### SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q57-Q62):

#### NEW QUESTION # 57

What are some value propositions of SAP Document AI? Note: There are 2 correct answers to this question.

- A. Enterprise-grade orchestration
- B. Secure and compliant frameworks
- C. Scalability and compliance
- D. Preconfigured content

Answer: B,D

#### NEW QUESTION # 58

What are some of the challenges LLMs face that SAP Knowledge Graph tries to deal with?

- A. Providing subjective and contextual information
- B. Capturing of dynamic and real-time information
- C. Overlooking relationships between entities
- D. Generating factually incorrect or fabricated information

Answer: C,D

Explanation:

The SAP Knowledge Graph addresses key challenges faced by large language models (LLMs), as per SAP Business AI documentation. Generating factually incorrect or fabricated information (hallucinations) is mitigated by grounding LLMs in structured, verified enterprise data, ensuring accuracy. Overlooking relationships between entities is tackled by the Knowledge Graph's ability to map and contextualize data relationships, providing a comprehensive view of interconnected information. While capturing dynamic, real-time information and providing subjective, contextual information are challenges, they are not primary focuses of the Knowledge Graph, which emphasizes structured data and factual grounding. These capabilities enhance the reliability of AI-driven insights.

#### NEW QUESTION # 59

In SAP Business AI, what are some safeguards for protecting customer data? Note: There are 3 correct answers to this question.

- A. Sustainability
- B. Consent-based model training
- C. SAP-hosted AI infrastructure
- D. Clean core maintenance
- E. Tenant isolation

Answer: B,C,E

#### NEW QUESTION # 60

What are some value propositions of the generative AI hub? Note: There are 2 correct answers to this question.

- A. Enterprise-grade orchestration of models
- B. Scalability and compliance of business documents
- C. Preconfigured content

- **D. Secure and compliant frameworks**

**Answer: A,D**

Explanation:

The Generative AI hub offers key value propositions, including secure and compliant frameworks and enterprise-grade orchestration of models, as highlighted in SAP Business AI documentation. Secure and compliant frameworks ensure that generative AI models operate within strict data protection and regulatory standards, such as GDPR, safeguarding sensitive information. Enterprise-grade orchestration of models enables businesses to manage and deploy multiple AI models efficiently, ensuring scalability and performance across diverse use cases. Preconfigured content is not a primary feature of the Generative AI hub, and scalability and compliance of business documents are more aligned with SAP Document AI. These capabilities make the Generative AI hub a robust solution for enterprise AI needs.

### NEW QUESTION # 61

(What are some key differentiators of SAP Business AI? Note: There are 3 correct answers to this question.)

- A. Predictive Analytics
- **B. Ecosystem of Innovation**
- **C. AI Foundation**
- D. Large Foundation Models
- **E. Embedded AI**

**Answer: B,C,E**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Key differentiators of SAP Business AI include embedded AI directly integrated into business applications for seamless use, an AI Foundation providing the underlying infrastructure and tools in SAP BTP, and an Ecosystem of Innovation through partnerships and open standards for collaborative advancements. These set SAP apart by focusing on integration, foundational support, and ecosystem-driven innovation.

Exact extracts supporting this:

Embedded AI: "Embedded AI: Our relevant, reliable, and responsible SAP Business AI is ... key differentiators."learning.sap.com

AI Foundation: "For that, we established an AI foundation."learning.sap.com "SAP's main differentiators are... deep domain and industry expertise."community.sap.com (Foundation as base.)

Ecosystem of Innovation: "Maximize the value of AI across your business with a single AI interface that seamlessly integrates data and workflows across your SAP and non-SAP

applications."sap.com Implies ecosystem.

Other options are incorrect because:

Option C: Predictive analytics is a capability but not a key differentiator; focus is on embedded and foundational aspects.

Option D: SAP integrates large foundation models from partners but does not claim them as differentiators; emphasis is on business grounding.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From SAP Learning course "Discovering SAP Business AI," units on market point of view and role of Business AI, highlighting embedded AI, foundation, and ecosystem as differentiators, per C\_BCBAI\_2502 materials.
