

300-815 Valid Test Questions & 300-815 Reliable Test Price

2026 Latest VCEdumps 300-815 PDF Dumps and 300-815 Exam Engine Free Share: <https://drive.google.com/open?id=1ZqhzFgKXiVpEVvj5YLUHmg2mDK11s5K>

All of our 300-815 exam questions have high pass rate as 99% to 100% and they are valid. We revise our 300-815 study guide aperiodicity. You may rest assured that what you purchase are the latest and high-quality 300-815 preparation materials. We guarantee our 300-815 practice prep will be good value for money, every user will benefit from our 300-815 Exam Guide. If you fail exams we will refund the full test dumps cost to you soon. Every extra penny deserves its value. Our 300-815 test questions will be your best choice.

Official Courses for Cisco 300-815 Exam Preparation

Before taking the exam, you have to master all the above topics. The most rational way to do this is by adopting corresponding Cisco training. These are three programs you can apply for:

- **Understanding Cisco Collaboration Foundations (CLFNDU)**

This is one more training course that would make you ready for this test. It provides you with all the information you need to know to maintain a simple Cisco Unified Communications Manager and handle the Session Initiation Protocol (SIP) gateway. It encompasses preliminary settings, the management of systems, customer management, media services management, as well as tools used for troubleshooting and maintenance of CU Communications solutions. This program also has a duration of 5 days regardless of its format, which includes the options such as instructor-led, virtual classroom, and E-learning.

- **Implementing and Understanding Cisco Advanced Call Control and Mobility Services (CLACCM)**

During this official course, you will get solid knowledge about how to utilize CU-CM features to simplify the communications system into a modular, lightweight, and reliable collaboration approach. You will also learn about several other features, such as Globalized Call Routing, Cisco Extension Mobility, Cisco Unified Mobility, and many others. Using this course as your guide will bolster your studies for the test. The training is offered in three forms: 5 days of instructor-led classes, 5 days of virtual sessions, or a set of E-learning tools and materials equivalent to 5-day preparation.

- **Implementing and Operating Cisco Collaboration Core Technologies (CLCOR)**

If you start from the very beginning, it's better to first enroll in training for the core test. It lets you prepare for the Cisco CCNP Collaboration from scratch, covering the most basic concepts. During it, you'll prepare for advanced-level positions based on Cisco collaboration technologies deployment and service. You will also acquire the expertise and skills one needs to have to install and deploy common collaboration and networking technologies. Also, it is focused on the areas like configuration, call management, service quality, and other Cisco collaboration applications. It can be followed as 8-day sessions guided by an instructor, 8-day virtual training, or E-learning.

Hot 300-815 Valid Test Questions | Well-Prepared 300-815 Reliable Test Price: Implementing Cisco Advanced Call Control and Mobility Services

It is browser-based; therefore no need to install it, and you can start practicing for the Cisco 300-815 exam by creating the Implementing Cisco Advanced Call Control and Mobility Services (300-815) practice test. You don't need to install any separate software or plugin to use it on your system to practice for your actual Implementing Cisco Advanced Call Control and Mobility Services (300-815) exam. VCEdumps 300-815 web-based practice software is supported by all well-known browsers like Chrome, Firefox, Opera, Internet Explorer, etc.

Cisco Implementing Cisco Advanced Call Control and Mobility Services Sample Questions (Q36-Q41):

NEW QUESTION # 36

How does an engineer globalize routing for ingress calls coming from the PSTN to internal DNs?

- A. At Cisco Unified Communications Manager, put the calling number in E.164 format and the called number in E.164 format.
- B. At Cisco Unified CM, put the calling number in E.164 format and the called number in PSTN format.
- C. At the PSTN gateway, put the calling number in E.164 format and the called number in localized (DN) format.
- D. At the PSTN gateway, put the calling number in PSTN format and the called number in DN format.

Answer: A

NEW QUESTION # 37

The administrator of ABC company is troubleshooting a one-way audio issue for a call that uses H.323 protocol (slow-start mode). The administrator requests that you provide the IP and port information of the Real-Time Transport Protocol traffic that had the one-way audio call.

You gather the H.225 and H.245 messages for one of the one-way audio calls.

Where can you find the RTP IP and port information for both sides? (Note: This call flow has not invoked any media resources like MTP or transcoders).

- A. H.245 Open Logical Channel Ack
- B. H.245 Open Logical Channel
- C. H.245 Terminal Capability Set
- D. H.225 Connect

Answer: A

Explanation:

H245 Open Logical Channel contains only RTCP port, H245 Open Logical Channel ACK will have both RTP and RTP Port. <https://community.cisco.com/t5/collaboration-voice-and-video/h323-call-flow/ta-p/3160014>

NEW QUESTION # 38

Cisco UCM has 100,000 entries in the database learned through the ILS Service. Parameter ILS Max Number of Learned Objects in Database value is set to 100,000. What will happen to learned data when the service parameter value is reduced to 50,000?

- A. Cisco UCM will overwrite an entry for newly learned data and keep the parameter value at 100,000.
- B. Cisco UCM does not write additional ILS learned objects to the database and will delete the last 50,000 entries learned to keep it to the service parameter value.
- C. Cisco UCM does not write additional ILS learned objects to the database and keeps the existing database entries.
- D. Cisco UCM does not write additional ILS learned objects to the database and will delete the first 50,000 entries learned to keep it to the service parameter value.

Answer: C

NEW QUESTION # 39

A customer is using a SIP trunk to route calls to ITSP to decrease the possibility of downtime, the customer invested in a failover device. How does the customer ensure reachability to ITSP, so that if one device on ITSP fails, the calls will be routed to another device?

- A. Enable transmit security status on the SIP security profile
- B. Enable ANAT on the SIP profile.
- C. Monitor the link using network management tools, and if it fails, manually change the routing to another working device.
- **D. Enable SIP Option Ping on the SIP profile.**

Answer: D

NEW QUESTION # 40

A customer has multisite deployments with a globalized dial plan. The customer wants to route PSTN calls via the gateway assigned to each site. Which two actions will fulfill the requirement? (Choose two.)

- A. Create a hunt group and assign it to each site route pattern
- B. Create one global route list for PSTN calls that points to one global PSTN route group.
- C. Create a route group which has all the gateways and associate it to the device pool of every site.
- **D. Create one route group for each site and one global route list for PSTN calls that point to the local route group.**
- **E. Assign one route group as a local route group in the device pool of the corresponding site.**

Answer: D,E

NEW QUESTION # 41

.....

You may be in a condition of changing a job, but having your own career is unbelievably hard. Then how to improve yourself and switch the impossible mission into possible is your priority. If you want to pass 300-815 exam, here come our 300-815 exam prep giving you a helping hand. Our company has the highly authoritative and experienced team to help you pass the 300-815 Exam. You can not only get the most helpful and valid 300-815 exam questions, but also you can get according suggestions on how to pass the 300-815 exam.
