Salesforce Certified OmniStudio Developer certification exam covers various aspects of the development process, including design, development, deployment, and maintenance of applications. Passing the exam can provide developers with a competitive advantage in the job market and help them deliver quality work to their clients or organization.

## Salesforce Certified OmniStudio Developer Sample Questions (Q66-Q71):

### NEW QUESTION # 66

Refer to the exhibit below. A developer has configured an Integration Procedure element with SEND /RESPONSE TRANSFORMATIONS as shown.

Alternatively, how could the developer configure Additional Input to send exactly the same data? Assume that the developer checked Send Only Additional Input.

- A.
- B.
- C.
- D.

**Answer: D**

Explanation:

The Additional Input property allows the developer to specify additional input parameters to be sent to the Integration Procedure element. The input parameters can be specified as a JSON object or as a list of key- value pairs. If the developer checked Send Only Additional Input, then only the input parameters specified in Additional Input are sent, and the SEND/RESPONSE TRANSFORMATIONS are ignored. Therefore, the developer needs to specify the same input parameters as in the SEND/RESPONSE TRANSFORMATIONS in Additional Input. Option C shows how to do this using a JSON object with two properties: "DBExtractAction:Account" and "DBExtractAction:SecondaryAccount". The values of these properties are the same as in the SEND/RESPONSE TRANSFORMATIONS.

#### NEW QUESTION # 67

Which calculation procedure version in the list would execute on 2/15/2020 at 12:00 PM?

- A. Version Number 3
- B.  Version Number 2
- C. Version Number 1
- D. Version Number 4

**Answer: B**

#### NEW QUESTION # 68

What OmniStudio tool pre-populates the data in a PDF used by an OmniScript?

- A. A DataRaptor Load
- B.  A DataRaptor Transform
- C. A DataRaptor Extract
- D. A SOQL Query

**Answer: B**

Explanation:

According to the DataRaptor Transform Overview page, a DataRaptor Transform can be used to "pre-populate data in PDFs used by OmniScripts".

#### NEW QUESTION # 69

Refer to the exhibit.

The card layout uses an integration Procedure as a data source. The cards use the layout data source.

Which JSON data structure supports this card layout and follows best practices?

- A)
- B)
- C)

- A. Option B
- B. Option A
- C.  Option C

**Answer: C**

## NEW QUESTION # 70

In an OmniScript, a developer needs to configure a Disclosure element to require user input only if the user already checked a Non-Disclosure Agreement Checkbox.

How should the developer configure the conditional view to meet this requirement?

- A. Set element to require if true
- B. Disable read only if true
- C. Show element if true
- D. Set element to optional if false

**Answer: A**

Explanation:

Setting the element to require if true allows the developer to configure a Disclosure element to require user input only if a condition is met. In this case, the condition is that the user already checked a Non-Disclosure Agreement Checkbox. The other options are either incorrect or irrelevant for this requirement.

## NEW QUESTION # 71
