New C_SIGDA_2403 Test Tutorial | C_SIGDA_2403 Valid Dumps Free

Our C_SIGDA_2403 learning quiz can be downloaded for free trial before purchase, which allows you to understand our sample questions and software usage. It will also enable you to make a decision based on your own needs. And we have organized a group of professionals to revise our C_SIGDA_2403 Preparation materials, according to the examination status and trend changes. The simple and easy-to-understand language of C_SIGDA_2403 exam questions frees any learner from studying difficulties.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample

Questions (Q13-Q18):

NEW QUESTION # 13

Which feature in SAP Signavio allows for the visualization of process variations over time?

- A. Process Performance Dashboard
- B. Variant Explorer
- **C. Over Time Widget**
- D. Process Discovery Widget

Answer: C

NEW QUESTION # 14

Why is it helpful to create a BPMN subset?

- A. To add additional information based on company requirements
- B. To help users check whether diagrams adhere to certain BPMN rules
- C. To enable changes to the default appearance of the notation
- **D. To focus on frequently used elements**

Answer: D

Explanation:

Creating a BPMN subset is beneficial for focusing on frequently used elements within the Business Process Model and Notation (BPMN) framework. This approach helps organizations streamline process modeling by concentrating on the BPMN elements that are most relevant and commonly used in their specific context. By doing so, it simplifies the modeling language for users, making it more accessible and reducing complexity in process design. This tailored subset can improve efficiency in process documentation and communication among stakeholders by eliminating rarely used or unnecessary elements that could otherwise complicate understanding and implementation.

References: BPMN specification and SAP Signavio best practices documentation.

NEW QUESTION # 15

Where do you configure access rights for your workflow?

- **A. On the Actions tab**
- B. On the Versions tab
- C. On the Details tab
- D. On the Trigger tab

Answer: A

NEW QUESTION # 16

What does process transparency mean in the context of Business Process Management? Note: There are 2 correct answers to this question.

- A. Highlight departmental boundaries in larger process models.
- **B. Model and design the processes to grasp all relevant information at a glance.**
- **C. Structure all processes and provide drill-down navigation from the value-chain level to the actual process.**
- D. Automate a process by using a workflow system.

Answer: B,C

NEW QUESTION # 17

How does the splitting Inclusive Gateway (OR) work? Note: There are 2 correct answers to this question.

- **A. It triggers one outgoing sequence flow, if a condition applies.**

- B. It triggers all outgoing sequence flows, if only one condition applies.
- **C. It triggers a few of all possible outgoing sequence flows, if several conditions apply.**
- D. It triggers only one of all outgoing sequence flows, if all conditions apply.

Answer: A,C

Explanation:

The Inclusive Gateway (OR) in BPMN operates as follows:

* Option C (It triggers a few of all possible outgoing sequence flows, if several conditions apply): The Inclusive Gateway can activate one or more of its outgoing sequence flows simultaneously, based on the evaluation of conditions. If multiple conditions are met, multiple paths can be triggered, allowing for a flexible process flow that can accommodate various scenarios.

* Option D (It triggers one outgoing sequence flow, if a condition applies): Even though an Inclusive Gateway can trigger multiple paths, it can also trigger just one path if only one condition applies. This versatility makes the Inclusive Gateway suitable for complex decision-making processes where the number of paths taken can vary.
