

First-rank 1Z0-1163-1 Exam Preparation: Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 boosts the Most Efficient Training Dumps - ExamPrepAway

BONUS!!! Download part of ExamPrepAway 1Z0-1163-1 dumps for free: https://drive.google.com/open?id=16-mMMGu7-djw940ZDe_ChSYOd_1p_MN

Three versions of 1Z0-1163-1 exam guide are available on our test platform, including PDF version, PC version and APP online version. As a consequence, you are able to study the online test engine of 1Z0-1163-1 study materials by your cellphone or computer, and you can even study 1Z0-1163-1 Actual Exam at your home, company or on the subway whether you are a rookie or a veteran, you can make full use of your fragmentation time in a highly-efficient way to study with our 1Z0-1163-1 exam questions and pass the 1Z0-1163-1 exam.

Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• OMBPs for Manufacturing: This section measures the skills of Manufacturing Operations Managers in utilizing Oracle Cloud's manufacturing capabilities. It explains the flow of manufacturing processes, module integration, and best practices that enhance operational efficiency. Candidates will analyze metrics that assess productivity, cost control, and overall manufacturing performance.
Topic 2	<ul style="list-style-type: none">• OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.
Topic 3	<ul style="list-style-type: none">• OMBPs for Order Management: This section evaluates the proficiency of Order Fulfillment Analysts in managing Oracle Cloud's order management modules. It covers the process flow and integration of different components to streamline order processing. Candidates will study key design considerations and metrics related to customer satisfaction, order fulfillment efficiency, and accuracy in managing customer demand.
Topic 4	<ul style="list-style-type: none">• OMBPs for Supply Chain Planning: This section assesses the knowledge of Supply Chain Planners in managing planning modules within Oracle SCM. It explains process flows, integration points, and how different planning modules work together. Candidates will learn about best practices for designing efficient planning workflows and key metrics used to measure supply chain responsiveness and effectiveness.

Topic 5	<ul style="list-style-type: none"> • Oracle Cloud Success Navigator & Oracle Cloud Quality Standards: This section evaluates the skills of Cloud Implementation Managers in leveraging Oracle Cloud Success Navigator and Quality Standards for cloud adoption. It explains how best practices are embedded into Oracle Cloud Applications and applied using Starter Configuration. Candidates will understand how to optimize cloud performance and ensure successful deployments following Oracle's quality guidelines.

1Z0-1163-1 Vce Test Simulator - 1Z0-1163-1 Exam Brain Dumps

We can provide absolutely high quality guarantee for our 1Z0-1163-1 practice materials, for all of our 1Z0-1163-1 learning materials are finalized after being approved by industry experts. Without doubt, you will get what you expect to achieve, no matter your satisfied scores or according 1Z0-1163-1 certification file. As long as you choose our 1Z0-1163-1 exam questions, you will get the most awarded.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q30-Q35):

NEW QUESTION # 30

What is the primary function of the Available to Promise (ATP) process in Oracle Fusion Cloud SCM?

- A. It eliminates the need for demand forecasting.
- B. It manages only supplier payments without impacting inventory levels.
- C. It guarantees immediate shipment for all orders.
- **D. It ensures product availability commitments based on inventory and supply constraints.**

Answer: D

Explanation:

The Available to Promise (ATP) process (A) in Oracle Fusion Cloud SCM calculates the quantity of products available to commit to new customer orders by analyzing current inventory levels and supply constraints, such as production capacity, supplier lead times, and existing order commitments. For example, if a warehouse has 200 units of a product with 50 already promised, ATP indicates 150 units are available, ensuring accurate delivery promises. This real-time calculation prevents overpromising and aligns customer expectations with operational reality. Option B is incorrect-ATP does not guarantee immediate shipment but provides feasible timelines based on availability, not an unrealistic universal promise. Option C is false-demand forecasting complements ATP by informing supply planning; it doesn't eliminate it. Option D is irrelevant-supplier payments are managed by financial modules, not ATP, which focuses on inventory and supply. By ensuring reliable commitments, ATP enhances customer satisfaction, reduces order cancellations, and optimizes resource use across the supply chain.

NEW QUESTION # 31

Which process in Oracle Fusion Cloud SCM ensures that inventory levels are maintained efficiently?

- **A. Replenishment Planning.**
- B. Supplier Qualification.
- C. Manufacturing Execution.
- D. Cost Accounting.

Answer: A

Explanation:

Replenishment Planning (D) in Oracle Fusion Cloud SCM ensures inventory levels are maintained efficiently by predicting demand and adjusting supply plans to replenish stock proactively. It uses forecasts and safety stock rules-e.g., ordering 300 units when stock falls to 50 and demand is expected to rise-to prevent shortages or excess inventory. Option A (Supplier Qualification) focuses on supplier evaluation, not inventory maintenance. Option B (Cost Accounting) tracks financials, not stock levels. Option C (Manufacturing Execution) manages production, not replenishment. Replenishment Planning optimizes inventory turnover, reduces carrying costs, and ensures product availability, making it a proactive inventory management tool.

NEW QUESTION # 32

What is the primary advantage of the Replenishment Planning process in Oracle Fusion Cloud SCM?

- A. It reduces supplier payment cycles.
- B. It eliminates the need for demand forecasting.
- C. It guarantees inventory levels remain static regardless of demand fluctuations.
- D. **It ensures optimal inventory levels by predicting demand and adjusting supply plans.**

Answer: D

Explanation:

The primary advantage of Replenishment Planning (A) is ensuring optimal inventory levels by predicting demand and adjusting supply plans accordingly. It uses demand signals-e.g., a forecast of 500 units for next month-to trigger timely replenishments, avoiding overstock (costly) or stockouts (lost sales). Option B is incorrect-static levels defy dynamic demand; Replenishment Planning adapts to fluctuations. Option C is false-demand forecasting is its foundation. Option D is unrelated-payment cycles are a financial process. For instance, if demand spikes unexpectedly, it recalibrates orders, saving costs and maintaining service levels, a key operational benefit.

NEW QUESTION # 33

What is a primary advantage of the Replenishment Planning process in Oracle Fusion Cloud SCM?

- A. It reduces supplier payment cycles.
- B. It guarantees inventory levels remain static regardless of demand fluctuations.
- C. **It ensures optimal inventory levels by predicting demand and adjusting supply plans accordingly.**

Answer: C

Explanation:

Replenishment Planning in Oracle Fusion Cloud SCM optimizes inventory levels by predicting demand and adjusting supply plans to prevent overstocking or stockouts. It uses demand forecasting and supply data to ensure inventory aligns with business needs. Option A (reducing payment cycles) is unrelated to replenishment planning. Option B (static inventory) is incorrect as the process dynamically adjusts to demand fluctuations, not maintains static levels. This advantage enhances operational efficiency and cost savings.

NEW QUESTION # 34

What is the primary function of the Order Promising process in Oracle Fusion Cloud SCM?

- A. It only manages orders for direct-to-customer deliveries.
- B. It eliminates the need for supplier collaboration.
- C. **It provides accurate order commitment dates based on supply and demand availability.**
- D. It guarantees same-day shipping for all orders.

Answer: C

Explanation:

The Order Promising process (A) in Oracle Fusion Cloud SCM, primarily through Global Order Promising (GOP), provides accurate order commitment dates by analyzing real-time supply (inventory, production capacity) and demand (existing orders, forecasts) data. For instance, if a customer orders 50 units and only 30 are in stock with a 2-day production lead time, it commits to delivery in 2 days, not immediately. Option B is incorrect-it handles all order types (B2B, internal), not just direct-to-customer. Option C is false-no system can universally guarantee same-day shipping; commitments depend on constraints. Option D is wrong-supplier collaboration is often required to fulfill promises. This process enhances customer trust by avoiding overpromising, optimizes resource allocation, and integrates with supply chain planning for seamless execution.

NEW QUESTION # 35

.....

Our experts are researchers who have been engaged in professional qualification 1Z0-1163-1 exams for many years and they have a keen sense of smell in the direction of the examination. Therefore, with our 1Z0-1163-1 study materials, you can easily find the key content of the exam and review it in a targeted manner so that you can successfully pass the 1Z0-1163-1 Exam. We have free demos of the 1Z0-1163-1 exam materials that you can try before payment.
