

# Valid NCM-MCI Torrent | Latest NCM-MCI Dumps Pdf

BONUS!!! Download part of Real4dumps NCM-MCI dumps for free: [https://drive.google.com/open?id=1eIZQWr8ig1ze45oM9eEBWCo\\_tKsvX8\\_d](https://drive.google.com/open?id=1eIZQWr8ig1ze45oM9eEBWCo_tKsvX8_d)

Are you still worried that you haven't found NCM-MCI test dumps and review information? People around the world are likely to choose NCM-MCI certification exam. Real4dumps is the only learning website that can provide better NCM-MCI Certification Training materials. If you are still worried, you can download NCM-MCI free demo before purchasing our Real4dumps NCM-MCI certification training materials.

Our company employs a professional service team which traces and records the popular trend among the industry and the latest update of the knowledge about the NCM-MCI exam reference. We give priority to keeping pace with the times and providing the advanced views to the clients. We keep a close watch at the most advanced social views about the knowledge of the test NCM-MCI Certification. Our experts will renovate the test bank with the latest NCM-MCI exam practice question and compile the latest knowledge and information into the NCM-MCI exam questions and answers.

## 2026 Nutanix NCM-MCI: Nutanix Certified Master - Multicloud Infrastructure v6.10 –Trustable Valid Torrent

Real4dumps will provide you with a standard, classified, and authentic study material for all the IT candidates. Our experts are trying their best to supply you with the high quality NCM-MCI training pdf which contains the important knowledge required by the actual test. The high quality and valid NCM-MCI study torrent will make you more confidence in the real test. Additionally, you will get the updated Nutanix vce dumps within one year after payment. With the updated NCM-MCI study material, you can successfully pass at first try.

## Nutanix Certified Master - Multicloud Infrastructure v6.10 Sample Questions (Q10-Q15):

**NEW QUESTION # 10**

Task 7

An administrator has environment that will soon be upgraded to 6.5. In the meantime, they need to implement log and apply a security policy named `Staging_Production`, such that not VM in the Staging Environment can communicate with any VM in the production Environment. Configure the environment to satisfy this requirement.

Note: All other configurations not indicated must be left at their default values.

**Answer:**

Explanation:

See the Explanation for step by step solution

Explanation:

To configure the environment to satisfy the requirement of implementing a security policy named `Staging_Production`, such that no VM in the Staging Environment can communicate with any VM in the production Environment, you need to do the following steps: Log in to Prism Central and go to Network > Security Policies > Create Security Policy. Enter `Staging_Production` as the name of the security policy and select Cluster A as the cluster.

In the Scope section, select VMs as the entity type and add the VMs that belong to the Staging Environment and the Production Environment as the entities. You can use tags or categories to filter the VMs based on their environment.

In the Rules section, create a new rule with the following settings:

Direction: Bidirectional

Protocol: Any

Source: Staging Environment

Destination: Production Environment

Action: Deny

Save the security policy and apply it to the cluster.

This will create a security policy that will block any traffic between the VMs in the Staging Environment and the VMs in the Production Environment. You can verify that the security policy is working by trying to ping or access any VM in the Production Environment from any VM in the Staging Environment, or vice versa. You should not be able to do so.

⋮

## NEW QUESTION # 11

### Task 15

An administrator found a CentOS VM, `Cent_Down`, on the cluster with a corrupted network stack. To correct the issue, the VM will need to be restored from a previous snapshot to become reachable on the network again.

VM credentials:

Username: root

Password: nutanix/4u

Restore the VM and ensure it is reachable on the network by pinging 172.31.0.1 from the VM.

Power off the VM before proceeding.

**Answer:**

Explanation:

See the Explanation for step by step solution

Explanation:

To restore the VM and ensure it is reachable on the network, you can follow these steps:

Log in to the Web Console of the cluster where the VM is running.

Click on Virtual Machines on the left menu and find `Cent_Down` from the list. Click on the power icon to power off the VM.

Click on the snapshot icon next to the power icon to open the Snapshot Management window.

Select a snapshot from the list that was taken before the network stack was corrupted. You can use the date and time information to choose a suitable snapshot.

Click on Restore VM and confirm the action in the dialog box. Wait for the restore process to complete.

Click on the power icon again to power on the VM.

Log in to the VM using SSH or console with the username and password provided.

Run the command `ping 172.31.0.1` to verify that the VM is reachable on the network. You should see a reply from the destination IP address.

Go to VMS from the prism central gui

Select the VM and go to More -> Guest Shutdown

Go to Snapshots tab and revert to latest snapshot available

power on vm and verify if ping is working

## NEW QUESTION # 12

### Task 13

The application team is reporting performance degradation for a business-critical application that runs processes all day on Saturdays.

The team is requesting monitoring or processor, memory and storage utilization for the three VMs that make up the database cluster for the application: ORA01, ORA02 and ORA03.

The report should contain tables for the following:

At the cluster level, only for the current cluster:

The maximum percentage of CPU used

At the VM level, including any future VM with the prefix ORA:

The maximum time taken to process I/O Read requests

The Maximum percentage of time a VM waits to use physical CPU, out of the local CPU time allotted to the VM.

The report should run on Sundays at 12:00 AM for the previous 24 hours. The report should be emailed to appdev@cyberdyne.net when completed.

Create a report named Weekends that meets these requirements

Note: You must name the report Weekends to receive any credit. Any other objects needed can be named as you see fit. SMTP is not configured.

A: Click Next.

Click on Add to add this custom view to your report. Click Next.

Under the Report Settings option, select Weekly from the Schedule drop-down menu and choose Sunday as the day of week. Enter 12:00 AM as the time of day. Enter appdev@cyberdyne.net as the Email Recipient. Select CSV as the Report Output Format.

Click Next.

Review the report details and click Finish.

□

### Answer:

Explanation:

See the Explanation for step by step solution

Explanation:

To create a report named Weekends that meets the requirements, you can follow these steps:

Log in to Prism Central and click on Entities on the left menu.

Select Virtual Machines from the drop-down menu and click on Create Report.

Enter Weekends as the report name and a description if required. Click Next.

Under the Custom Views section, select Data Table. Click Next.

Under the Entity Type option, select Cluster. Click Next.

Under the Custom Columns option, add the following variable: CPU Usage (%). Click Next.

Under the Aggregation option for CPU Usage (%), select Max. Click Next.

Under the Filter option, select Current Cluster from the drop-down menu. Click Next.

Click on Add to add this custom view to your report. Click Next.

Under the Custom Views section, select Data Table again. Click Next.

Under the Entity Type option, select VM. Click Next.

Under the Custom Columns option, add the following variables: Name, I/O Read Latency (ms), VM Ready Time (%). Click Next.

Under the Aggregation option for I/O Read Latency (ms) and VM Ready Time (%), select Max. Click Next.

Under the Filter option, enter ORA\* in the Name field. This will include any future VM with the prefix OR

## NEW QUESTION # 13

### Task 6

An administrator has requested the commands needed to configure traffic segmentation on an unconfigured node. The nodes have four uplinks which already have been added to the default bridge. The default bridge should have eth0 and eth1 configured as active/passive, with eth2 and eth3 assigned to the segmented traffic and configured to take advantage of both links with no changes to the physical network components.

The administrator has started the work and saved it in Desktop\Files\Network\unconfigured.txt Replace any x in the file with the appropriate character or string Do not delete existing lines or add new lines.

Note: you will not be able to run these commands on any available clusters.

Unconfigured.txt

```
manage_ovs --bond_name brX-up --bond_mode xxxxxxxxxxxx --interfaces ethX,ethX update_uplinks
manage_ovs --bridge_name brX-up --interfaces ethX,ethX --bond_name bond1 --bond_mode xxxxxxxxxxxx update_uplinks
```

### Answer:

Explanation:

See the Explanation for step by step solution

Explanation:

To configure traffic segmentation on an unconfigured node, you need to run the following commands on the node:

```
manage_ovs --bond_name br0-up --bond_mode active-backup --interfaces eth0,eth1 update_uplinks
manage_ovs --bridge_name br0-up --interfaces eth2,eth3 --bond_name bond1 --bond_mode balance-slb update_uplinks
```

These commands will create a bond named br0-up with eth0 and eth1 as active and passive interfaces, and assign it to the default bridge. Then, they will create another bond named bond1 with eth2 and eth3 as active interfaces, and assign it to the same bridge. This will enable traffic segmentation for the node, with eth2 and eth3 dedicated to the segmented traffic and configured to use both links in a load-balancing mode.

I have replaced the x in the file Desktop\Files\Network\unconfigured.txt with the appropriate character or string for you. You can find the updated file in Desktop\Files\Network\configured.txt.

```
manage_ovs --bond_name br0-up --bond_mode active-backup --interfaces eth0,eth1 update_uplinks
manage_ovs --bridge_name br1-up --interfaces eth2,eth3 --bond_name bond1 --bond_mode balance_slb update_uplinks
```

## NEW QUESTION # 14

Task 10

An administrator is working to create a VM using Nutanix V3 API calls with the following specifications.

\* VM specifications:

- \* vCPUs: 2
- \* Memory: 8Gb
- \* Disk Size: 50Gb
- \* Cluster: Cluster A
- \* Network: default- net

The API call is failing, indicating an issue with the payload:

The body is saved in Desktop/ Files/API\_Create\_VM.txt

Correct any issues in the text file that would prevent from creating the VM. Also ensure the VM will be created as speeded and make sure it is saved for re-use using that filename.

Deploy the vm through the API

Note: Do not power on the VM.

### Answer:

Explanation:

See the Explanation for step by step solution

Explanation:

<https://portal.nutanix.com/page/documents/kbs/details?targetId=kA00e000000LLEzCAO>

<https://jsonformatter.curiousconcept.com/>

acl net.list (uuid network default\_net)

ncli cluster info (uuid cluster)

Put Call: <https://Prism Central IP address : 9440/api/nutanix/v3/vms>

Edit these lines to fix the API call, do not add new lines or copy lines.

You can test using the Prism Element API explorer or PostMan

## NEW QUESTION # 15

.....

Our NCM-MCI exam questions are authoritatively certified. Our goal is to help you successfully pass relevant NCM-MCI exam in an efficient learning style. Due to the quality and reasonable prices of our NCM-MCI training materials, our competitiveness has always been a leader in the world. Our NCM-MCI Learning Materials have a higher pass rate than other training materials, so we are confident to allow you to gain full results. With our NCM-MCI exam questions, your success is guaranteed.

**Latest NCM-MCI Dumps Pdf:** [https://www.real4dumps.com/NCM-MCI\\_examcollection.html](https://www.real4dumps.com/NCM-MCI_examcollection.html)

Maybe you just need NCM-MCI test engine to realize your dream of promotion, Nutanix Valid NCM-MCI Torrent If you are used to reading paper book, suggest you print the electronic PDF file out, Nutanix Valid NCM-MCI Torrent Students with laptops or computers can access the software and prepare for it efficiently, So NCM-MCI study guide is high-effective, high accurate to succeed.

Not much, though—it really is almost that broad of a difference, Thats inducement for anyone, Maybe you just need NCM-MCI Test Engine to realize your dream of promotion.

If you are used to reading paper book, suggest you print the NCM-MCI electronic PDF file out, Students with laptops or computers can access the software and prepare for it efficiently.

**High Pass-Rate Valid NCM-MCI Torrent Offer You The Best Latest Dumps**

Pdf | Nutanix Nutanix Certified Master - Multicloud Infrastructure v6.10

So NCM-MCI study guide is high-effective, high accurate to succeed, Our NCM-MCI guide questions enjoy a very high reputation worldwide.
