

# Detail Databricks-Certified-Data-Analyst-Associate Explanation & Databricks-Certified-Data-Analyst-Associate Cert Exam

## Purpose of this Exam Guide

The purpose of this exam guide is to give you an overview of the exam and what is covered on the exam to help you determine your exam readiness. This document will get updated anytime there are any changes to an exam (and when those changes will take effect on an exam) so that you can be prepared. **This version covers the currently live version as of January 1, 2024. Please check back two weeks before you take your exam to make sure you have the most current version.**

## Audience Description

The Databricks Certified Data Analyst Associate certification exam assesses an individual's ability to use the Databricks SQL service to complete introductory data analysis tasks. This includes an understanding of the Databricks SQL service and its capabilities, an ability to manage data with Databricks tools following best practices, using SQL to complete data tasks in the Lakehouse, creating production-grade data visualizations and dashboards, and developing analytics applications to solve common data analytics problems. Individuals who pass this certification exam can be expected to complete basic data analysis tasks using Databricks SQL and its associated capabilities.

## About the Exam

- Number of items: 45 multiple-choice questions
- Time Limit: 90 minutes
- Registration fee: USD 200, plus applicable taxes as required per local law
- Delivery method: Online Proctored
- Test aides: none allowed.
- Prerequisite: None required; course attendance and six months of hands-on experience in Databricks is highly recommended
- Validity: 2 years
- Recertification: Recertification is required to maintain your certification status. To recertify, you must take the full exam.
- Unsourced Content: Exams may include unsourced items to gather statistical information for future use. These items are not identified on the form and do not impact your score, and additional time is factored into account for this content.

Even in a globalized market, the learning material of similar Databricks-Certified-Data-Analyst-Associate doesn't have much of a share, nor does it have a high reputation or popularity. In this dynamic and competitive market, the Databricks-Certified-Data-Analyst-Associate learning questions can be said to be leading and have absolute advantages. In order to facilitate the user real-time detection of the learning process, we Databricks-Certified-Data-Analyst-Associate Exam Material provided by the questions and answers are all in the past. It is closely associated, as our experts in constantly update products every day to ensure the accuracy of the problem, so all Databricks-Certified-Data-Analyst-Associate practice materials are high accuracy.

With the best quality of Databricks-Certified-Data-Analyst-Associate braindumps pdf from our website, getting certified will be easier and fast. For the preparation of the certification exam, all you have to do is choose the most reliable Databricks-Certified-Data-Analyst-Associate real questions and follow our latest study guide. You can completely rest assured that our Databricks-Certified-Data-Analyst-Associate Dumps Collection will ensure you get high mark in the formal test. You will get lots of knowledge from our website.

## Spend Your Little Time and Energy to Clear Databricks Databricks-Certified-Data-Analyst-Associate exam easily

More successful cases of passing the Databricks-Certified-Data-Analyst-Associate exam can be found and can prove our powerful strength. As a matter of fact, since the establishment, we have won wonderful feedback and ceaseless business, continuously working on developing our Databricks-Certified-Data-Analyst-Associate test prep. We have been specializing Databricks-Certified-Data-Analyst-Associate Exam Dumps many years and have a great deal of long-term old clients, and we would like to be a reliable cooperater on your learning path and in your further development. We will be your best friend to help you pass the Databricks-Certified-Data-Analyst-Associate exam and get certification.

### Databricks Certified Data Analyst Associate Exam Sample Questions (Q54-Q59):

#### NEW QUESTION # 54

Which of the following benefits of using Databricks SQL is provided by Data Explorer?

- A. It can be used to run UPDATE queries to update any tables in a database.
- B. It can be used to make visualizations that can be shared with stakeholders.
- C. It can be used to connect to third party BI tools.
- D. It can be used to produce dashboards that allow data exploration.
- E. It can be used to view metadata and data, as well as view/change permissions.

**Answer: E**

Explanation:

Data Explorer is a user interface that allows you to discover and manage data, schemas, tables, models, and permissions in Databricks SQL. You can use Data Explorer to view schema details, preview sample data, and see table and model details and properties. Administrators can view and change owners, and admins and data object owners can grant and revoke permissions<sup>1</sup>.

Reference: Discover and manage data using Data Explorer

#### NEW QUESTION # 55

A data analyst needs to share a Databricks SQL dashboard with stakeholders that are not permitted to have accounts in the Databricks deployment. The stakeholders need to be notified every time the dashboard is refreshed.

Which approach can the data analyst use to accomplish this task with minimal effort/

- A. By downloading the dashboard as a PDF and emailing it to the stakeholders each time it is refreshed
- B. By granting the stakeholders' email addresses to the SQL Warehouse (formerly known as endpoint) subscribers list
- C. By adding the stakeholders' email addresses to the refresh schedule subscribers list
- D. By granting the stakeholders' email addresses permissions to the dashboard

**Answer: C**

Explanation:

To share a Databricks SQL dashboard with stakeholders who do not have accounts in the Databricks deployment and ensure they are notified upon each refresh, the data analyst can add the stakeholders' email addresses to the dashboard's refresh schedule subscribers list. This approach allows the stakeholders to receive email notifications containing the latest dashboard updates without requiring them to have direct access to the Databricks workspace. This method is efficient and minimizes effort, as it automates the notification process and ensures stakeholders remain informed of the most recent data insights.

#### NEW QUESTION # 56

A data analyst needs to use the Databricks Lakehouse Platform to quickly create SQL queries and data visualizations. It is a requirement that the compute resources in the platform can be made serverless, and it is expected that data visualizations can be placed within a dashboard.

Which of the following Databricks Lakehouse Platform services/capabilities meets all of these requirements?

- A. Tableau
- B. Databricks Notebooks
- C. Databricks Machine Learning

- D. Databricks SQL
- E. Delta Lake

**Answer: D**

Explanation:

Databricks SQL is a serverless data warehouse on the Lakehouse that lets you run all of your SQL and BI applications at scale with your tools of choice, all at a fraction of the cost of traditional cloud data warehouses<sup>1</sup>. Databricks SQL allows you to create SQL queries and data visualizations using the SQL Analytics UI or the Databricks SQL CLI<sup>2</sup>. You can also place your data visualizations within a dashboard and share it with other users in your organization<sup>3</sup>. Databricks SQL is powered by Delta Lake, which provides reliability, performance, and governance for your data lake<sup>4</sup>. Reference:

Query data using SQL Analytics

Visualizations in Databricks notebooks

Delta Lake

### NEW QUESTION # 57

What describes Partner Connect in Databricks?

- A. it allows for free use of Databricks partner tools through a common API.
- B. It is a feature that runs Databricks partner tools on a Databricks SQL Warehouse (formerly known as a SQL endpoint).
- C. it allows multi-directional connection between Databricks and Databricks partners easier.
- D. It exposes connection information to third-party tools via Databricks partners.

**Answer: C**

Explanation:

Databricks Partner Connect is designed to simplify and streamline the integration between Databricks and its technology partners. It provides a unified interface within the Databricks platform that facilitates the discovery and connection to a variety of data, analytics, and AI tools. By automating the configuration of necessary resources such as clusters, tokens, and connection files, Partner Connect enables seamless, bi-directional data flow between Databricks and partner solutions. This integration enhances the overall functionality of the Databricks Lakehouse by allowing users to easily incorporate external tools and services into their workflows, thereby expanding the platform's capabilities and fostering a more cohesive data

ecosystem.[https://www.databricks.com/blog/2021/11/18/now-generally-available-introducing-databricks-partner-connect-to-discover-and-connect-popular-data-and-ai-tools-to-the-lakehouse?utm\\_source=chatgpt.com](https://www.databricks.com/blog/2021/11/18/now-generally-available-introducing-databricks-partner-connect-to-discover-and-connect-popular-data-and-ai-tools-to-the-lakehouse?utm_source=chatgpt.com)

### NEW QUESTION # 58

A data analyst has created a Query in Databricks SQL, and now they want to create two data visualizations from that Query and add both of those data visualizations to the same Databricks SQL Dashboard.

Which of the following steps will they need to take when creating and adding both data visualizations to the Databricks SQL Dashboard?

- A. They will need to create two separate dashboards.
- B. They will need to add two separate visualizations to the dashboard based on the same Query.
- C. They will need to decide on a single data visualization to add to the dashboard.
- D. They will need to copy the Query and create one data visualization per query.
- E. They will need to alter the Query to return two separate sets of results.

**Answer: B**

Explanation:

A data analyst can create multiple visualizations from the same query in Databricks SQL by clicking the + button next to the Results tab and selecting Visualization. Each visualization can have a different type, name, and configuration. To add a visualization to a dashboard, the data analyst can click the vertical ellipsis button beneath the visualization, select + Add to Dashboard, and choose an existing or new dashboard. The data analyst can repeat this process for each visualization they want to add to the same dashboard. Reference: Visualization in Databricks SQL, Visualize queries and create a dashboard in Databricks SQL
