

Reliable HPE0-V27 Exam Question & HPE0-V27 Reliable Test Preparation

P.S. Free & New HPE0-V27 dumps are available on Google Drive shared by TestkingPDF: <https://drive.google.com/open?id=195FLh1xaATSuchO6bmi-51fl-Jyi-ogu>

Practicing with the HP HPE0-V27 practice test, you can evaluate your HP HPE0-V27 exam preparation. It helps you to pass the HPE0-V27 test with excellent results. HPE0-V27 imitates the actual HPE Edge-to-Cloud Solutions exam environment. You can take the HP HPE0-V27 Practice Exam many times to evaluate and enhance your HP HPE0-V27 exam preparation level.

HP HPE0-V27 Exam Overview:

Certification Vendor:	Hewlett Packard Enterprise (HPE)
Exam Name:	HPE Edge-to-Cloud Solutions
Exam Number:	HPE0-V27
Exam Format:	Multiple choice, Multiple response
Available Languages:	English
Recommended Training:	HPE GreenLake Fundamentals Training HPE Edge-to-Cloud Training (HPE Learn)
Exam Registration:	HPE Certification & Learning Pearson VUE HPE Exams
Sample Questions:	HP HPE0-V27 Sample Questions
Exam Way:	Pearson VUE test center and online proctored delivery

HP HPE0-V27 Reliable Test Preparation | HPE0-V27 Examcollection Free Dumps

If you want to get through the HPE0-V27 practice exam quickly with less time and efforts, our learning materials is definitely your best option. One or two days' preparation and remember the correct HPE0-V27 test answers, getting the certification will be simple for our candidates. Free trials of HPE0-V27 Exam PDF are available for everyone and great discounts are waiting for you. Join us and realize your dream.

HP HPE0-V27 certification exam is an industry-recognized certification that demonstrates the candidate's expertise in edge-to-cloud solutions. HPE Edge-to-Cloud Solutions certification is valuable for IT professionals who work in organizations that use edge-to-cloud solutions to support their business operations. It can also help individuals advance their careers and open up new job opportunities. Overall, the HP HPE0-V27 Certification Exam is a challenging but rewarding certification that can benefit both individuals and organizations alike.

HPE Edge-to-Cloud Solutions Sample Questions (Q46-Q51):

NEW QUESTION # 46

Your customer needs to meet US Federal government requirements for the cryptographic modules included in the solution you are proposing. For which standard should you ensure the solution is validated?

- A. FIPS 140-2
- B. NIST SP 800-60
- C. NIST SP 800-154
- D. FIPS 199

Answer: A

Explanation:

When designing solutions for US Federal government agencies or highly regulated industries, adherence to specific security standards is mandatory. The Federal Information Processing Standard (FIPS) 140-2 is the primary benchmark for validating the effectiveness of cryptographic modules. This standard ensures that the hardware and software used for encryption, hashing, and digital signatures meet stringent security requirements to protect sensitive data. HPE designs its servers, such as the ProLiant and Synergy lines, and its storage arrays, like HPE Alletra, to be FIPS 140-2 compliant, providing the necessary assurance that the encryption of data-at-rest and data-in-transit is robust against sophisticated threats. While other NIST standards provide guidelines for data categorization or risk management, FIPS 140-2 is the specific certification required for the actual cryptographic hardware and software modules. Ensuring that a solution is FIPS validated is a critical requirement during the "Architect and Design" phase for any government-related opportunity. References: NIST FIPS 140-2 Standard Overview; HPE Security and Compliance Documentation.

NEW QUESTION # 47

You are generating a customer HPE GreenLake proposal for a customer.

Select the items that are mandatory when submitting the initial proposal to HPE for quoting.

(Choose two.)

- A. End Bill of Materials
- B. Signed statement of Work
- C. Completed Order Checklist
- D. Start Bill of Materials
- E. Credit Check Form

Answer: C,D

Explanation:

When generating a customer HPE GreenLake proposal, you need to submit the following mandatory items to HPE for quoting:

Start Bill of Materials: This is a document that lists the initial hardware and software components, quantities, and prices that are required for the HPE GreenLake solution. It also includes the service level, the billing unit, the minimum and maximum capacity, and the buffer size. The Start Bill of Materials helps HPE to calculate the monthly fee and the buffer charge for the customer.

Completed Order Checklist: This is a document that contains the essential information and documents that are needed to process the HPE GreenLake order. It includes the customer name, address, contact details, legal entity, billing frequency, payment method, contract term, start date, end date, and signature. It also includes the attachments such as the Start Bill of Materials, the End Bill of Materials, the Statement of Work, the Credit Check Form, and the Customer Acceptance Form.

NEW QUESTION # 48

Match each tool with its description.

Tool

Fabric Vision	
Aruba Fabric Composer	
InfoSight	
DCNM	

Description

Cloud-based Automated Infrastructure Operations (AIOps) platform that applies advanced machine learning to transform how infrastructure is managed and supported.

Designed to seamlessly work with ethernet switches by optimizing interoperability and improving the performance across a wide variety of virtualized, hyperconverged (HCI), and HPE compute and storage environments.

Network management platform for all NX-OS-enabled deployments, spanning new fabric architectures, and storage networking deployments of the HPE C-Series switches.

Provides insight across the storage network through diagnostic, monitoring, and management technology of the HPE B-Series switches.

Answer:

Explanation:

Tool		Description
Fabric Vision	InfoSight	Cloud-based Automated Infrastructure Operations (AIOps) platform that applies advanced machine learning to transform how infrastructure is managed and supported.
Aruba Fabric Composer	Aruba Fabric Composer	Designed to seamlessly work with ethernet switches by optimizing interoperability and improving the performance across a wide variety of virtualized, hyperconverged (HCI), and HPE compute and storage environments.
InfoSight	DCNM	Network management platform for all NX-OS-enabled deployments, spanning new fabric architectures, and storage networking deployments of the HPE C-Series switches.
DCNM	Fabric Vision	Provides insight across the storage network through diagnostic, monitoring, and management technology of the HPE B-Series switches.

Tool		Description
Fabric Vision	InfoSight	Cloud-based Automated Infrastructure Operations (AIOps) platform that applies advanced machine learning to transform how infrastructure is managed and supported.
Aruba Fabric Composer	Aruba Fabric Composer	Designed to seamlessly work with ethernet switches by optimizing interoperability and improving the performance across a wide variety of virtualized, hyperconverged (HCI), and HPE compute and storage environments.
InfoSight	DCNM	Network management platform for all NX-OS-enabled deployments, spanning new fabric architectures, and storage networking deployments of the HPE C-Series switches.
DCNM	Fabric Vision	Provides insight across the storage network through diagnostic, monitoring, and management technology of the HPE B-Series switches.

* Cloud-based Automated Infrastructure Operations (AIOps) platform that applies advanced machine learning to transform how infrastructure is managed and supported. = InfoSight

* Designed to seamlessly work with ethernet switches by optimizing interoperability and improving the performance across a wide variety of virtualized, hyperconverged (HCI), and HPE compute and storage environments. = Aruba Fabric Composer

* Network management platform for all NX-OS-enabled deployments, spanning new fabric architectures, and storage networking deployments of the HPE C-Series switches. = DCNM

* Provides insight across the storage network through diagnostic, monitoring, and management technology of the HPE B-Series switches. = Fabric Vision

* InfoSight: InfoSight is a cloud-based Automated Infrastructure Operations (AIOps) platform that applies advanced machine learning to transform how infrastructure is managed and supported. It can monitor and optimize the performance, health, and utilization of HPE's storage, servers, and networking solutions, and provide insights and recommendations to enhance the efficiency and reliability of the infrastructure 1 2 .

* Aruba Fabric Composer: Aruba Fabric Composer is a software-defined networking solution that is designed to seamlessly work with ethernet switches by optimizing interoperability and improving the performance across a wide variety of virtualized, hyperconverged (HCI), and HPE compute and storage environments. It can simplify and automate the network configuration, management, and troubleshooting, and provide visibility and analytics to optimize the network performance and availability 3 .

* DCNM: Data Center Network Manager (DCNM) is a network management platform for all NX-OS- enabled deployments, spanning new fabric architectures, and storage networking deployments of the HPE C-Series switches. It can provide centralized control, automation, and visibility for the data center network, and support various features, such as fabric discovery, provisioning, monitoring, troubleshooting, and backup and restore .

* Fabric Vision: Fabric Vision is a technology that provides insight across the storage network through diagnostic, monitoring, and management technology of the HPE B-Series switches. It can enhance the network performance, availability, and security, and reduce the operational costs and complexity. It can also support various features, such as Fabric Performance Impact (FPI) Monitoring, ClearLink Diagnostics, Flow Vision, and Monitoring and Alerting Policy Suite (MAPS) .

NEW QUESTION # 49

What is one way Aruba solutions enhance unified communications (UC) and collaboration?

- A. by ensuring all forms of traffic are treated in the same way
- B. by giving mobile devices highest priority on the network
- C. by redirecting compute-intensive apps to wired connections
- D. by providing low latency networks with end-to-end quality of service

Answer: A

NEW QUESTION # 50

What has been a hallmark of HPE from the time it started?

- A. IT as a service
- B. innovative solutions
- C. converged infrastructure
- D. conventional paradigms

Answer: B

NEW QUESTION # 51
