## Exams

Our TorrentVCE can help you realize your dream to pass Mule-Arch-202 certification exam by providing Mule-Arch-202 test training materials. Because it concludes all training materials you need to Pass Mule-Arch-202 Exam. Choosing our TorrentVCE can absolutely help you pass Mule-Arch-202 test easily, and make you become a member of elite in IT. What are you waiting for? Hurry up!

## Salesforce Certified MuleSoft Platform Integration Architect Sample Questions (Q67-Q72):

### NEW QUESTION # 67

An automation engineer must write scripts to automate the steps of the API lifecycle, including steps to create, publish, deploy, and manage APIs and their implementations in Anypoint Platform.

Which Anypoint Platform feature can be most easily used to automate the execution of all these actions in scripts without needing to directly invoke the Anypoint Platform REST APIs?

- A. Anypoint CLI
- B. Mule Maven plugin
- C. GitHub actions
- D. Custom-developed Postman scripts

**Answer: A**

### NEW QUESTION # 68

What is the primary benefit of using streaming in Mule applications for performance optimization?

- A. Increases the security of data transmissions.
- B. Reduces the need for external libraries.
- C. Decreases the amount of memory required for processing large data sets.
- D. Simplifies the configuration of applications.

**Answer: C**

### NEW QUESTION # 69

A large enterprise customer with the following system landscape is planning to implement Salesforce Sales Cloud.

The following business processes need to be supported in Salesforce:

1. Sales Consultants should be able to have access to current inventory.
2. Enterprise Resource Planning System(ERP) is the system of record for pricing information.
3. Quotes should be generated in Salesforce with pricing from ERP.
4. Sales Management uses a Enterprise Business Intelligence (BI) tool to view Sales dashboards.
5. Master Data Management (MDM) is the system of record for customers and prospects.
6. Invoices should be accessible in Salesforce.

Which systems in the landscape should the Integration Consultant consider to be integrated with Salesforce to support the business requirements?

- A. ERP, Invoices system, Data Warehouse and BI Tool
- B. ERP, Inventory, Pricing Engine, Invoices system
- C. ERP, MDM, BI tool and Data Warehouse
- D. ERP, MDM, Data Warehouse, Invoices system

**Answer: B**

### NEW QUESTION # 70

Refer to the exhibits.

A company has several applications deployed to a CloudHub VPC in the Asia-Pacific (Sydney) region. The VPC is connected to the corporate network with a transit gateway. The development team plans to create a solution that provides a REST API using a

custom domain, available on the public internet. The solution will use a custom connector that requires Microsoft Windows Server 2022. Which deployment model minimizes disruption to existing integrations while meeting the new requirements?

- A. Build a Mule application with the custom connector Deploy the application to CloudHub using Microsoft Windows 2022 workers Deploy the public-facing API application to the CloudHub VPC, and configure a CloudHub Dedicated Load Balancer
  -
- B. Provision Microsoft Windows 2022 servers, and install customer-hosted standalone Mule runtimes Build a Mule application with the custom connector, and deploy it to the customer-hosted runtimes Deploy the public-facing API application to the CloudHub VPC, and configure a CloudHub Dedicated Load Balancer
  -
- C. Provision six Windows Server 2022 virtual machines, and install Runtime Fabric for VMs Build a Mule application with the custom connector, and deploy it to Runtime Fabric Deploy a public-facing API application to the CloudHub VPC, and configure a CloudHub Dedicated Load Balancer
  -
- D. Provision an Azure Kubernetes Service cluster, and install Runtime Fabric for Self-Managed Kubernetes Build a Mule application with the custom connector, and deploy it to Runtime Fabric Deploy a public-facing API application to the CloudHub VPC, and configure a CloudHub Dedicated Load Balancer
  -

**Answer: B**

#### **NEW QUESTION # 71**

Runtime Manager as the App URL. Requests are sent by external web clients over the public internet to the Mule application's App URL. Each of these requests is routed to the HTTPS Listener event source of the running Mule application. Later, the DevOps team edits some properties of this running Mule application in Runtime Manager.

Immediately after the new property values are applied in Runtime Manager, how is the current Mule application deployment affected, and how will future web client requests to the Mule application be handled?

- A. CloudHub 1.0 will redeploy the Mule application to a new CloudHub 1.0 worker.
- B. **CloudHub 1.0 will redeploy the Mule application to a new CloudHub 1.0 worker.**
- C. CloudHub 1.0 will redeploy the Mule application to the old CloudHub 1.0 worker.
- D. CloudHub 1.0 will redeploy the Mule application to the old CloudHub 1.0 worker.

**Answer: B**

#### **NEW QUESTION # 72**

.....
