# 100% Pass Quiz Accurate Network Appliance - NS0-185 Vce Torrent

As we all know, Dumpkiller's Network Appliance NS0-185 exam training materials has very high profile, and it is also well-known in the worldwide. Why it produces such a big chain reaction? This is because Dumpkiller's Network Appliance NS0-185 Exam Training materials is is really good. And it really can help us to achieve excellent results.

Try to have a positive mindset, keep your mind focused on what you have to do. Self-discipline is important if you want to become successful. Learn to reject temptations. As old saying goes, no pains no gains. Learning our NS0-185 study materials will help you calm down. What you have learned will finally pay off. It is never too late to learn. You still have the chance to obtain the NS0-185 certificate. What is more, many people have harvest happiness and success after passing the NS0-185 exam. Then you are available for various high salary jobs.

NS0-185 Vce Torrent | Network Appliance NS0-185 Valid Exam Bootcamp: NetApp Storage Installation Engineer, ONTAP Professional Exam Latest Released

Good news comes that our company has successfully launched the new version of the NS0-185 Guide tests. Perhaps you are deeply bothered by preparing the exam; perhaps you have wanted to give it up. Now, you can totally feel relaxed with the assistance of our NS0-185 actual test. That is to say, if you decide to choose our study materials, you will pass your exam at your first attempt. Not only that, we also provide all candidates with free demo to check our product, it is believed that our free demo will completely conquer you after trying.

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q96-Q101):

NEW QUESTION # 96
What is the minimum number of disks required in a SAS shelf?

- A. two
- B. there is no minimum
- C. one
- D. half of the shelf's capacity

Answer: C

Explanation:
From a hardware installation perspective, NetApp SAS shelves are designed to function with a minimum of one installed disk. While

performance, redundancy, and aggregate creation require additional disks, the physical shelf itself does not mandate a minimum disk count beyond one for detection and operation.

This flexibility allows administrators to stage hardware installations or expand capacity incrementally.

However, ONTAP best practices strongly recommend populating shelves in ways that support RAID protection and performance requirements.

Therefore, the minimum number of disks required in a SAS shelf is one, making option B correct.

NEW QUESTION # 97

On which type of network interfaces are the cluster interconnect LIFs created?

- A. on a UTA port shared with other LIFs
- B. on an interface group
- C. on an FC or FCoE port
- D. on a physical port

Answer: D

NEW QUESTION # 98

According to NetApp documentation, what should be used when using the Cluster Switch Health Monitor (CSHM) and log collection features?

- A. HTTP
- B. SSL
- C. SSH
- D. Telnet

Answer: C

Explanation:

The Cluster Switch Health Monitor (CSHM) is a diagnostic feature used to monitor the health and configuration of cluster network switches. As part of ONTAP SAN implementation testing and troubleshooting, CSHM relies on secure, authenticated communication between the cluster and the switches.

NetApp installation and operational documentation clearly specifies that SSH must be used for both CSHM monitoring and log collection. SSH provides encrypted communication, authentication, and command execution capabilities that are required to securely access switch operating systems and retrieve diagnostic information.

Protocols such as Telnet and HTTP are not acceptable because they transmit data in clear text and do not meet NetApp security standards. SSL is not used for switch CLI access or log retrieval in the context of CSHM.

Using SSH ensures compliance with security best practices while enabling ONTAP to collect switch logs, execute health checks, and validate switch configuration state. This requirement is consistently reinforced in NetApp installation objectives as part of secure cluster infrastructure design.

Therefore, the correct answer is D (SSH).

NEW QUESTION # 99

After installation of a new ONTAP cluster, you experience a problem. You successfully create a support case on the NetApp Support site. The customer asks you how to view the status of the case.

Referring to the exhibit, which two steps would allow the customer to accomplish this task? (Choose two.)

- A. Open https://support.netapp.com, using the partner credentials.
- B. Open My Cases, and select Create a Case.
- C. Open My Cases, and select the 41747189 case number.
- D. Open https://support.netapp.com, using the customer credentials.

Answer: C,D

Explanation:

After a support case has been created, NetApp's support workflow requires that case visibility and status tracking be performed through the NetApp Support site using the customer's credentials, not partner credentials. Customer credentials ensure proper access

to systems registered under the customer's support account, including entitlement visibility, serial numbers, and case ownership. Partner credentials may not have permission to view customer-owned cases unless explicitly granted.

Once logged in, theMy Casessection of the support site provides a centralized dashboard showing all active and historical cases associated with the customer's company. From this view, cases are listed with details such as case number, product, symptom, status, and last updated timestamp. Selecting the specific case number (in this scenario,41747189) opens the detailed case view, where the customer can monitor progress, read engineer updates, upload logs, and add comments.

The option "Create a Case" is used only when opening anewcase and does not allow viewing the status of an existing case. Therefore, it does not satisfy the requirement. Using partner credentials is also incorrect because case tracking is intended to be performed by the customer organization that owns the system and support entitlement.

Thus, the correct steps are tolog in using customer credentialsandopen My Cases and select the existing case number.

NEW QUESTION # 100

A customer is installing a new system. The administrator needs to have the maximum available amount of data space.
Which disk configuration should the administrator use?

- A. Flash Pool
- B. RAID-DP
- C. RAID4
- D. ADP

Answer: D

Explanation:

When assessing storage configurations during ONTAP SAN solution design, one key objective may be maximizing usable data capacity.Advanced Drive Partitioning (ADP)is specifically designed to optimize disk utilization, especially in all-flash and hybrid systems.

ADP allows a single physical disk to be partitioned into multiple logical segments that serve different purposes, such as root data, user data, and spare capacity. This significantly reduces the number of disks reserved exclusively for system use and increases the total amount of disk space available for user data.

RAID-DP and RAID4 provide data protection but do not increase usable capacity; in fact, they reserve parity disks, reducing available space. Flash Pool combines SSDs with HDDs to create caching aggregates, which improves performance but does not maximize raw data capacity.

By contrast, ADP is explicitly intended to maximize usable storage by minimizing overhead. This makes it the optimal choice when the primary requirement ismaximum available data space.

Therefore, the correct answer isD (ADP).

NEW QUESTION # 101

......

The NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) practice test questions prep material has actual NetApp Storage Installation Engineer, ONTAP Professional Exam exam questions for our customers so they don't face any hurdles while preparing for Network Appliance NS0-185 certification exam. The study material is made by professionals while thinking about our users. We have made the product user-friendly so it will be an easy-to-use learning material. We even guarantee our users that if they couldn't pass the Network Appliance NS0-185 Certification Exam on the first try with their efforts, they can claim a full refund of their payment from us (terms and conditions apply).

NS0-185 Valid Exam Bootcamp: https://www.dumpkiller.com/NS0-185_braindumps.html

No need to doubt and worry, thousands of candidates choose our NS0-185 test guide, you shouldn't miss this high pass-rate NS0-185 best questions, To achieve this objective the "Dumpkiller" is offering real, valid, and updated NS0-185 exam practice test questions in three different formats, Customers who purchased NCSIE ONTAP NCSIE ONTAP NS0-185 real exam dumps and practice questions, all can enjoy free updated in one year, More importantly, you can pass the NS0-185 exam and get the dreaming NS0-185 certification.

This is not a style book, Key Contract Elements, No need to doubt and worry, thousands of candidates choose our NS0-185 Test Guide, you shouldn't miss this high pass-rate NS0-185 best questions.

Quiz 2026 Valid Network Appliance NS0-185: NetApp Storage Installation

Engineer, ONTAP Professional Exam Vce Torrent

To achieve this objective the "Dumpkiller" is offering real, valid, and updated NS0-185 exam practice test questions in three different formats, Customers who purchased NCSIE ONTAP NCSIE ONTAP NS0-185 real exam dumps and practice questions, all can enjoy free updated in one year.

More importantly, you can pass the NS0-185 exam and get the dreaming NS0-185 certification, Yes, it couldn't be better if you purchasing NS0-185 exam cram materials.
