CWAP-405 Reliable Dumps Ebook & CWAP-405 Reliable Test Questions

By browsing this website, all there versions of CWAP-405 training materials can be chosen according to your taste or preference. In addition, we provide free updates to users for one year long after your purchase. If the user finds anything unclear in the CWAP-405 Exam Questions exam, we will send email to fix it, and our team will answer all of your questions related to the CWAP-405 actual exam. So as long as you have any question, just contact us!

CWNP Certified Wireless Analysis Professional Sample Questions (Q98-Q103):

NEW QUESTION # 98
You are repairing a misconfiguration in WMM settings on an AP. The aCWmin and aCWmax values were all changed.
What is the default aCWmax for AC_BK?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

NEW QUESTION # 99
Given: Protocol analyzer often have useful graphical dashboards providing information about the health and operations of the WLAN.
What is a valid use of a graph showing the Top APs Based on Active Associations?

- A. Discovering the total number of client STAs on your network
- B. Ensuring compliance with corporate security policies
- C. Evaluating the capacity handling on a specific channel
- D. Locating overloaded APs

Answer: D

NEW QUESTION # 100
In which element of a Beacon frame would you look to identity the current HT protection mode in which an AP is operating?

- A. HT Capabilities Element
- B. ERP Information Element
- C. HT Protection Element
- D. HT Operations Element

Answer: D

Explanation:
The HT protection mode in which an AP is operating can be identified by looking at the HT Operations element in a Beacon frame. The HT Operations element is a part of the Beacon frame that contains information about the High Throughput (HT) capabilities and operation of an 802.11n BSS. The HT Operations element has a field called HT Protection, which indicates how the BSS protects its HT transmissions from interference or collisions with non-HT devices or BSSs. The HT Protection field can have four values: No Protection, Nonmember Protection, 20 MHz Protection, or Non-HT Mixed Mode. The other options are not correct, as they do not contain information about the HT protection mode. The HT Protection element does not exist, the ERP Information element is used for Extended Rate PHY (ERP) protection mode for 802.11g devices, and the HT Capabilities element is used for indicating the supported HT features of an individual device. References: [Wireless Analysis Professional Study Guide CWAP-405], Chapter 5: 802.11 MAC Sublayer, page 125-126

NEW QUESTION # 101
You must report on frame types seen on the WLAN. You want to list the frame types by both name and binary value.
What frame type is represented by the binary value 011010, which includes the Type and Subtype values?

- A. Beacon
- B. Association Request
- C. Authentication
- D. PS-Poll

Answer: D

Explanation:
References:

NEW QUESTION # 102
Why would a STA that supports 802.11k Radio Measurement send a Neighbor Request to an AP?

- A. To learn about neighboring interference sources and tune its RF radio accordingly
- B. To request a list of neighboring APs which the STA can use as roaming candidates
- C. To inform the current AP about the STA's intent to roam to a neighboring AP, ensuring a seamless handover
- D. To request a list of neighboring STAs which enables the STA to better pick the right protection mechanisms

Answer: B

Explanation:
A STA that supports 802.11k Radio Measurement would send a Neighbor Request to an AP to request a list of neighboring APs which the STA can use as roaming candidates. A Neighbor Request is an Action frame that contains a subelement specifying the type of information that the STA wants to receive from the AP. A Neighbor Report is an Action frame that contains a subelement with a list of neighboring APs that match the criteria specified in the Neighbor Request. The Neighbor Report provides information such as BSSID, channel, operating class, and PHY type of each neighboring AP. This information helps the STA to perform intelligent roaming decisions based on signal quality, load, and compatibility .
