## 2026 Reliable Study ISO-IEC-27001-Foundation Demo Help You Pass ISO-IEC-27001-Foundation Easily

If you buy ISO-IEC-27001-Foundation exam material, things will become completely different. ISO/IEC 27001 (2022) Foundation Exam study questions will provide you with very flexible learning time. Unlike other learning materials on the market, ISO-IEC-27001-Foundation exam guide has an APP version. You can download our app on your mobile phone. And then, you can learn anytime, anywhere. Whatever where you are, whatever what time it is, just an electronic device, you can practice. With ISO/IEC 27001 (2022) Foundation Exam study questions, you no longer have to put down the important tasks at hand in order to get to class; with ISO-IEC-27001-Foundation Exam Guide, you don't have to give up an appointment for study. Our study materials can help you to solve all the problems encountered in the learning process, so that you can easily pass the exam.

### APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q42-Q47):

#### NEW QUESTION # 42

Which statement about the conduct of audits is true?

- A. The certificate issued after a successful re-certification audit in typical schemes lasts for one year
- B. During Stage 1 of a certification audit, evidence is collected by observing activities
- **C. One of the focus areas for a surveillance audit is the output from internal audits and management reviews**
- D. Third party audits are conducted by a customer of the organization

#### Answer: C

Explanation:

Clause 9.2 (Internal Audit) and Clause 9.3 (Management Review) highlight that audit outputs and management reviews are key inputs for evaluating ISMS performance. Surveillance audits, conducted by Certification Bodies, check ongoing compliance and effectiveness. ISO certification schemes (per ISO/IEC

17021) require surveillance audits to verify whether corrective actions and continuous improvements are being made. A critical focus area is the results of internal audits and management reviews, ensuring that the organization maintains its ISMS between certification cycles.

Option A is incorrect - third-party audits are performed by independent Certification Bodies, not customers.

Option B is incorrect - certificates are typically valid for three years with annual surveillance. Option D is incorrect - Stage 1 is primarily documentation and readiness review, not evidence observation.

Therefore, the verified correct answer is C.

#### NEW QUESTION # 43

Which item is required to be included in an information security policy?

- **A. A commitment to satisfy applicable requirements related to information security**
- B. A framework enabling concerns with the information security policy to be addressed
- C. A plan for the continual improvement of the information security management system
- D. A Statement of Applicability which defines the necessary controls to be implemented

#### Answer: A

Explanation:

Clause 5.2 (Information security policy) requires that the policy:

- \* "includes information security objectives (or provides a framework for setting them)"
- \* "includes a commitment to satisfy applicable requirements related to information security"
- \* "includes a commitment to continual improvement of the ISMS."

Among the listed options, the exact mandatory requirement is "a commitment to satisfy applicable requirements related to information security". Option B partially reflects Clause 5.2 (commitment to continual improvement), but the wording given in the standard prioritizes the satisfaction of applicable requirements (e.g., legal, regulatory, contractual). Option C is not a policy requirement. Option D (Statement of Applicability) is a separate mandatory document (Clause 6.1.3) and not part of the policy itself. Thus, the correct answer is A.

#### NEW QUESTION # 44

Which item is required to be defined when planning the organization's risk assessment process?

- A. How the effectiveness of the method will be measured
- **B. The criteria for acceptable levels of risk**
- C. There are NO specific information requirements
- D. The parts of the ISMS scope which are excluded from the risk assessment

**Answer: B**

Explanation:

Clause 6.1.2 (Information security risk assessment) requires organizations to "define and apply an information security risk assessment process that... establishes and maintains information security risk criteria, including criteria for accepting risk." This means that acceptable levels of risk (risk acceptance criteria) must be explicitly defined. These criteria ensure consistent decision-making when evaluating whether identified risks need further treatment or can be tolerated.

Option A is incorrect because exclusions relate to the ISMS scope (Clause 4.3), not risk assessment planning.

Option B is not a requirement; effectiveness of risk assessment methods is not required to be measured, though methods must be applied consistently. Option D is false-the standard clearly specifies required elements for risk assessment.

Thus, the correct answer is C: The criteria for acceptable levels of risk.

#### NEW QUESTION # 45

Which statement is a factor that will influence the implementation of the information security management system?

- A. The ISMS will be separate from the organization's overall management structure
- B. The ISMS will be operated as an independent process within the organization
- **C. The ISMS will be scaled to the controls according to the needs of the organization**
- D. The ISMS will encompass all controls specified within ISO/IEC 27001

**Answer: C**

Explanation:

ISO/IEC 27001 makes clear that the ISMS is intended to be tailored to the organization. The standard states: "This document also includes requirements for the assessment and treatment of information security risks tailored to the needs of the organization. The requirements set out in this document are generic and are intended to be applicable to all organizations regardless of type, size or nature." This means implementation is scaled based on each organization's risk, context, and needs, not a fixed one-size-fits-all set of activities or controls. Clause 6.1.3 further reinforces that control selection is flexible and risk-driven: "Organizations can design controls as required or identify them from any source," and "Annex A contains a list of possible information security controls... The information security controls listed in Annex A are not exhaustive and additional information security controls can be included if needed." Together, these extracts verify that the ISMS implementation is influenced by and scaled to the organization's needs and selected controls, not separated from management processes (A, D) nor mandated to include "all controls" (B).

#### NEW QUESTION # 46

Which statement describes the control for the Compliance with policies, rules and standards for information security within Annex A of ISO/IEC 27001?

- A. Regular review of contractual compliance
- **B. Regular review of compliance**

- C. Maintain contact with legal authorities
- D. Return assets to their legal owners

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.36 (Compliance with policies, rules and standards for information security) requires:

"Compliance with the organization's information security policies, rules and standards for information security should be regularly reviewed." This directly matches option A. Option B refers to contractual compliance, which is part of supplier management controls (Annex A.5.19). Option C relates to Annex A.5.7 (Contact with authorities). Option D refers to asset return controls (Annex A.5.9).

Thus, the correct answer is A.

**NEW QUESTION # 47**

.....

This offline software works only on Windows computers and laptops. ItPass4sure also offers up to 1 year of free updates, if for instance, the sections of real ISO/IEC 27001 (2022) Foundation Exam examination changes after your purchase of the ISO-IEC-27001-Foundation practice test material. So just download actual ISO-IEC-27001-Foundation Exam Questions and start your journey today. It ensures that you would qualify for the APMG-International ISO-IEC-27001-Foundation certification exam on the maiden strive with brilliant grades.
