

Kostenlose gültige Prüfung CompTIA DA0-002

Sammlung - Examcollection

BONUS!!! Laden Sie die vollständige Version der Zertprüfung DA0-002 Prüfungsfragen kostenlos herunter:
<https://drive.google.com/open?id=1LbhzwVRVRRUI8-gLI6K8btuhvYnqUF86>

Die Schulungsunterlagen zur DA0-002 Zertifizierungsprüfung von Zertprüfung sind in der Form von PDF und Software angeboten. Sie umfassen die Fragen und Antworten zur DA0-002 Zertifizierungsprüfung. Sie können vielleicht auch den realen Prüfungsaufgaben hier begegnen. Alle diesen Fragen sind perfekt und wirksam. Sie können alle CompTIA DA0-002 Zertifizierungsprüfungen bestehen. Die CompTIA DA0-002 Zertifizierungsprüfungen von Zertprüfung umfassen alle Planprogramme und sowie komplizierte Fragen. Die Fragen und Antworten zur CompTIA DA0-002 Zertifizierungsprüfung von Zertprüfung sind die realen Herausforderungen. Sie müssen Ihre Fähigkeiten und Denkweisen entfalten.

CompTIA DA0-002 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Visualization: This section of the exam measures skills of a Data Visualisation Specialist and focuses on turning raw data into clear, visual insights. It teaches how to match visual formats like bar charts, heat maps, and line graphs to specific audiences and needs. Candidates must understand how to create dashboards and reports using proper design elements such as labels, layout, branding, and colour schemes. This section also includes best practices for dashboard development and delivery through various platforms and user access levels.
Thema 2	Data Analysis: This section of the exam measures skills of a Reporting Analyst and includes foundational knowledge of statistical methods such as averages, variances, and standard deviation. It covers how to use data to find patterns, track performance, and make predictions. This domain also introduces hypothesis testing, regression, correlation, and different types of analysis like exploratory and trend analysis. Candidates should also be aware of common tools used for analysis, including Excel, SQL, Python, R, and popular BI platforms like Tableau and Power BI.
Thema 3	Data Mining: This section of the exam measures skills of a Business Intelligence Analyst and covers how data is collected, cleaned, and prepared for analysis. It explains methods like ETL and ELT for data integration, as well as web scraping, API use, and survey data collection. Candidates are expected to identify issues like missing or duplicated data and apply techniques like filtering, sorting, merging, and normalizing. The section also touches on query optimization strategies to improve data handling efficiency.
Thema 4	This section of the exam measures skills of a Data Governance Associate and introduces principles for keeping data secure, accurate, and compliant. It covers access controls, encryption, classification of sensitive data like PII and PHI, and legal requirements tied to data use. Candidates must know how to apply quality checks, validate data, and manage master data effectively. It also addresses best practices for maintaining integrity through data dictionaries, audits, and standardisation processes.

DA0-002 German - DA0-002 Tests

Es existiert viele Methoden, mit der Sie sich auf die CompTIA DA0-002 Zertifizierungsprüfung vorzubereiten. Unsere Website bietet zuverlässige Prüfungsmaterialien, mit den Sie sich auf die nächste CompTIA DA0-002 Zertifizierungsprüfung vorbereiten. Die Lernmaterialien zur CompTIA DA0-002 Zertifizierungsprüfung von Zertprüfung enthalten sowohl Fragen als auch Antworten. Unsere Materialien sind von der Praxis überprüfte Software. Wir werden alle Ihren Bedürfnisse zur CompTIA DA0-002 Zertifizierung abdecken.

CompTIA Data+ Exam DA0-002 Prüfungsfragen mit Lösungen (Q134-Q139):

134. Frage

A manager wants a report that contains the days off for each direct report. The manager needs this report to always be up-to-date with the latest data. Which of the following describes the refresh frequency that the manager is requesting?

- A. Dynamic
- B. Ad hoc
- C. Snapshot
- **D. Real-time**

Antwort: D

Begründung:

Real-time refresh ensures the report is continuously updated with the latest data as changes occur, keeping it always current.

135. Frage

A data analyst is creating a pivot table for a large dataset for an upcoming board meeting. Which of the following is the purpose of the pivot table?

- **A. To summarize and analyze the data**
- B. To retrieve and clean data from several sources
- C. To organize the data for reporting
- D. To visualize the data in a dashboard

Antwort: A

Begründung:

This question pertains to the Data Analysis domain, focusing on the purpose of a pivot table. Pivot tables are a tool for summarizing and analyzing data, often used in preparation for reporting.

* To visualize the data in a dashboard (Option A): Pivot tables summarize data but aren't visualizations; charts in dashboards might be created from pivot tables.

* To retrieve and clean data from several sources (Option B): Retrieving and cleaning data is part of data preparation, not the purpose of a pivot table.

* To summarize and analyze the data (Option C): Pivot tables aggregate and summarize data (e.g., by calculating sums, averages) and allow for analysis (e.g., filtering, grouping), which is their primary purpose.

* To organize the data for reporting (Option D): While pivot tables can help organize data, their main purpose is summarization and analysis, not just organization.

The DA0-002 Data Analysis domain includes "applying the appropriate descriptive statistical methods," and pivot tables are a key tool for summarizing and analyzing large datasets.

136. Frage

Which of the following file types separates data using a delimiter?

- A. CSV
- B. HTML
- C. XML
- D. JSON

Antwort: A

Begründung:

This question falls under the Data Concepts and Environments domain, focusing on understanding file formats and their structures. The task is to identify a file type that uses delimiters to separate data.

* XML (Option A): XML uses tags to structure data, not delimiters.

* HTML (Option B): HTML is a markup language for web pages, not a data file format using delimiters.

* JSON (Option C): JSON uses key-value pairs and nested structures, not delimiters like commas.

* CSV (Option D): CSV (Comma-Separated Values) uses delimiters (typically commas) to separate data fields, making it the correct choice.

The DA0-002 Data Concepts and Environments domain includes understanding "data schemas and dimensions," such as file formats like CSV that use delimiters.

137. Frage

A data breach occurs at a company. Which of the following actions should be taken?

- A. Keep the incident a secret until the issue is resolved.
- B. Inform the entire IT sector, but ask for discretion.
- C. Make an announcement on social media so customers are aware as soon as possible.
- D. Tell the company management team and then tell regulatory agencies.

Antwort: D

Begründung:

This question falls under the Data Governance domain, focusing on data breach response protocols. A data breach requires a structured response to comply with legal and regulatory requirements.

* Make an announcement on social media so customers are aware as soon as possible (Option A):

Public announcement without internal coordination or regulatory notification can lead to legal issues and loss of trust.

* Tell the company management team and then tell regulatory agencies (Option B): This follows best practices: inform internal leadership to coordinate a response, then notify regulatory agencies as required by laws (e.g., GDPR mandates notification within 72 hours).

* Keep the incident a secret until the issue is resolved (Option C): This violates regulations requiring timely breach notification.

* Inform the entire IT sector, but ask for discretion (Option D): Sharing with the IT sector is vague and risks leaks; regulatory agencies should be prioritized.

The DA0-002 Data Governance domain includes "data privacy concepts," such as proper breach response procedures, emphasizing internal and regulatory notification.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 5.0 Data Governance.

138. Frage

Which of the following supports capabilities such as automatic versioning, corruption checks, KPIs, and user authentication?

- A. Pipeline
- B. Notebook
- C. Source control
- D. REST API

Antwort: C

Begründung:

This question falls under the Data Governance domain, focusing on tools that support data management and quality control features.

The task is to identify a tool with capabilities like versioning, corruption checks, KPIs, and authentication.

* Notebook (Option A): Notebooks (e.g., Jupyter) are for data analysis and coding but don't inherently support versioning, corruption checks, or authentication.

- * REST API (Option B): REST APIs enable data access but don't provide versioning or corruption checks as a primary function.
 - * Pipeline (Option C): Data pipelines automate data workflows but don't typically include versioning or authentication.
 - * Source control (Option D): Source control systems (e.g., Git) support automatic versioning (tracking changes), corruption checks (integrity verification), KPIs (e.g., commit frequency), and user authentication (access control), making this the best fit.
- The DA0-002 Data Governance domain includes "data quality control concepts," and source control systems provide the listed capabilities to ensure data integrity and security.

139. Frage

Die Forschungsmaterialien haben gezeigt, dass es schwierig ist, die CompTIA DA0-002 Zertifizierungsprüfung zu bestehen. Unser Zertpruefung hat erfahrungsreiche IT-Experten, die durch harte Arbeit die neuesten Schulungsunterlagen zur CompTIA DA0-002 Zertifizierungsprüfung bearbeitet haben. Unser Zertpruefung hat die besten Ressourcen, die Ihnen beim Bestehen der CompTIA DA0-002 Prüfung helfen. Sie enthalten sowohl Fragen, als auch Antworten. Sie brauchen sich nicht so viel Mühe dafür auszugeben und können trotzdem eine hohe Note in der Prüfung bekommen. Wählen Sie doch die Schulungsunterlagen zur CompTIA DA0-002 Zertifizierungsprüfung, die Ihnen sehr helfen können.
