DSCI Certified Privacy Lead Assessor DCPLA certification Sample

Questions (Q42-Q47):

NEW QUESTION # 42

_____ layer of the DSCI Privacy Framework (DPF) ensures that adequate level of awareness exists in an organization.

- A. Personal Information Security
- B. Privacy Strategy and Processes
- **C. Information Usage, Access, Monitoring and Training**
- D. None of the above

Answer: C

NEW QUESTION # 43

Which of the following provisions of Information Technology (Amendment) Act, 2008 deal with protection of PI or SPDI of Individuals?

- A. Section 43A & Section 72A
- **B. Section 43A**
- C. Section 43A & Section 65
- D. Section 65

Answer: B

NEW QUESTION # 44

"Data which cannot be attributed to a particular data subject without use of additional information." Which of the following best describes the above statement?

- A. Anonymized Data
- B. Metadata
- **C. Pseudonymized Data**
- D. None of the above

Answer: C

Explanation:

Pseudonymized data is defined as:

"Personal data that has been processed so that it can no longer be attributed to a specific data subject without the use of additional information." This definition matches exactly with the statement in the question. It is different from anonymization, where the data cannot be re-associated with an individual at all.

NEW QUESTION # 45

Which of the following are key contributors that would enhance the complexity in implementing security measures for protection of personal information? (Choose all that apply.)

- **A. Data collection through multiple modes and channels**
- B. Regulatory requirements to issue privacy notice and data breach notification in specified format
- **C. Evolution of nimble and flexible business processes affecting access management**
- D. None of the above

Answer: A,C

Explanation:

The complexity of implementing data security for personal information is often influenced by operational and architectural factors such as:

* A: Collecting data through various channels like web forms, mobile apps, customer support, etc., which introduces complexity in tracking and securing each channel.

* B: Flexible and dynamic business processes that evolve rapidly can complicate access management due to frequent changes in user roles, workflows, and data access needs.
