Questions (Q215-Q220):

NEW OUESTION #215

Northern Trail Outfitters (NTO) wants to start using Salesforce for its HR recruiting process. NTO needs to ensure that every application is linked to both a job posting and an applicants can apply for more one job posting, and each job posting can have more than one application.

How should an administrator configure the objects?

- A. Configure Job Application as a Junction object with master-detail relationship to both Application and Job Postings.
- B. Create Application as a junction object with a master- detail relations to Job Postings and a lookup relationship to Job Applications.
- C. Add applicants as a junction object with master-detail relationship to both Posting and Job Applications.
- D. Make Job Application as a junction object with a master-detail relationship to Applications and a lookup relationship to Job Posting.

Answer: A

Explanation:

A junction object is a custom object with two master-detail relationships that allows you to create many-to-many relationships between two objects. In this case, the Job Application object can be used as a junction object to link the Application object and the Job Posting object, so that each application can be related to one or more job postings, and each job posting can have one or more applications.
