The ServiceNow Platform Management section focuses on the management of the ServiceNow platform, including the ServiceNow Graphical Workflow Editor and managing import sets for discovery. Lastly, the Discovery Implementation section focuses on the implementation of discovery, including best practices, change management, and the rollout of discovery to the organization.

Certified Implementation Specialist - Discovery (CIS Discovery) Exam Certification Path

The ServiceNow deployment journey would teach you to deliver ServiceNow products rapidly and effectively in the consumer setting, whether you are a young contractor beginning your career or an accomplished specialist seeking to deepen your skills and separate yourself from the competition. Developers excel in setup, scripting, and integration. If you are on the way to being a Professional Application Developer (CAD), you can learn how to build apps by developing application tables, constructing and incorporating forms, managing access, and incorporating workflows into applications. You will specialize in the product and understand how to allow the best use of the Now Platform. Administrators shall administer and operate the Network. Discover the most basic elements for handling and sustaining the ServiceNow Network.

Having a strategy and maximizing time to do something would guarantee your progress. Typically, the training for the ServiceNow Exploration Implementation Specialist test starts on the very first day of the academic session. You ought to have a clear effort to complete your studies in time to stop being stressed out as a test. Your aim should be to determine how much work you need in the academic session to finish your studies before the exam begins. It would be better if you had to draw up a road chart that represents the number of lessons and chapters and a timeline for them. You will create such a schedule by measuring the time required for an academic session and the number of courses you need to learn in that session. It can help you make the best of your time and finish your studies on time.

Study notes are essential to the planning of the test. Strong work-notes on all the critical study content. It means that the CIS Discovery exam is prepared fast. Try taking your research notes daily during your academic session. Win points from your class-lecture, as well as from the books you read yourself. It needs to be prepared in a precise order. It should include everything you need to practice rapidly for your test. Study the **CIS Discovery exam dumps** and practice what you learn by taking the **CIS**

Discovery practice exams.

ServiceNow is a popular platform that offers a wide range of IT services to organizations worldwide. With its advanced capabilities, ServiceNow has become a preferred choice for many IT professionals who want to streamline their IT operations and enhance their productivity. ServiceNow offers various certifications to validate the skills and knowledge of IT professionals, and one of the most popular certifications is the Certified Implementation Specialist - Discovery (CIS-Discovery) certification.

ServiceNow Certified Implementation Specialist - Discovery Sample Questions (Q110-Q115):

NEW QUESTION # 110

Which best describes Discovery schedule of type Configuration Item?

- A. Directly populates records in the assets table.
- **B. Collects complete information from the scanned IP ranges and sends it to the CMDB.**
- C. Verifies Configuration Item data from the scanned IP ranges against the data in the CMDB.
- D. Creates only a list of discovered IPs in both IPv4 and IPv6 formats.

Answer: B

Explanation:

A Discovery schedule of type Configuration Item collects complete information from the scanned IP ranges and sends it to the CMDB. This type of schedule runs a series of probes and sensors to identify and classify the devices and applications on the network, and to create or update the corresponding configuration items in the CMDB. A Discovery schedule of type Configuration Item can also run patterns to discover more details and relationships about the configuration items.

NEW QUESTION # 111

Which selections are necessary to create a custom horizontal pattern to discover a computer operating system?

- **A. Infrastructure Pattern Type**
- **B. CI type**
- C. Process Strategy Type
- D. Application Pattern Type

Answer: A,B

NEW QUESTION # 112

What object should be used to notify Config Admins or Discovery Admins of changes to the CMDB.

Response:

- A. Client Scripts
- B. Business Rules

- C. Notifications

Answer: C

NEW QUESTION # 113

The CMDB contains which of the following record types? (Choose two.)

- A. Configuration Item (CI)
- B. Model
- C. Relation Type
- D. Asset

Answer: A,C

Explanation:

The CMDB contains records of configuration items (CIs) and their relationships. A CI is any component that needs to be managed in order to deliver an IT service, such as a server, an application, or a user. A relation type defines the nature of the connection between two CIs, such as depends on, uses, or contains. A model is a template for a CI that defines its attributes and default values. An asset is a tangible or intangible resource that is tracked and managed by the organization, such as a laptop, a license, or a contract.

- * CSA Challenge Questions Flashcards

NEW QUESTION # 114

Which operation is used to change from the default credentials to any other appropriate credentials in a horizontal pattern?

- A. Change credentials
- B. Alternate credentials
- C. Change user
- D. Alternate user

Answer: C

Explanation:

A horizontal pattern is a type of Discovery pattern that discovers configuration items (CIs) and their relationships by moving across the network from one device to another. A horizontal pattern can use the Change user operation to switch from the default credentials to any other appropriate credentials for a specific device or application. This operation allows the pattern to access different types of CIs with different authentication methods.
