If you want a relevant and precise content that imparts you the most updated, relevant and practical knowledge on all the key topics of the Fortinet Certification exam, no other study material meets these demands so perfectly as does TestKingFree's study guides. The FCP_GCS_AD-7.6 questions and answers in these guides have been prepared by the best professionals who have deep exposure of the certification exams and the exam takers needs. The result is that FCP_GCS_AD-7.6 Study Guides are liked by so many ambitious professionals who give them first priority for their exams. The astonishing success rate of FCP_GCS_AD-7.6clients is enough to prove the quality and benefit of the study questions of FCP_GCS_AD-7.6.

Why we give a promise that once you fail the exam with our dump, we guarantee a 100% full refund of the dump cost to you, as all those who have pass the exam successfully with our FCP_GCS_AD-7.6 exam dumps give us more confidence to make the promise of "No help, full refund". FCP_GCS_AD-7.6 exam is difficult to pass, but it is an important reflection of ability for IT workers in IT industry. So our IT technicians of TestKingFree take more efforts to study FCP_GCS_AD-7.6 Exam Materials. All exam software from TestKingFree is the achievements of more IT elite.

Advanced FCP_GCS_AD-7.6 Testing Engine, Reliable Study FCP_GCS_AD-7.6 Questions

Good product and all-round service are the driving forces for a company. Our Company is always striving to develop not only our FCP_GCS_AD-7.6 latest practice dumps, but also our service because we know they are the aces in the hole to prolong our career. Reliable service makes it easier to get oriented to the exam. If our candidates fail to pass the FCP_GCS_AD-7.6 exam unfortunately, you can show us the failed record, and we will give you a full refund. The combination of FCP_GCS_AD-7.6 Exam Guide and sweet service is a winning combination for our company, so you can totally believe that we are sincerely hope you can pass the FCP_GCS_AD-7.6 exam, and we will always provide you help and solutions with pleasure, please contact us through email then.

Fortinet FCP - Google Cloud Security 7.6 Administrator Sample Questions (Q31-Q36):

NEW QUESTION # 31
Refer to the exhibit.
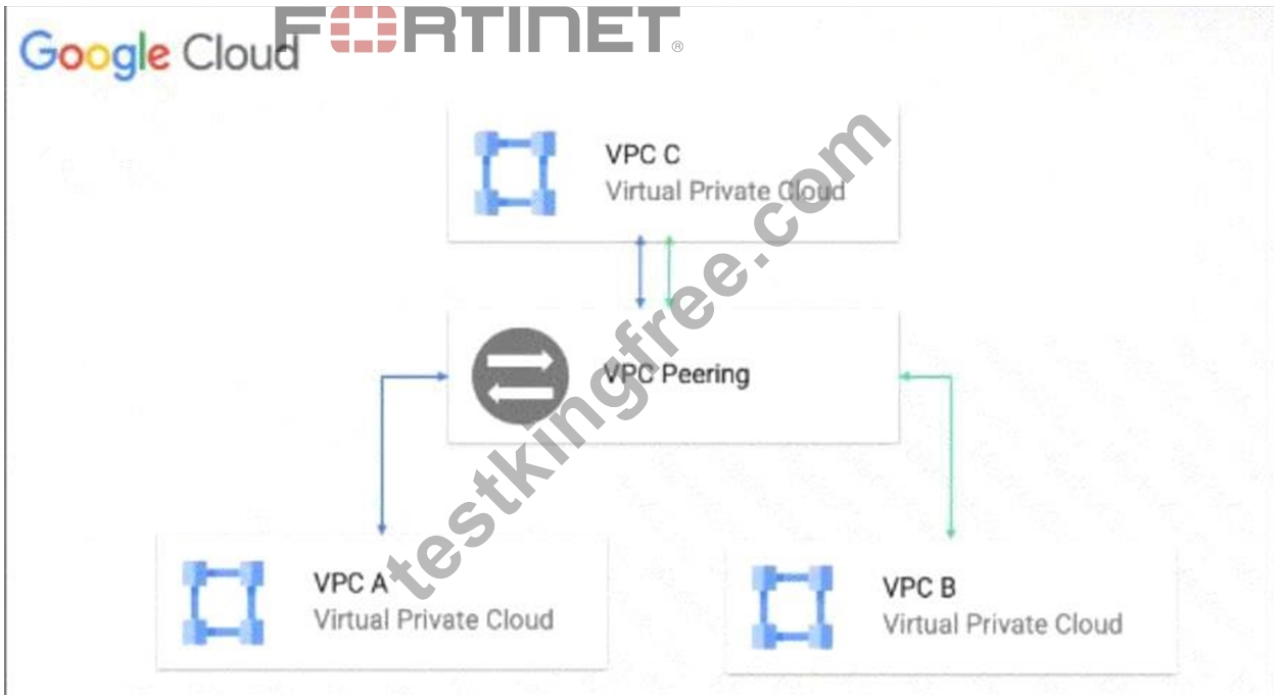

Which action must the administrator take to route traffic from VPC B to VPC A?

- A. The administrator must create a new VPC peering connection between VPC A and VPC B.
- B. The administrative must configure a custom route in VPC B and point the gateway to VPC A.
- C. The administrator must deploy a FortiGate VM with at least three network interfaces.
- D. The administrator must configure a custom route in VPC B and point the gateway to the VPC peering service.
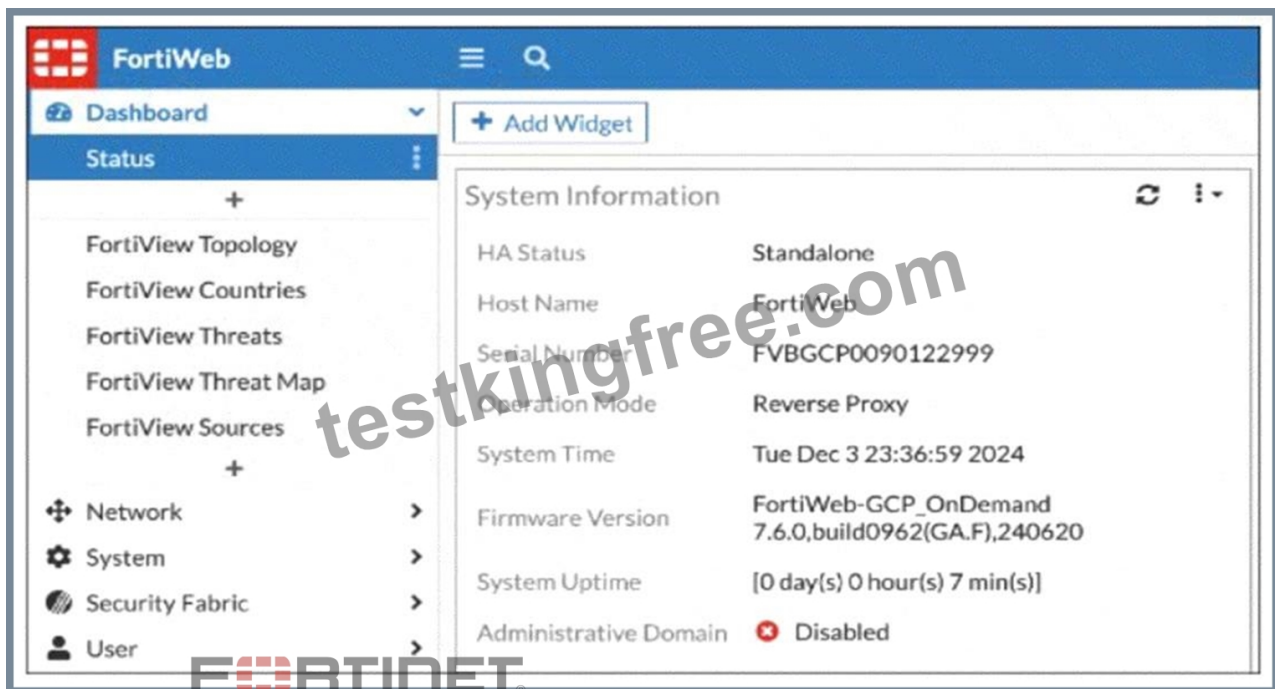

Answer: C

Explanation:
Because VPC peering is non-transitive, traffic cannot route from VPC B to VPC A via VPC C. To enable routing between VPC A and VPC B through VPC C, a FortiGate VM with multiple network interfaces can act as a firewall/router to manage traffic between the three VPCs.

NEW QUESTION # 32
Refer to the exhibit.

Which two statements about FortiWeb instances deployed in Google Cloud are true?

- A. You can change the operation mode of FortiWeb.
- B. By default, you can access FortiWeb using HTTPS on port 443.
- C. You can deploy FortiWeb using pay-as-you-go or bring-your-own-license.
- D. You can configure the FortiWeb instance with only one network interface.

Answer: A,C

Explanation:
FortiWeb's operation mode can be changed, such as between reverse proxy and transparent modes, to suit different deployment scenarios.
FortiWeb in Google Cloud supports flexible licensing models, including pay-as-you-go and bring-your-own- license (BYOL).

NEW QUESTION # 33
An administrator is tasked to deploy two FortiGate devices in two different zoned to achieve geographical redundancy.
Which two architectural considerations must the administrator address? (Choose two.)

- A. The FortiGate devices cannot be assigned the second IP address in the subnets that they are deployed in.
- B. The FortiGate devices must not be deployed in the same VPC.
- C. The FortiGate devices must be deployed in two different regions.
- D. The FortiGate devices can be deployed in the same subnet.
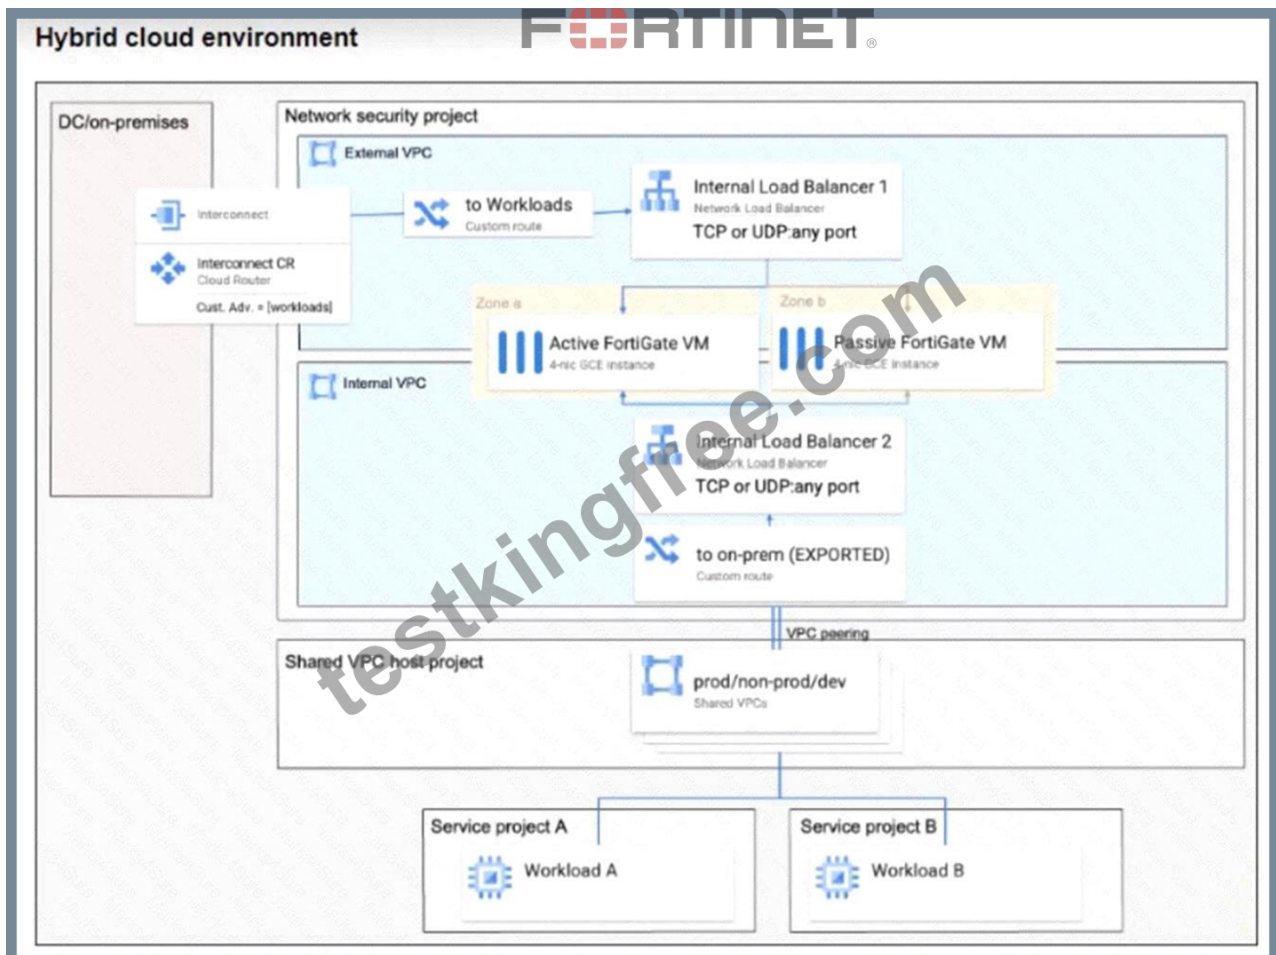

Answer: A,C

Explanation:
Deploying FortiGate devices in different regions ensures geographic redundancy.
The second IP address in a subnet is reserved for the default gateway in Google Cloud, so FortiGate devices cannot use that IP.

NEW QUESTION # 34
Refer to the exhibit.

In this hybrid environment, in which two ways does the traffic flow from a network node in the on-premises network to Workload B in Google Cloud? (Choose two.)

- A. Once the traffic has been inspected, the active FortiGate uses VPC peering to forward the traffic to the Server project A VPC.
- B. Traffic will not reach the FortiGate devices because both load balancers are internal.
- C. When the packet reaches the external VPC, it is forwarded to the active FortiGate cluster member using a custom static route.
- D. Traffic will be routed using VPC peering from the Internal VPC to the destination subnet.

Answer: C,D

Explanation:
Traffic from on-premises enters the external VPC and is routed to the active FortiGate VM via custom routes for inspection.
After inspection, traffic is routed through VPC peering from the internal VPC to the service project subnet where Workload B resides.

NEW QUESTION # 35
Refer to the exhibit.

EFFECTIVE ROUTES   ROUTE MANAGEMENT

Route management view allows you to create and delete static routes and policy based routes.

CREATE ROUTE   REFRESH

Filter Enter property name or value

	Name ↑	Description	IP version	Destination IP range	Priority	Scope limits	Next hop	Network
	internal-to-internet		IPv4	0.0.0.0/0	1000	—	Forwarding rule of internal passthrough Network Load balancer backend-forwarding-rule	privatevpc

Which three conclusions can you draw from the Google Cloud custom route? (Choose three.)

- A. At least one instance group was created.
- B. A group-based passthrough network load balancer was created.
- C. A target pool-based passthrough network load balancer was created.
- D. A health check was created.
- E. The next hop must be updates manually in the custom route if the current next hop goes down.

Answer: A,D,E

Explanation:
The route's next hop is a forwarding rule for a backend service, which indicates a group-based passthrough load balancer.
Group-based load balancers require health checks to monitor instance health.
Backend services attach to instance groups to distribute traffic, so at least one instance group exists.

NEW QUESTION # 36

......

We are aimed to develop a long-lasting and reliable relationship with our customers who are willing to purchase our FCP_GCS_AD-7.6 study materials. To enhance the cooperation built on mutual-trust, we will renovate and update our system for free so that our customers can keep on practicing our FCP_GCS_AD-7.6 study materials without any extra fee. Meanwhile, to ensure that our customers have greater chance to pass the exam, we will make our FCP_GCS_AD-7.6 test training keeps pace with the digitized world that change with each passing day. In this way, our endeavor will facilitate your learning as you can gain the newest information on a daily basis and keep being informed of any changes in FCP_GCS_AD-7.6 test. Therefore, our customers can save their limited time and energy to stay focused on their study as we are in charge of the updating of our FCP_GCS_AD-7.6 test training. It is our privilege and responsibility to render a good service to our honorable customers.
