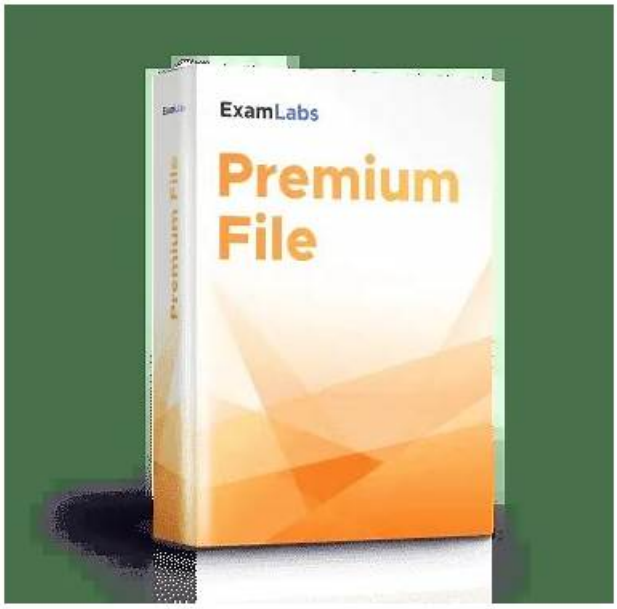
# Excellect FCP_FGT_AD-7.6 Pass Rate, FCP_FGT_AD-7.6 Certification Practice



BONUS!!! Download part of ExamDiscuss FCP_FGT_AD-7.6 dumps for free: https://drive.google.com/open?id=1e_OO4z-P9GKsroylUnfS9ScJF3ieQoHm

We learned that a majority of the candidates for the FCP_FGT_AD-7.6 exam are office workers or students who are occupied with a lot of things, and do not have plenty of time to prepare for the FCP_FGT_AD-7.6 exam. Taking this into consideration, we have tried to improve the quality of our FCP_FGT_AD-7.6 training materials for all our worth. Now, I am proud to tell you that our FCP_FGT_AD-7.6 Training Materials are definitely the best choice for those who have been yearning for success but without enough time to put into it. There are only key points in our FCP_FGT_AD-7.6 training materials.

## Fortinet FCP_FGT_AD-7.6 Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations. |
| Topic 2 | • Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently. |
| Topic 3 | • Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network. |

| | |
|---|---|
| Topic 4 | • Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed. |
| Topic 5 | • Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime. |

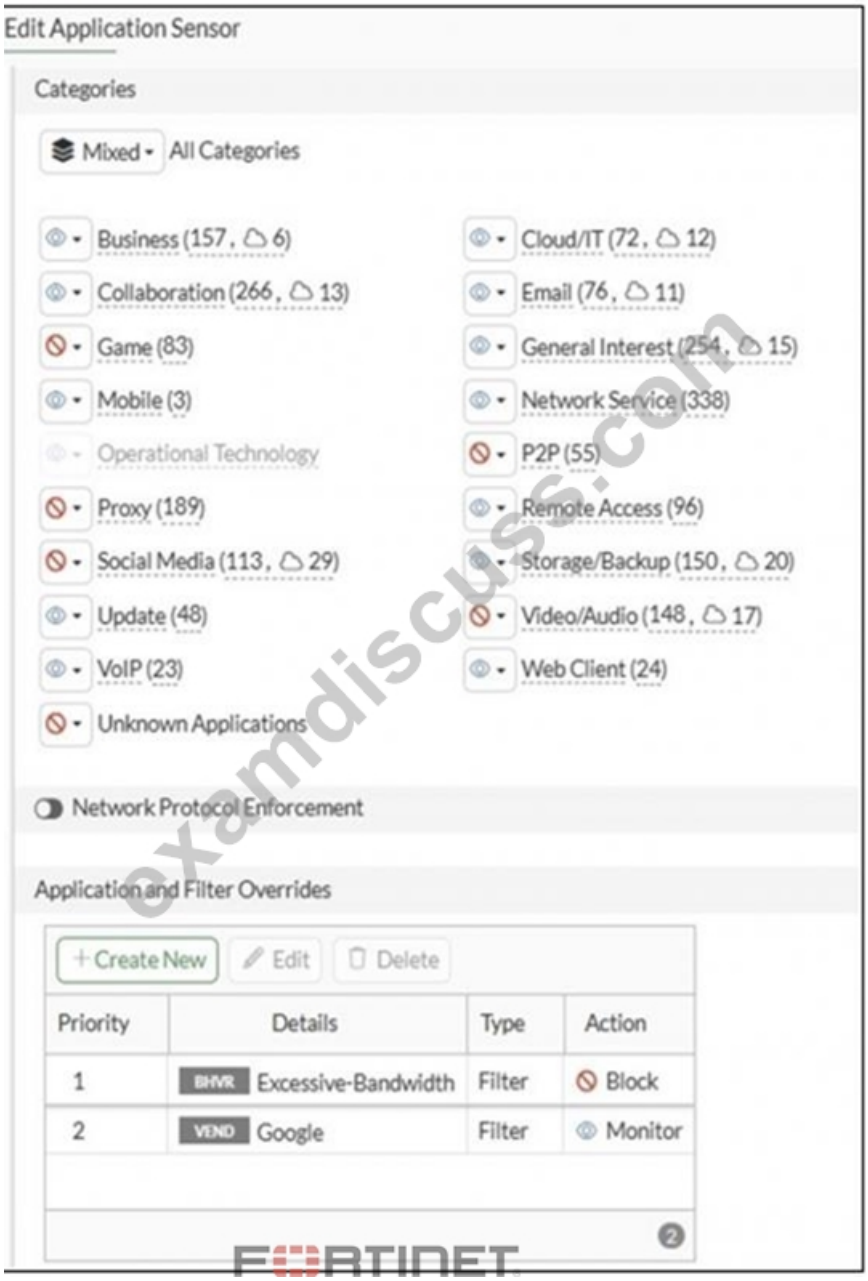
## FCP_FGT_AD-7.6 Certification Practice & Prep FCP_FGT_AD-7.6 Guide

If you want to pass a high percentage of the Fortinet FCP_FGT_AD-7.6 Exam, you should consider studying for the actual exam. These practice tests are designed to help you prepare for the exam and ensure you know the syllabus content. It will also help you improve your time management skills, as these tests are designed like an actual exam. Moreover, they will help you learn to answer all questions in the time allowed.

## Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q14-Q19):

**NEW QUESTION # 14**
Refer to the exhibits. You have implemented the application sensor and the corresponding firewall policy as shown in the exhibits. You cannot access any of the Google applications, but you are able to access www.fortinet.com.
What would you do to resolve this issue?

## Application sensor



examdiscuss.com

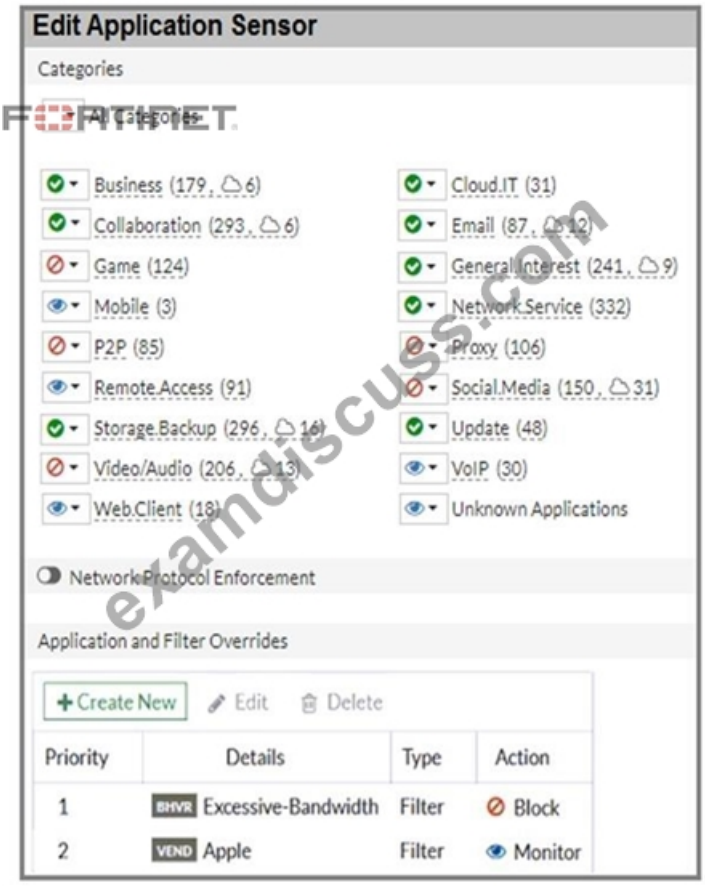
- A. Change the Inspection mode to Proxy-based.
- B. Set SSL inspection to deep-content-inspection.
- C. Move up Google in the Application and Filter Overrides section to set its priority to 1.
- D. Add *Google*.com to the URL category in the security profile.

**Answer: C**

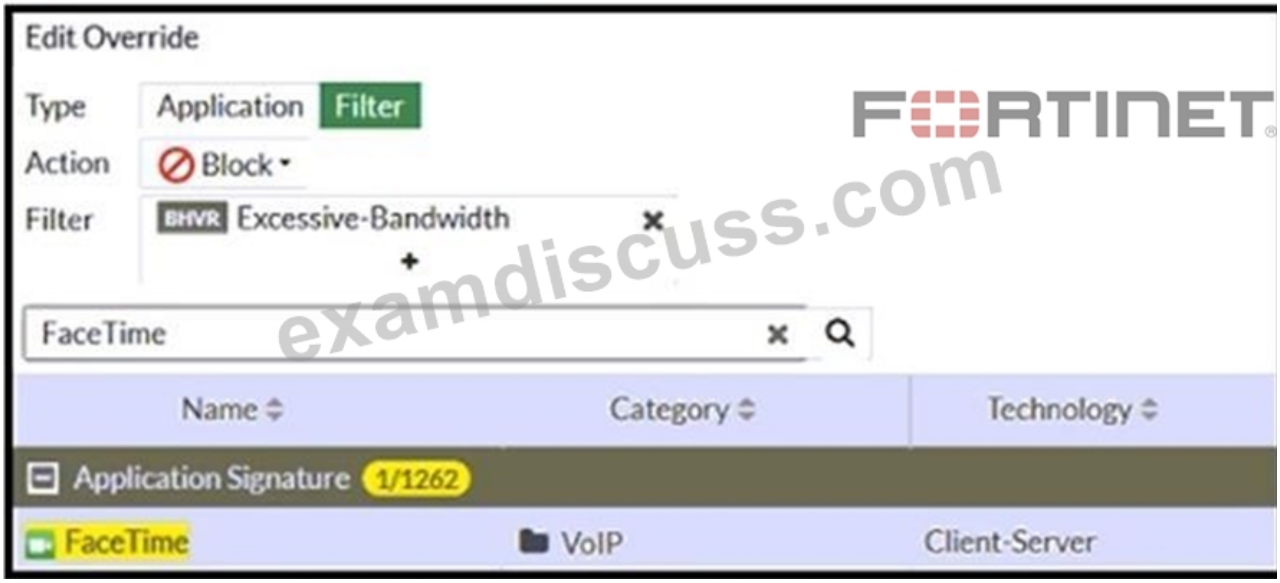
Explanation:
In the Application and Filter Overrides, the Excessive-Bandwidth filter (set to Block) is priority 1, and Google (set to Monitor) is priority 2. Since overrides are evaluated by priority, Google traffic is being blocked by the higher-priority rule. Moving Google to the top (priority 1) ensures it is matched first, allowing access while still monitoring it.

**NEW QUESTION # 15**
Refer to the exhibits. The exhibits show the application sensor configuration and the Excessive- Bandwidth and Apple filter details. Based on the configuration, what will happen to Apple FaceTime if there are only a few calls originating or incoming?

**Application sensor configuration**

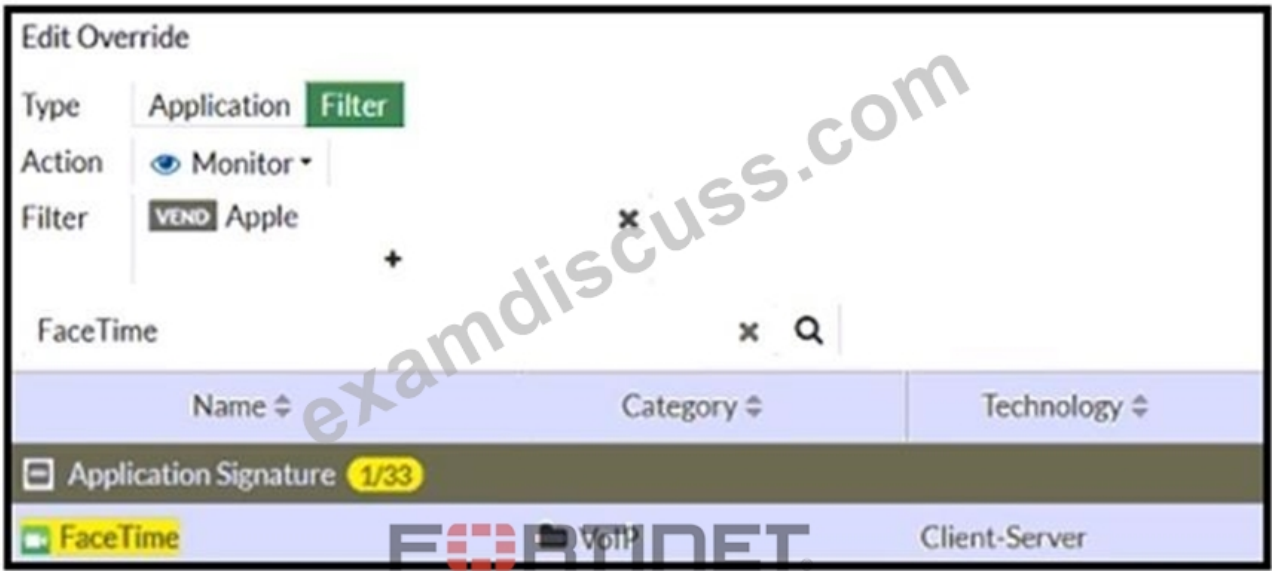


**Application override configuration**



examdiscuss.com

**Filter override configuration**



examdiscuss.com

- A. Apple Face Time will be allowed, based on the Apple filter configuration.
- B. Apple Face Time will be allowed only if the Apple filter in Application and Filter Overrides is set to Allow.
- C. Apple Face Time will be blocked, based on the Excessive-Bandwidth filter configuration.
- D. Apple Face Time will be allowed, based on the Video/Audio category configuration.

**Answer: A**

Explanation:
Apple FaceTime normally falls under Video/Audio and could be blocked by the Excessive- Bandwidth filter. However, in this configuration, an override is applied under the Apple vendor filter with Monitor action. Overrides take precedence over general filter actions. Therefore, FaceTime will not be blocked; instead, it will be monitored, and since only a few calls are made (not excessive bandwidth usage), it will be allowed based on the Apple filter configuration.

**NEW QUESTION # 16**
Which two statements are true regarding FortiGate HA configuration synchronization? (Choose two.)

- A. Checksums of devices are compared against each other to ensure configurations are the same.
- B. Incremental configuration synchronization can occur only from changes made on the primary FortiGate device.
- C. Incremental configuration synchronization can occur from changes made on any FortiGate device within the HA cluster.
- D. Checksums of devices will be different from each other because some configuration items are not synced to other HA members.

**Answer: A,B**

Explanation:
In FortiGate HA (High Availability) configuration, checksums of device configurations are compared to ensure they are synchronized and identical across the cluster. Incremental synchronization can only happen from changes made on the primary device to ensure consistency and integrity across the cluster members.
Changes made on non-primary devices do not initiate synchronization.

**NEW QUESTION # 17**
An administrator manages a FortiGate model that supports NTurbo.
How does NTurbo enhance performance for flow-based inspection?

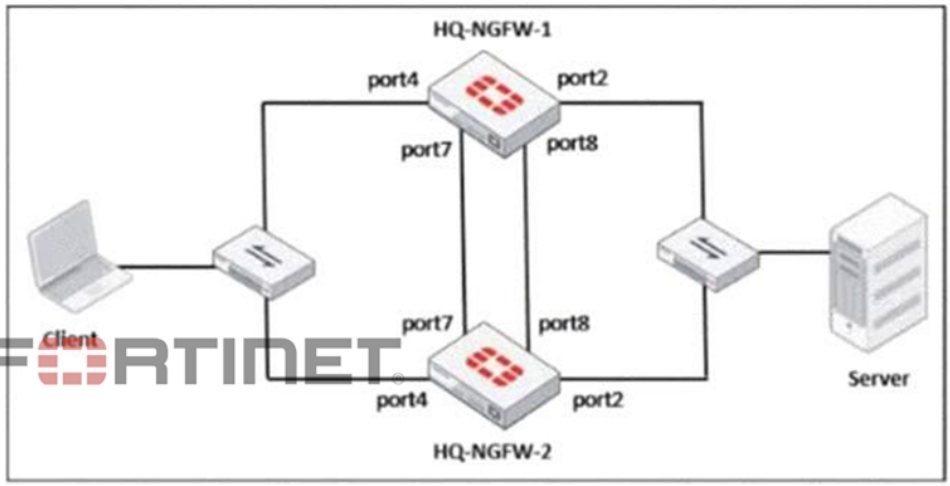
- A. NTurbo buffers the whole file and then sends it to the antivirus engine.
- B. NTurbo creates a special data path to redirect traffic between the IPS engine its ingress and egress interfaces.
- C. NTurbo creates two inspection sessions on the FortiGate device.
- D. NTurbo offloads traffic to the content processor.

**Answer: B**

Explanation:
NTurbo enhances flow-based inspection performance by creating a fast data path between the IPS engine and the ingress/egress interfaces. This allows traffic to be inspected efficiently without needing to pass through the slower, traditional packet path, thus reducing CPU load and improving throughput during flow-based security inspections.

**NEW QUESTION # 18**
Refer to the exhibits.

**FortiGate HA cluster topology**



**Current HA status**

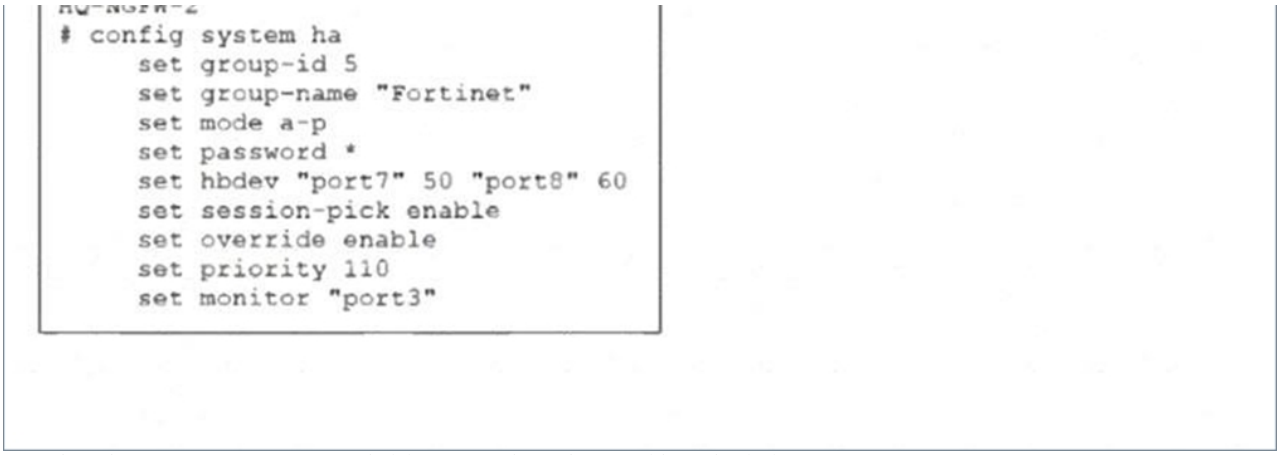
```
HQ-NGFW-1 # get system ha status
...
Configuration Status:
    FGVM02TM24013423(updated 0 seconds ago): in-sync
    FGVM02TM24013423 chksum dump: e1 60 2e 42 b8 c1 c6 df 11 34 0c 21 80 79 a4 9f
    FGVM02TM24013501(updated 4 seconds ago): in-sync
    FGVM02TM24013501 chksum dump: e1 60 2e 42 b8 c1 c6 df 11 34 0c 21 80 79 a4 9f
...
number of member: 2
HQ-NGFW-1       , FGVM02TM24013423, HA cluster index = 1
HQ-NGFW-2       , FGVM02TM24013501, HA cluster index = 0
number of vcluster: 1
vcluster 1: work 169.254.0.2
Primary: FGVM02TM24013423, HA operating index = 0
Secondary: FGVM02TM24013501, HA operating index = 1
```

**New FortiGate HA configuration**

```
HQ-NGFW-1
# config system ha
    set group-id 5
    set group-name "Fortinet"
    set mode a-p
    set password *
    set hbdev "port7" 50 "port8" 60
    set session-pick enable
    set override disable
    set priority 90
    set monitor "port3"

HQ-NGFW-2
```

examdiscuss.com



Based on the current HA status, an administrator updates the override and priority parameters on HQ-NGFW-1 and HQ-NGFW-2 as shown in the exhibit.
What would be the expected outcome in the HA cluster?

- A. The HA cluster will become out of sync because the override setting must match on all HA members.
- B. HQ-NGFW-1 will synchronize the override disable setting with HQ-NGFW-2.
- C. HQ-NGFW-1 will remain the primary because HQ-NGFW-2 has lower priority.
- D. HQ-NGFW-2 will take over as the primary because it has the override enable setting and higher priority than HQ-NGFW-1.

**Answer: D**

Explanation:
With override enabled on HQ-NGFW-2 and its higher priority (110 vs. 90), HQ-NGFW-2 will become the primary device, preempting HQ-NGFW-1 despite the current primary status.

**NEW QUESTION # 19**
.....

ExamDiscuss believes in customer satisfaction and strives hard to make the entire Fortinet FCP_FGT_AD-7.6 exam preparation process simple, smart, and successful. These Fortinet FCP_FGT_AD-7.6 exam questions formats are Fortinet FCP_FGT_AD-7.6 Pdf Dumps file, desktop practice test software and web-based practice test software. All these three ExamDiscuss's Fortinet FCP_FGT_AD-7.6 exam dumps formats contain the real and updated FCP_FGT_AD-7.6 practice test.
