SAP C_WME_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation.
Topic 2	<ul style="list-style-type: none">Getting Started with Building WalkMe Solutions: This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications.

Topic 3	<ul style="list-style-type: none"> • Advancing your Skills in Building WalkMe Solutions: This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise.

So our C_WME_2506 Exam Questions are real-exam-based and convenient for the clients to prepare for the exam.

SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q12-Q17):

NEW QUESTION # 12

What is the primary difference between Global Level Design and Local Level Design in WalkMe?

- A. Global Level Design requires CSS knowledge, while Local Level Design does not for certain elements.
- **B. Global Level Design applies to all WalkMe content, while Local Level Design applies to specific items and can override global settings.**
- C. Global Level Design is only available for administrators, while Local Level Design is available for all users.
- D. Global Level Design only affects ShoutOuts, while Local Level Design affects SmartTips and Launchers.

Answer: B

NEW QUESTION # 13

In the Editor, a Shuttle has a full green circle next to it when looking at the Production environment. How would you describe the status of this Shuttle?

- **A. Published to Production**
- B. Draft mode in Test
- C. Published to Production but has been modified
- D. Archived in Production

Answer: A

NEW QUESTION # 14

When are SmartTip validation rules evaluated?

- A. When the user enters content into a field.
- B. When the user refreshes the page.
- **C. When the user enters content into a field and then clicks or tabs outside of the field.**
- D. When the user clicks into a field.

Answer: C

Explanation:

SmartTips in WalkMe are used to provide guidance or validation for form fields, ensuring users input correct data. Validation SmartTips are configured with rules that check the content of a field against specific criteria (e.g., format, length, or value). These validation rules are evaluated when the user enters content into a field and then moves focus away from it, either by clicking outside the field or tabbing to another element. This behavior ensures that the validation occurs after the user has completed their input, providing immediate feedback without interrupting their workflow.

The other options are incorrect:

- * When the user refreshes the page(A) does not trigger validation, as SmartTips are tied to user interactions with specific fields.
- * When the user enters content into a field(B) is too early, as validation requires the user to finish inputting and move focus.
- * When the user clicks into a field(D) triggers the display of guidance SmartTips, not validation rules.

Extract from Official WalkMe Documentation:

Per the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.5:

SmartTips):

"Validation SmartTips evaluate their rules when the user enters content into a field and then removes focus from that field, either by clicking elsewhere or tabbing out. This ensures that validation feedback is provided after the user has completed their input." The course Advancing Your Skills in Building WalkMe Solutions further explains:

"SmartTip validation rules are designed to check field input once the user has finished entering data and moves focus away (e.g., by clicking or tabbing out). This timing balances real-time feedback with non- disruptive user experience." Option C accurately describes when SmartTip validation rules are evaluated.

NEW QUESTION # 15

Which is the syntax that you type into the developer console to check your jQuery selectors using WalkMe?

- A. walkmejQuery("InsertSelectorHere")
- B. jQuery("InsertSelectorHere")
- C. WMjquery InsertSelectorHere
- D. wmqjQuery("InsertSelectorHere")

Answer: D

NEW QUESTION # 16

What is the purpose of using the small ghost icon in the WalkMe Editor when customizing an invisible Launcher?

- A. To add animations to the Launcher.
- B. To change the Launcher's shape.
- C. To automatically make all colors of the Launcher transparent.
- D. To adjust the size of the Launcher.

Answer: C

Explanation:

In the WalkMe Editor, the small ghost icon is a tool used when customizing Launchers to make them invisible by setting their colors to fully transparent. This feature is particularly useful for creating invisible Launchers that overlay and block interaction with specific UI elements without being visible to users. By clicking the ghost icon, the Launcher's colors (background, border, etc.) are automatically set to transparent, ensuring it blends seamlessly into the webpage while still functioning as an interactive element.

The other options are incorrect:

- * Adding animations(A) is handled through other customization settings, not the ghost icon.
- * Adjusting the size(B) is done via resizing controls, not the ghost icon.
- * Changing the shape(C) is managed through shape settings, not transparency.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.3: Launchers):

"The ghost icon in the WalkMe Editor's Launcher customization panel sets all colors of the Launcher to fully transparent, creating an invisible Launcher. This is ideal for scenarios where the Launcher needs to block interaction with an underlying element without being visible." The course Advancing Your Skills in Building WalkMe Solutions notes:

"To create an invisible Launcher, use the ghost icon to automatically apply transparency to all color settings, ensuring the Launcher is undetectable to users while maintaining its functionality." Option D correctly describes the purpose of the ghost icon.
