NEW QUESTION # 50

Custom partner bundles can be leveraged to share and apply baselines in which deployment scenario?

- A. Brownfield
- **B. Greenfield**
- C. Grayfield
- D. Bluefield

Answer: B

Explanation:

Custom partner bundles are predefined baseline configurations provided by SAP or implementation partners and are primarily used in Greenfield deployments, where a new SAP Ariba solution is being implemented from scratch. These bundles help accelerate deployment by applying standard best-practice settings and templates as a starting point in the Test environment. In Bluefield or Brownfield deployments, which involve migration or upgrade of existing systems, incremental or selective configuration migration is more typical, and partner bundles are less relevant. Grayfield is not a recognized SAP Ariba deployment scenario.

Using partner bundles in Greenfield supports standardized setups and reduces manual configuration errors early in the project lifecycle, enabling faster time to value.
