### NEW QUESTION # 141

Refer to the exhibits. What must be done to enforce end user authentication before accessing quarantine?

- A. Enable SPAM Quarantine Notification and add the %quarantine\_url% variable.
- B. Change the end user quarantine access from None authentication to SAAS.
- C. Change the end user quarantine access setting from None authentication to Mailbox.
- **D. Enable SPAM notification and use LDAP for authentication.**

**Answer: D**

Explanation:

<https://www.cisco.com/c/en/us/support/docs/security/email-security-appliance/118692-configure-esa-00.html#anc7>

### NEW QUESTION # 142

Which two certificate authority lists are available in Cisco ESA? (Choose two.)

- A. user
- **B. custom**
- **C. system**
- D. demo
- E. default

**Answer: B,C**

Explanation:

\* System: This is the default list of trusted certificate authorities that is provided by Cisco and updated automatically. It contains the certificates of well-known and widely used certificate authorities, such as VeriSign, Thawte, and GoDaddy.

\* Custom: This is the list of additional certificate authorities that you can add manually or import from a file. It allows you to trust certificates that are issued by your own or third-party certificate authorities that are not included in the system list.

### NEW QUESTION # 143

What are two primary components of content filters? (Choose two.)

- A. policies

- B. content
- C. subject
- D. actions
- E. conditions

**Answer: D,E**

Explanation:

Content filters are rules that allow Cisco ESA to perform actions on messages based on predefined or custom conditions, such as headers, envelope, body, attachments, etc.

The two primary components of content filters are:

Conditions, which are the criteria that determine whether a message matches a content filter rule or not, such as message size, sender address, attachment type, etc.

Actions, which are the operations that Cisco ESA performs on a message if it matches the conditions of a content filter rule, such as deliver, drop, quarantine, encrypt, etc.

The other options are not primary components of content filters on Cisco ESA.

**NEW QUESTION # 144**

Drag and drop the steps to configure Cisco ESA to use SPF/SIDF verification from the left into the correct order on the right.

Associate the filter with a nominated incoming mail policy.	step 1
Configure a filter to take necessary action on SPF/SIDF verification results.	step 2
Create a custom mail-flow policy for verifying incoming messages by using SPF/SIDF.	step 3
Test the results of message verification.	step 4
Configure a sendergroup to use the custom mail-flow policy.	step 5

**Answer:**

Explanation:

Associate the filter with a nominated incoming mail policy.	Create a custom mail-flow policy for verifying incoming messages by using SPF/SIDF.
Configure a filter to take necessary action on SPF/SIDF verification results.	Configure a sendergroup to use the custom mail-flow policy.
Create a custom mail-flow policy for verifying incoming messages by using SPF/SIDF.	Associate the filter with a nominated incoming mail policy.
Test the results of message verification.	Configure a filter to take necessary action on SPF/SIDF verification results.
Configure a sendergroup to use the custom mail-flow policy.	Test the results of message verification.

**NEW QUESTION # 145**

An analyst creates a new content dictionary to use with Forged Email Detection.  
Which entry will be added into the dictionary?

- A. Alpha.Beta@mycompany.com
- B. mycompany.com
- C. Alpha Beta
- D.
