| 主題 1 | <ul style="list-style-type: none"><li>• Inspection Program: Aspiring API petrochemical inspectors and engineers cover different aspects of Inspection Program. The topic focuses on the development and implementation of the Inspection Program.</li></ul>                          |
| 主題 2 | <ul style="list-style-type: none"><li>• Risk-Based Inspection (RBI) Program Development: The API Risk Based Inspection exam evaluates the skills of Petrochemical inspectors and engineers about basic minimum elements to develop, implement, and maintain a RBI program.</li></ul> |
| 主題 3 | <ul style="list-style-type: none"><li>• Guidance for Stakeholders: In this topic, the API-580 exam focuses on guidance for important stakeholders. These stakeholders are owner-users, designers of pressure-containing equipment, and operators.</li></ul>                          |

## API-580下載 - API-580考試大綱

要想一次性通過API API-580 認證考試您必須得有一個好的準備和一個完整的知識結構。NewDumps為你提供的資源正好可以完全滿足你的需求。

### 最新的 ICP Programs API-580 免費考試真題 (Q36-Q41):

#### 問題 #36

Consequence analysis will aid in preparation of

- A. To understand about equipment history
- **B. Risk ranking of equipment**
- C. To understand the probability of failures

答案: B

#### 問題 #37

Deterioration for specific process equipment is not available, this can be sourced from

- **A. Published data**
- B. All the above
- C. Previous inspection data
- D. Experience with other similar equipment

答案: A

#### 問題 #38

Which of the following are essential elements of an RBI program? (Select all that apply)

- A. Process hazard analysis to verify the adequacy of process safety
- **B. Documented method of determining failure probability and consequence**
- **C. Management system for personnel qualifications**
- **D. Management system for maintaining documentation and analysis updates**

答案: B,C,D

#### 解題說明:

According to API 580, a complete and effective RBI program should include several essential elements to ensure it is systematic, repeatable, and technically sound. Section 5.2 of API 580 outlines the key components:

\* "A management system for personnel qualifications" - Personnel involved in RBI must be competent and qualified for their roles.

\* "A documented and validated methodology for assessing PoF and CoF" - A formal process is required to ensure the reliability of the analysis.

\* "A management system for documentation and update of RBI assessments" - Records must be controlled, updated regularly, and traceable.

These three components are explicitly defined in API 580 as essential elements.

On the other hand:

\* "Process hazard analysis to verify the adequacy of process safety" is important in the broader context of process safety management but is not listed as a required element of an RBI program in API 580. It is typically part of PSM frameworks under OSHA or similar, not RBI-specific.

Reference: API 580, 2nd Edition (2016), Section 5.2 - Elements of an RBI Program

#### 問題 #39

What must be developed in order to implement and sustain the RBI program?

[illegible]
