.

You need to analyze the average revenue per product in different regions over time. Which two fields should be measures? Choose two.

- A. Order Date
- **B. Quantity**
- **C. Revenue**
- D. Customer Region
- E. Product Name

Answer: B,C

Explanation:

To analyze the average revenue per product in different regions over time, you need to use two fields that contain numeric, quantitative values that you can measure and aggregate. Quantity and Revenue are both measures that fit this criterion. You can multiply Quantity and Revenue to get the total sales for each product, and then divide by the number of products to get the average revenue. You can also use these measures to create charts and tables that show the trends and comparisons over time and across regions. References:

NEW QUESTION # 89

You have a table that contains the following data.

How should you complete the formula? (Drag the appropriate Options to the Answer Area and drop into the correct locations.)

Answer:

Explanation:

Explanation:

To complete the formula, you should drag the option MAX from the list of options and drop it into the first blank space, and then drag the option [Sales] and drop it into the second blank space. The formula will look like this: Option (MAX) Option ([Sales]). This formula will calculate the maximum value of the sales field for each country. You can use this formula to create a calculated field that will show the highest sales amount for each country in your data source. References:
