## SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q29-Q34):

### NEW QUESTION # 29

What could be the reason for multiple commitments where several operations have the same scheduled dates on a work center after dispatching? Note: There are 2 correct answers to this question.

- A. The Finite Scheduling indicator is NOT set in the strategy profile.
- B. The Change Planning Direction indicator is set in the strategy profile.
- C. Alternative work centers are fully occupied.
- D. The work center has several individual capacities.

**Answer: A,D**

Explanation:

In SAP S/4HANA, dispatching operations (e.g., in CM21 or PP/DS Planning Board) assigns them to work centers. Multiple commitments on the same date indicate overlapping schedules, caused by:

\* The Finite Scheduling indicator is NOT set in the strategy profile(A): In PP/DS (strategy profile, /SAPAPO/CDPSC11) or capacity planning (OPU5), if finite scheduling isn't active (e.g., work center CR02, Capacity tab, "Relevant to Finite Scheduling" unchecked), the system schedules operations infinitely, ignoring capacity limits and allowing overlaps on the same date.

\* The work center has several individual capacities(B): If the work center (CR02, Capacity tab) has multiple individual capacities (e.g., 3 machines, field: No. of Individual Capacities), operations can be scheduled in parallel on the same date, each assigned to a separate capacity, resulting in multiple commitments.

Alternative work centers fully occupied(C) might force scheduling onto one center but doesn't inherently cause overlaps-it's a capacity issue, not a scheduling logic flaw.Change Planning Direction indicator(D) (e.

g., Forward/Backward in strategy profile) affects sequence, not overlapping commitments. This is per SAP's scheduling behavior.

### NEW QUESTION # 30

Which of the following elements does MRP take into account during net requirement calculation? Note: There are 2 correct answers to this question.
